## DISCOURSES OF GLOBALISATION AND HIGHER EDUCATION REFORMS

---

### EMERGING PARADIGMS

---

**Springer Nature** *This book examines some of the major higher education reforms and policy shifts globally, particularly in the light of recent shifts in quality and standards-driven education and policy research. It critiques the neo-liberal ideological imperatives of current higher education and policy reforms, and illustrates the way that changes in the relationship between the state and higher education policy affect current trends in higher education reforms. Using diverse comparative education paradigms from critical theory to historical-comparative research, the chapters focus on globalisation, ideology and higher education reforms and examine both the reasons and outcomes of higher education reforms and policy change. The book analyses and evaluates the policy shifts in methodological approaches to globalisation and higher education reforms, and their impact on education policy and pedagogy. The book contributes in a very scholarly way, to a more holistic understanding of the nexus between globalisation, comparative education research and higher education reforms.*

### NEANDERTHALS TO NATIONS

---

**Dorrance Publishing** *Neanderthals to Nations A History of Everyone By: John S. Hill Ph.D. Neanderthals to Nations is a one-stop read*

*in understanding why the world is as it is today. The book starts off in the 21st century with the world suffering from developmental inequities, global violence, and climate change. It then explains how the architects of human destiny- geography, culture and technology- shaped the planet and its people to become what we are today. Starting fourteen billion years ago, the story takes the reader back to the present day, explaining how nations and people evolved to become what they currently are. Along the way, the reader discovers: · What “www” really stands for (and its not “worldwide web”); · How Confucius made China great; · The keys to the U.S. and China’s current governance systems in ancient Greece; · Religion; why the East is (still) inscrutable to the Western minds, how religion evolved and why it continues to be popular today; · The U.S. Constitution came from where?; · How the pope determined the cultural destiny of Latin America; · How the Suez Canal and oil remade the Middle East’s Future; · The evolution of country cultures: how the U.S. , British, French, German, Latin American, Chinese, Japanese and others came to be as they are today; · Why the Palestinians and Israel are at loggerheads, why 9/11 really happened and · How racism began and continues.*

## **CREATING THE GLOBAL CLASSROOM**

---

---

### **APPROACHES TO DEVELOPING THE NEXT GENERATION OF WORLD SAVVY STUDENTS**

---

**Routledge** *The book examines how to begin to think like a global educator first by examining how our own histories and experiences have formed our own cultural and professional identities and second how the varied frames by which global education can be understood - pedagogical, ideological and cosmopolitan - have shaped the field. Laurence Peters connects theory and practice about global education relevant to cultivating global awareness in primary and secondary students. Rather than seeing global education as a*

*special field separate from the other disciplines the author encourages integration of global perspectives into everything we do. Showcasing how global awareness is a developmental issue, dependent upon the student's ability to step outside of their own place-based comfort zone, this volume lays out a roadmap of major challenges and issues around instilling this awareness in students. This book connects theory and practice about global education relevant to cultivating global awareness in primary and secondary students. From this foundation, the book engages with the challenge of integrating global perspectives within a crowded curriculum. By convincing students and teachers alike of global education's centrality, thinking globally becomes an integral component of learning across subject areas and grade levels, and this work encourages students to exercise empathy for the other and to develop critical skills to see through media distortions and 'fake news' so they can better resist the tendency of politicians in our increasingly multicultural countries to divide people along racial and ethnic lines.*

## **FEMININE ENLIGHTENMENT**

---

---

## BRITISH WOMEN WRITERS AND THE PHILOSOPHY OF PROGRESS, 1759-1820

---

**Edinburgh University Press** *Revises established understandings of British women writers' contributions to Enlightenment narratives of social and historical progress Drawing on original archival research, A Feminine Enlightenment argues that women writers shaped Enlightenment conversations regarding the role of sentiment and gender in the civilizing process. By reading women's literature alongside history and philosophy and moving between the eighteenth century and Romantic era, JoEllen DeLucia challenges conventional historical and generic boundaries. Beginning with Adam Smith's Theory of Moral Sentiments (1759), she tracks discussions of "e;women's progress"e; from the rarified atmosphere of mid-eighteenth-century Bluestocking salons and the masculine domain of the Scottish university system to the popular Minerva Press novels of the early nineteenth century. Ultimately, this study positions feminine genres such as the Gothic romance and Bluestocking poetry, usually seen as outliers in a masculine Age of Reason, as essential to understanding emotion's role in Enlightenment narratives of progress. The effect of this study is twofold: to show how developments in women's literature reflected and engaged with Enlightenment discussions of emotion, sentiment, and commercial and imperial expansion; and to provide new literary and historical contexts for contemporary conversations that continue to use "e;women's progress"e; to assign cultures and societies around the globe a place in universalizing schemas of development.*

**Key Features***Establishes the centrality of gender to Enlightenment discussions of social and historical development Uncovers evidence of women writers' participation in the Scottish Enlightenment's theorization of sentiment and historical progress Provides literary and historical background for ongoing discussions of the history of emotion and the study of affect*

download. Education is key in life. Thus, real education vs. modern schools is confronted early on here. Much of modern society is invested in schools that result in a lack of true education and a lacking of who's truly educated. Also a key issue we need better education on is the origin and progression of life. There's too many problems on this topic from many so-called scientific, religious people, etc. today. This book helps get past this and faulty history to learn true secrets on this. Key issues like these maybe difficult to answer properly, especially with the demands of our diverse world. So we must strive to have a true understanding of religion and science. At the moment, most people only know/believe in their own faith, which is prone to corruption these days. There are some people who proclaim that they accept all beliefs, while some only accept what ever is currently popular among modern scientists, regardless of how objective and correct it is. The irony is many of them have misunderstandings. It's rare for someone to go beyond this, and successfully achieve true knowledge too. Thus, we take on the challenge of providing a true understanding of religion and science with as much support as practical from the various sources that many different people may require. This is a highly key issue. At that point, we can have other key issues answered. Answering why good/bad things happen, how pain and pleasure actually work, getting past the man made socio-economic systems that are major problems today while also giving real answers to try and resolve the problems are all key. And we must go beyond our own lives as well as human beings in general and remember the ecological system we have and improve. Otherwise the knowledge and resolution of problems would be too incomplete. With all of the above answered (as this book does) many of us will be more likely to enter into a golden age. Now many of us have heard the claim that in late 2012 the Mayan calendar ends and that means the world will end. I'm writing this before that date and I'm positive we shouldn't simply accept that the world will "end" and it may only mean the Mayan calendar ends. That may imply that a significant transition occurs. I've noticed a lot of evidence in our world lately that we maybe around such a time. And revealed scriptures (i.e. Vedic) seem to imply that we're around such a time. I'm not sure of the exact time because this is dealing with a global issue with large time scales. This maybe due to different people interpreting the things different ways. But this issue will be confronted. The book also answers how pain and pleasure work with a new unified theory. There is also a new unified theory of universal proportions (figuratively and literally) in the bonus chapter. Regardless of previous, personal beliefs, we must strive to find key answers that both science and religion can confirm. All the above can and must be done. And I do it for you in this book! 1st Two chapters free; [www.createspace.com/Preview/1117847](http://www.createspace.com/Preview/1117847) All honest ratings for all this is welcome.
