Public History for a Post-Truth Era

Fighting Denial through Memory Movements

Taylor & Francis Public History for a Post-Truth Era explores how to combat historical denial when faith in facts is at an all-time low. Moving beyond memorial museums or documentaries, the book shares on-the-ground stories of participatory public memory movements that brought people together to grapple with the deep roots and current truths of human rights abuses. It gives an inside look at "Sites of Conscience" around the world, and the memory activists unearthing their hidden histories, from the Soviet Gulag to the slave trade in Senegal. It then follows hundreds of people joining forces across dozens of US cities to fight denial of Guantánamo, mass incarceration, and climate change. As reparations proposals proliferate in the US, the book is a resource for anyone seeking to confront historical injustices and redress their harms. Written in accessible, non-academic language, it will appeal to students, educators, or supportive citizens interested in public history, museums, or movement organizing.

Strengthening Forensic Science in the United States

A Path Forward

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Beyond New Media

Discourse and Critique in a Polymediated Age

Lexington Books Bringing together rhetorical, media studies, organizational communication, ethnographic, pop culture, mass communication, gender studies, and educational technology backgrounds to bear on polymediation, the authors interrogate the language by which we talk about the contemporary media landscape and the impact of the media on people's lives.

Homicide and Severe Mental Disorder

Understanding and Prevention

Routledge Homicide and Severe Mental Disorder: Understanding and Prevention provides a complete picture of how severe mental disorder can be assessed in cases of homicide, and how improved understanding can impact risk reduction and prevention. Michael Farrell brings together a wide range of material including theory, research, demographic data, case examples, enquiry reports, and

practical strategies, providing clear examples throughout. Farrell draws on examples of homicide representing a great challenge to both comprehension and prevention – cases that have sometimes provoked media criticism of public policy and services and have aroused public anxiety. In seeking fuller understanding, the book takes an overview of severe mental disorder, homicide, and prevention, before introducing the approach of Situational Crime Prevention and related theory and discussing demographic features of perpetrators and victims. Turning to prevention, the text examines examples of research into homicides perpetrated by individuals with severe mental disorder. Insights from Situational Crime Prevention are applied to selected cases, and a wider view is then taken looking at the criminological features of means, motive, opportunity, and location. Organisational constraints and limitations of communication in services are considered, and cases illuminating the issues and challenges throughout the book are summarised in a structured end of volume glossary. As evidence and insights accumulate and cohere, they more clearly indicate preventive strategies. Homicide and Severe Mental Disorder will be of great interest to students, researchers, and teachers in psychiatry, psychology, and criminology, health and mental health professionals, criminal justice personnel, and those working with individuals with severe mental disorder.

Women and Capital Punishment in the United States

An Analytical History

McFarland The history of the execution of women in the United States has largely been ignored and scholars have given scant attention to gender issues in capital punishment. This historical analysis examines the social, political and economic contexts in which the justice system has put women to death, revealing a pattern of patriarchal domination and female subordination. The book includes a discussion of condemned women granted executive clemency and judicial commutations, an inquiry into women falsely convicted in potentially capital cases and a profile of the current female death row population.

End of Its Rope

How Killing the Death Penalty Can Revive Criminal Justice

Harvard University Press Today, death sentences in the U.S. are as rare as lightning strikes. Brandon Garrett shows us the reasons why, and explains what the failed death penalty experiment teaches about the effect of inept lawyering, overzealous prosecution, race discrimination, wrongful convictions, and excessive punishments throughout the criminal justice system.

Amusing Ourselves to Death

Public Discourse in the Age of Show Business

Penguin What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read Amusing Ourselves to Death, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. Amusing Ourselves to Death is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one." -Jonathan Yardley, *The Washington Post Book World*

Birthing Models on the Human Rights Frontier

Speaking Truth to Power

Routledge This book addresses the politics of global health and social justice issues around birth, focusing on dynamic communities that have chosen to speak truth to power by reforming dysfunctional health care systems or creating new ones outside the box. The chapters present models of childbirth at extreme ends of a spectrum—from the conflict zones and disaster areas of Afghanistan, Israel, Palestine, and Indonesia, to high-risk tertiary care settings in China, Canada, Australia, and Turkey. Debunking notions about best care, the volume illustrates how human rights in health care are on a collision course with global capitalism and offers a number of specific solutions to this ever-increasing problem. This volume will be a valuable resource for scholars and students in anthropology, sociology, health, and midwifery, as well as for practitioners, policy makers, and organizations focused on birth or on social activism in any arena.

