### Lifestyle Medicine, Second Edition

*CRC Press* There is no doubt that daily habits and actions exert a profound health impact. The fact that nutritional practices, level of physical activity, weight management, and other behaviors play key roles both in the prevention and treatment of most metabolic diseases has been recognized by their incorporation into virtually every evidence-based medical guideline. Despite this widespread recognition, physicians and other healthcare workers often cannot find a definitive and comprehensive source of information on all of these areas. Designed for physicians and other health care workers, *Lifestyle Medicine, Second Edition* brings together evidence-based research in multiple health-related fields to assist practitioners both in treating disease and promoting good health. Sections cover nutrition and exercise, behavioral psychology, public policy, and management of a range of disorders, including cardiovascular disease, endocrine and metabolic dysfunction, obesity, cancer, immunology and infectious diseases, pulmonary disorders, and many more.

## Multidisciplinary Management of Rectal Cancer

### Questions and Answers

[Springer](#) In this book, a distinguished group of clinicians provide straightforward, focused answers to the questions most commonly confronted by a multidisciplinary team when caring for patients with rectal cancer. The format of the book is designed to aid optimal decision making in a multidisciplinary setting with respect to key issues in imaging, radiotherapy, chemotherapy, and surgery, all of which are considered in detail. Helpful guidance is also offered on risk factor identification, pathology procedures and their prognostic value, and multidisciplinary team management. The authors have been carefully selected for their expertise, and most have been involved in the management of the more significant trials published in Europe during the past decade. In an era in which all patients are entitled to access healthcare systems that deliver the highest quality of treatment within a safe environment, together with appropriate advice, support, and long-term follow-up, the multidisciplinary team is of central importance. This successful book, in its revised and updated second edition, is designed to provide all the guidance likely to be required by members of the multidisciplinary team at various stages of the pathway of care for patients with rectal cancer.

## A Companion to Media Fandom and Fan Studies

[John Wiley & Sons](#) A Companion to Media Fandom and Fan Studies offers scholars and fans an accessible and engaging resource for understanding the rapidly expanding field of fan studies. International in scope and written by a team that includes many major scholars, this volume features over thirty especially-commissioned essays on a variety of topics, which together provide an unparalleled overview of this fast-growing field. Separated into five sections—Histories, Genealogies, Methodologies; Fan Practices; Fandom and Cultural Studies; Digital Fandom; and The Future of Fan Studies—the book synthesizes literature surrounding important theories, debates, and issues within the field of fan studies. It also traces and explains the social, historical, political, commercial, ethical, and creative dimensions of fandom and fan studies. Exploring both the historical and the contemporary fan situation, the volume presents fandom and fan studies as models of 21st century production and consumption, and identifies the emergent trends in this unique field of study.

## Food Factors for Cancer Prevention

*Springer Science & Business Media Chemoprevention is currently regarded as one of the most promising avenues for the control of cancer, with human epidemiological and animal studies indicating that the risk of cancer may be modified by changes in diet. Over 100 papers are collected in this volume, the proceedings of the International Conference on Food Factors: Chemistry and Cancer Prevention, held in Hamamatsu, Japan, in December 1995. Special emphasis is placed on chemical, biological, and molecular properties of phytochemicals in teas, fruit, vegetables, herbs, and spices, and on their potential for cancer prevention. Also discussed are the cancer-preventive effects of vitamins, lipids, carotenoids, flavonoids, and other components of diet. The findings presented here will be invaluable to all who are interested in diet and cancer prevention, and especially to biochemists, pharmacologists, food scientists, and nutritionists.*

## Distance Education at Swedish Universities

## An Evaluation of the Experimental Programme and a Follow-up Study

*Uppsala Universitet An evaluation of experimental distance courses offered by Swedish universities beginning in the academic year 1974-75, this study gathered data through questionnaires and interviews with teachers and administrators responsible for the courses (N=120), as well as questionnaires distributed to students at the beginning of the first term and the end of the second term. These provided background data and information on the students' work situations, study motives, planned and actual amount of time for study, study breaks and other problems, use of special teaching aids, and attitudes toward different components of the teaching program. Main findings include a very high degree of satisfaction among the participants (N=797) and relatively high pass rates, even though the majority of the participants worked full time while they were taking courses. A follow-up study of the students (N=571), which was conducted five years after they started, indicates that the work situation is very stable for men, though women change work frequently; interest in continuing education remains very high, with 80% of the group involved in some other kind of studies during the 5-year period; and the group is very flexible in their choice of educational organization. A discussion of the decentralized Swedish model in relation to other systems and the international debate on distance education models concludes the report. A 17-page reference list including a number of sources in English as well as Swedish, data collection instruments, and a list of related reports are included. (Author/LMM)*

## Workbook in Practical Neonatology E-Book

Elsevier Health Sciences Using a highly effective, case-based approach, *Workbook in Practical Neonatology* puts neonatal evaluation, diagnosis, and treatment in a clinical context and tests your knowledge with questions and answers for each topic. You'll find authoritative guidance on the problems you're most likely to see in practice, including issues regarding resuscitation, mechanical ventilation, anemia, fluid therapy, and bronchopulmonary dysplasia. The 6th Edition has been extensively revised, with new authors, rewritten content, improved figures and tables, and many new cases throughout. Organizes chapters around case studies, followed by questions and answers that require you to make diagnostic decisions and help you understand how scientific concepts apply to each clinical problem. Guides you step-by-step through patient care with abundant diagnostic algorithms, illustrations, and decision trees. Features eleven chapters rewritten by new authors, new tables and algorithms, new cases, and updated discussions of existing cases. An excellent learning tool and everyday reference for practicing neonatologists, as well as students, trainees, nurses, and other clinicians.
