[4] SOG The Secret Wars of America's Commandos in Vietnam Simon and Schuster John Plaster's riveting account of his covert activities as a member of a special operations team during the Vietnam War is "a true insider's account, this eye-opening report will leave readers feeling as if they've been given a hot scoop on a highly classified project" (Publishers Weekly). Code-named the Studies and Observations Group, SOG was the most secret elite US military unit to serve in the Vietnam War—so secret its very existence was denied by the government. Composed entirely of volunteers from such ace fighting units as the Army Green Berets, Air Force Air Commandos, and Navy SEALs, SOG took on the most dangerous covert assignments, in the deadliest and most forbidding theaters of operation. In SOG, Major John L. Plaster, a three-tour SOG veteran, shares the gripping exploits of these true American warriors in a minute-by-minute, heartbeat-by-heartbeat account of the group's stunning operations behind enemy lines—penetrating heavily defended North Vietnamese military facilities, holding off mass enemy attacks, launching daring missions to rescue downed US pilots. Some of the most extraordinary true stories of honor and heroism in the history of the US military, from sabotage to espionage to hand-to-hand combat, Plaster's account is "a detailed history of this little-known aspect of the Vietnam War...a worthy act of historical rescue from an unjustified, willed oblivion" (The New York Times). Secret Commandos Behind Enemy Lines with the Elite Warriors of SOG Simon and Schuster Major John L. Plaster recalls his remarkable covert activities as a member of a special operations team during the Vietnam War in a "comprehensive, informative, and often exciting...account of an important part of the overall Vietnam tragedy" (The New York Times). Before there were Navy SEALs, there was SOG. Short for "Studies and Operations Group," it was a secret operations force in Vietnam, the most highly decorated unit in the war. Although their chief mission was disrupting the main North Vietnamese supply route into South Vietnam, SOG commandos also rescued downed helicopter pilots and fellow soldiers, and infiltrated deep into Laos and Cambodia to identify bombing targets, conduct ambushes, mine roads, and capture North Vietnamese soldiers for intelligence purposes. Always outnumbered, they matched wits in the most dangerous environments with an unrelenting foe that hunted them with trackers and dogs. Ten entire teams disappeared and another fourteen were annihilated. This is the dramatic, page-turning true story of that team's dedication, sacrifice, and constant fight for survival. In the "gripping" (Publishers Weekly) Secret Commandos, John Plaster vividly describes these unique warriors who gave everything fighting for their country—and for each other. Navy SEAL Sniper An Intimate Look at the Sniper of the 21st Century Simon and Schuster The sniper is a battlefield threat second to none. Mastering the art of marksmanship is critical but is only part of what makes a Navy SEAL sniper. Snipers must be able to apply the craft in an urban environment or alone on a hostile mountain top with equal effectiveness. Today's sniper must not just leverage technological advances but also have the foreknowledge to select the best rifle and gear for the mission. Increasingly, he must have the mental toughness to adapt to a constantly changing environment, gather intelligence, and truly act as a force multiplier. In this comprehensive look through the eyes of former Navy SEAL sniper instructor Brandon Webb and fellow Navy SEAL snipers Chris Kyle and Glen Doherty, the authors reveal not just the fundamentals of marksmanship but also the science of shooting, stalking, and camouflage and how technological advances have changed the training and increased the effectiveness of the modern sniper. Including maritime, helicopter, and urban sniper operations, this updated edition also goes into detail on the latest research, development, testing, and evaluation of weapons and optics. From the basics like compensating for wind and bullet drop, to camouflage and placing yourself or your team in the best position to take a photo or pull a trigger, Webb and Doherty cover the critical elements that comprise the twenty-first century sniper. EMPLOYMENT OF NEGRO TROOPS The work started in the 1940s is written in the vernacular of the period. From the volume - As in the case of some other titles in the United States Army in World War II series, Ulysses Lee's The Employment of Negro Troops has been long and widely recognized as a standard work on its subject. Although revised and consolidated before publication, the study was written largely between 1947 and 1951. If the now much-cited title has an echo of an earlier period, that very echo testifies to the book's rather remarkable twofold achievement: that Lee wrote it when he did, well before the Civil Rights movement of the 1960s, and that its reputation- for authority and objectivity-has endured so well. Recognizing that the story of Negro participation in military service during World War II was of national interest as well as of great value for future military planning, the Assistant Secretary of War in February 1944 recommended preparation of a book on this subject. The opportunity to undertake it came two years later with the assignment to the Army's Historical Division of the author, then a captain and a man highly qualified by training and experience to write such a work. After careful examination of the sources and reflection Captain Lee concluded that it would be impractical to write a comprehensive and balanced history about Negro soldiers in a single volume. His plan, formally approved in August 1946, was to focus his own work on the development of Army policies in the use of Negroes in military service and on the problems associated with the execution of these policies at home and abroad, leaving to the authors of other volumes in the Army's World War II series, then taking shape, the responsibility for covering activities of Negroes in particular topical areas. The volume opens with background chapters recalling the experience of Negroes in the Army in World War I, the position of Negroes in the Army between wars, and Army planning for their use in another great war, as well as the clash of public and private views over employment of Negroes as soldiers. It continues with chapters on the particular problems associated with absorbing large numbers of Negroes into the Army-the provision of separate facilities for them, their leadership and training difficulties, their physical fitness for service, morale factors

influencing their eagerness to serve, and the disorders that attracted so much attention to the problems of their service. The concluding eight chapters are concerned principally with the employment of Negro soldiers overseas, in ground and air combat units and in service units. Map Reading and Land Navigation Fm 3-25. 26 The field manual provides a standardized source document for Army-wide reference on map reading and land navigation. It applies to every soldier in the army regardless of service branch, MOS, or rank. This manual also contains both doctrine and training guidance on map reading and land navigation. Part One addresses map reading and Part Two, land navigation. The appendices include an introduction to orienteering and a discussion of several devices that can assist the soldier in land navigation. For soldiers, hunters, climbers, and hikers alike, this is the definitive guide to map reading and navigation. Surveillance Tradecraft The Professional's Guide to Surveillance Training This new surveillance training book has been compiled as the ultimate guide and reference book for the surveillance operative. Tactical Combat Casualty Care Handbook Tactical Combat Casualty Care (TCCC) has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility. Therefore, the prehospital phase of care is needed to focus on reducing the number of combat deaths. However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and pararescue personnel in the U.S. military have been trained to perform battlefield trauma care through civilian-based trauma courses. These courses are not designed for the prehospital combat environment and do not reflect current practices in the area of prehospital care. TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities Foundations of Sniper Marksmanship Based on Snipercraft Principles LLP "This book is more weighted toward the marksmanship side of things. This is because it's important to establish a solid foundation of training in the classic marksmanship positions before you start to worry about tactical application. As described in the last few editions of the American Sniper Association Sniper Utilization Survey police snipers have made successful shots against bad guys from the prone, sitting, kneeling and standing positions. It's hoped that you are reading this because you want to prepare ahead of time to attend a Snipercraft Basic or Advanced Sniper Course, because that's the intended audience of this handbook; however this text will help prepare you for any good police sniper school."--Provided by publisher.