The Masque of the Red Death

Phoemixx Classics Ebooks The Masque of the Red Death Edgar Allan Poe - The story is said in the most enthralling manner that it makes it very interesting as well as introspective. Even though it appears to be very literal but the crux of the matter is all about the inevitability of death. The prince thought that with his power and position he could defy the plague that caused death in his kingdom. But eventually even he is not spared because on the figurative level it is not a plague but death itself, that does not spare anyone. Prince Prospero's intentions and preparations did not stand a chance when death decided to take him on.

Deterrence and the Death Penalty

National Academies Press Many studies during the past few decades have sought to determine whether the death penalty has any deterrent effect on homicide rates. Researchers have reached widely varying, even contradictory, conclusions. Some studies have concluded that the threat of capital punishment deters murders, saving large numbers of lives; other studies have concluded that executions actually increase homicides; still others, that executions have no effect on murder rates. Commentary among researchers, advocates, and policymakers on the scientific validity of the findings has sometimes been acrimonious. Against this backdrop, the National Research Council report Deterrence and the Death Penalty assesses whether the available evidence provides a scientific basis for answering questions of if and how the death penalty affects homicide rates. This new report from the Committee on Law and Justice concludes that research to date on the effect of capital punishment on homicide rates is not useful in determining whether the death penalty increases, decreases, or has no effect on these rates. The key question is whether capital punishment is less or more effective as a deterrent than alternative punishments, such as a life sentence without the possibility of parole. Yet none of the research that has been done accounted for the possible effect of noncapital punishments on homicide rates. The report recommends new avenues of research that may provide broader insight into any deterrent effects from both capital and noncapital punishments.

Encyclopedia of World Climatology

Springer Science & Business Media Today, given the well-publicized impacts of events such as El Niño, there is an unequaled public awareness of how climate affects the quality of life and environment. Such awareness has created an increasing demand for accurate climatological information. This information is now available in one convenient, accessible source, the Encyclopedia of World Climatology. This comprehensive volume covers all the main subfields of climatology, supplies information on climates in major continental areas, and explains the intricacies of climatic processes. The level of presentation will meet the needs of specialists, university students, and educated laypersons. A successor to the 1986 Encyclopedia of Climatology, this compendium provides a clear explanation of current knowledge and research directions in modern climatology. This new encyclopedia emphasizes climatological developments that have evolved over the past twenty years. It offers more than 200 informative articles prepared by 150 experts on numerous subjects, ranging from standard areas of study to the latest research studies. The relationship between climatology and both physical and social science is fully explored, as is the significance of climate for our future well-being. The information is organized for speedy access. Entries are conveniently arranged in alphabetical order, thoroughly indexed, and cross-referenced. Every entry contains useful citations to additional source materials. The Editor John E. Oliver is Professor Emeritus at Indiana State University. He holds a B.Sc. from London University, and a MA and Ph.D from Columbia University. He taught at Columbia University and then at Indiana State where he was formerly Chair of the Geography-Geology Department, and Associate Dean, College of Arts and Sciences. He has written many books and journal articles in Climatology, Applied Climatology and Physical Geography.

Pre-Incident Indicators of Terrorist Incidents

The Identification of Behavioral, Geographic and Temporal Patterns of Preparatory Conduct

DIANE Publishing This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Assault on Mexican American Collective Memory, 2010–2015

Swimming with Sharks

Rowman & Littlefield This book puts recent events in the Southwestern United States into historical context, exploring how and why powerful elites are laying an assault on the history and identity of Mexican Americans and Latinos. It argues that neoliberalism and the privatization of schools and higher education drives this phenomenon.

Imprisoned by the Past

Warren McCleskey and the American Death Penalty

Oxford University Press Imprisoned by the Past: Warren McCleskey and the American Death Penalty connects the history of the American death penalty to the case of Warren McCleskey. By highlighting the relation between American history and an individual case, Imprisoned by the Past provides a unique understanding of the big picture of capital punishment in the context of a compelling human story. McCleskey's criminal law case resulted in one of the most important Supreme Court cases in U.S. legal history, where the Court confronted evidence of racial discrimination in the administration of capital punishment. The case marks the last that the Supreme Court realistically might have held that capital punishment violates the Eighth Amendment of the U.S. Constitution. As such, the constitutional law case also created a turning point in the death penalty debate in the country. The book connects McCleskey's case -- as well as his life and crime -- to the issues that have haunted the American death penalty debate since the first executions by early settlers and that still affect the legal system today. Imprisoned by the Past ties together three unique American stories in U.S history. First, the book considers the changing American death penalty across centuries where drastic changes have occurred in the last fifty years. Second, the book discusses the role that race played in that history. And third, the book tells the story of Warren McCleskey and how his life and legal case brought together the other two narratives.

Marine Conservation Paleobiology

Springer This volume describes and explores the emerging discipline of conservation paleobiology, and addresses challenges faced by established and young Conservation Paleobiologist's alike. In addition, this volume includes applied research highlighting how conservation paleobiology can be used to understand ecosystem response to perturbation in near and deep time. Across 10 chapters, the book aims to (1) explore the goals of conservation paleoecology as a science, (2) highlight how conservation paleoecology can be used to understand ecosystems' responses to crises, (3) provide case studies of applications to modern ecosystems, (4) develop novel applications of paleontological approaches to neontological data, and (5) present a range of ecosystem response and recovery through environmental crises, from high-resolution impacts on organism interactions to the broadest scale of responses of the entire marine biosphere to global change. The volume will be of interest to paleoecologists, paleobiologists, and conservation biologists.

The Land of Open Graves

Living and Dying on the Migrant Trail

Univ of California Press In his gripping and provocative debut, anthropologist Jason De León sheds light on one of the most pressing political issues of our time—the human consequences of US immigration policy. *The Land of Open Graves* reveals the suffering and deaths that occur daily in the Sonoran Desert of Arizona as thousands of undocumented migrants attempt to cross the border from Mexico into the United States. Drawing on the four major fields of anthropology, De León uses an innovative combination of ethnography, archaeology, linguistics, and forensic science to produce a scathing critique of “Prevention through Deterrence,” the federal border enforcement policy that encourages migrants to cross in areas characterized by extreme environmental conditions and high risk of death. For two decades, this policy has failed to deter border crossers while successfully turning the rugged terrain of southern Arizona into a killing field. In harrowing detail, De León chronicles the journeys of people who have made dozens of attempts to cross the border and uncovers the stories of the objects and bodies left behind in the desert. *The Land of Open Graves* will spark debate and controversy.

Laws of Medicine

Core Legal Aspects for the Healthcare Professional

Springer Nature This book provides an overview of the US laws that affect clinical practice for healthcare professionals with no legal background. Divided into thirteen sections, each chapter starts with a summary of the chapter's content and relevant legal concepts in bullet points before discussing the topics in detail. An application section is provided in many chapters to clarify essential issues by reflecting on clinically relevant case law or clinical vignette(s). Filling a crucial gap in the literature, this comprehensive guide gives healthcare professionals an understanding or a starting point to legal aspects of healthcare.

Violent Places

Everyday Politics and Public Lives in Post-Dayton Bosnia and Herzegovina

Tectum Wissenschaftsverlag In this multi-sited ethnography, the author explores how political agency is shaped through interactions on public places across four central Bosnian and Herzegovinian cities. The author shows that everyday life on public places in post-war Bosnia and Herzegovina is fundamentally political: either by design or by default, and that no one can escape the highly dynamic negotiations of rights, duties, and obligations that occur in every public interaction. These positioning games are far from innocent; they create elites, manifest political power, and in the same moment cut out more and more citizens of Bosnia and Herzegovina from the promises set by market economy and democracy. Through examining hundreds of interactions on public spaces ranging from soccer stadiums and market halls to graveyards, this study not only shows how post-war political agency in Bosnia and Herzegovina is bound to the public realm, but also that options for defining one's personal future are less linked to ethno-national group membership than widely assumed. Instead local, generational, and economic differences play a significant role in determining everyday livelihood. These factors – unique in their composition in every observed place – highlight a new realm of conflict potentials that will shape the future of Bosnia and Herzegovina over the next decade.

Native Presence and Sovereignty in College

Sustaining Indigenous Weapons to Defeat Systemic

Monsters

Teachers College Press What is at stake when our young people attempt to belong to a college environment that reflects a world that does not want them for who they are? In this compelling book, Navajo scholar Amanda Tachine takes a personal look at 10 Navajo teenagers, following their experiences during their last year in high school and into their first year in college. It is common to think of this life transition as a time for creating new connections to a campus community, but what if there are systemic mechanisms lurking in that community that hurt Native students' chances of earning a degree? Tachine describes these mechanisms as systemic monsters and shows how campus environments can be sites of harm for Indigenous students due to factors that she terms monsters' sense of belonging, namely assimilating, diminishing, harming the worldviews of those not rooted in White supremacy, heteropatriarchy, capitalism, racism, and Indigenous erasure. This book addresses the nature of those monsters and details the Indigenous weapons that students use to defeat them. Rooted in love, life, sacredness, and sovereignty, these weapons reawaken students' presence and power. Book Features: Introduces an Indigenous methodological approach called story rug that demonstrates how research can be expanded to encompass all our senses. Weaves together Navajo youths' stories of struggle and hope in educational settings, making visible systemic monsters and Indigenous weaponry. Draws from Navajo knowledge systems as an analytic tool to connect history to present and future realities. Speaks to the contemporary situation of Native peoples, illuminating the challenges that Native students face in making the transition to college. Examines historical and contemporary realities of Navajo systemic monsters, such as the financial hardship monster, deficit (not enough) monster, failure monster, and (in)visibility monster. Offers insights for higher education institutions that are seeking ways to create belonging for diverse students.

Behold a Pale Horse

Light Technology Publishing Bill Cooper, former United States Naval Intelligence Briefing Team member, reveals information that remains hidden from the public eye. This information has been kept in Top Secret government files since the 1940s. His audiences hear the truth unfold as he writes about the assassination of John F. Kennedy, the war on drugs, the Secret Government and UFOs. Bill is a lucid, rational and powerful speaker who intent is to inform and to empower his audience. Standing room only is normal. His presentation and information transcend partisan affiliations as he clearly addresses issues in a way that has a striking impact on listeners of all backgrounds and interests. He has spoken to many groups throughout the United States and has appeared regularly on many radio talk shows and on television. In 1988 Bill decided to "talk" due to events then taking place worldwide, events which he had seen plans for back in the early '70s. Since Bill has been "talking," he has correctly predicted the lowering of the Iron Curtain, the fall of the Berlin Wall and the invasion of Panama. All Bill's predictions were on record well before the events occurred. Bill is not a psychic. His information comes from Top Secret documents that he read while with the Intelligence Briefing Team and from over 17 years of thorough research. "Bill Cooper is the world's leading expert on UFOs." -- Billy Goodman, KVEG, Las Vegas. "The onlt man in America who has all the pieces to the puzzle that has troubled so many for so long." -- Anthony Hilder, Radio Free America "William Cooper may be one of America's greatest heros, and this story may be the biggest story in the history of the world." -- Mills Crenshaw, KTALK, Salt Lake City. "Like it or not, everything is changing. The result will be the most wonderful experience in the history of man or the most horrible enslavement that you can imagine. Be active or abdicate, the future is in your hands." -- William Cooper, October 24, 1989.

Hannah Arendt on Educational Thinking and Practice in Dark Times

Education for a World in Crisis

Bloomsbury Publishing In her renowned and provocative essay, *The Crisis in Education*, Hannah Arendt observed that a 'crisis becomes a disaster only when we respond to it with preformed judgements, that is, with prejudices'. Taken as a whole, Arendt's work provides an enduring provocation to think and to make judgements about education and the issues that impact on it, such as political, economic and cultural disruption and uncertainty. Drawing together the leading thinkers on Arendtian ideas and education, this collection explores the role and promise education can have in preparing the future generation to understand, to think about and to act within the world. Concluding the same essay on the crisis in education, Arendt declared education to be the point at which love for the world meets love for those who are newcomers to it. The authors respond to Arendt's call for responsibility and authority in education, providing a leading edge thinking, analysis and agenda setting for public education systems and the world in dark times.

The Arizona Quarterly

Standing between Life and Extinction

Ethics and Ecology of Conserving Aquatic Species in

The Death and Life of Great American Cities

Vintage Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this *Modern Library* edition.

A Dangerous Master

How to Keep Technology from Slipping Beyond Our Control

Basic Books We live in an age of awesome technological potential. From nanotechnology to synthetic organisms, new technologies stand to revolutionize whole domains of human experience. But with awesome potential comes awesome risk: drones can deliver a bomb as readily as they can a new smartphone; makers and hackers can 3D-print guns as well as tools; and supercomputers can short-circuit Wall Street just as easily as they can manage your portfolio. One thing these technologies can't do is answer the profound moral issues they raise. Who should be held accountable when they go wrong? What responsibility do we, as creators and users, have for the technologies we build? In *A Dangerous Master*, ethicist Wendell Wallach tackles such difficult questions with hard-earned authority, imploring both producers and consumers to face the moral ambiguities arising from our rapid technological growth. There is no doubt that scientific research and innovation are a source of promise and productivity, but, as Wallach, argues, technological development is at risk of becoming a juggernaut beyond human control. Examining the players, institutions, and values lobbying against meaningful regulation of everything from autonomous robots to designer drugs, *A Dangerous Master* proposes solutions for regaining control of our technological destiny. Wallach's nuanced study offers both stark warnings and hope, navigating both the fears and hype surrounding technological innovations. An engaging, masterful analysis of the elements we must manage in our quest to survive as a species, *A Dangerous Master* forces us to confront the practical—and moral—purposes of our creations.

Human Rights along the U.S.–Mexico Border

Gendered Violence and Insecurity

University of Arizona Press Much political oratory has been devoted to safeguarding America's boundary with Mexico, but policies that militarize the border and criminalize immigrants have overshadowed the region's widespread violence against women, the increase in crossing deaths, and the lingering poverty that spurs people to set out on dangerous northward treks. This book addresses those concerns by focusing on gender-based violence, security, and human rights from the perspective of women who live with both violence and poverty. From the Pacific to the Gulf of Mexico, scholars from both sides of the 2,000-mile border reflect expertise in disciplines ranging from international relations to criminal justice, conveying a more complex picture of the region than that presented in other studies. Initial chapters offer an overview of routine sexual assaults on women migrants, the harassment of Central American immigrants at the hands of authorities and residents, corruption and counterfeiting along the border, and near-death experiences of border crossers. Subsequent chapters then connect analysis with solutions in the form of institutional change, social movement activism, policy reform, and the spread of international norms that respect human rights as well as good governance. These chapters show how all facets of the border situation—globalization, NAFTA, economic inequality, organized crime, political corruption, rampant patriarchy—promote gendered violence and other expressions of hyper-masculinity. They also show that U.S. immigration policy exacerbates the problems of border violence—in marked contrast to the border policies of European countries. By focusing on women's everyday experiences in order to understand human security issues, these contributions offer broad-based alternative approaches and solutions that address everyday violence and inattention to public safety, inequalities, poverty, and human rights. And by presenting a social and democratic international feminist framework to address these issues, they offer the opportunity to transform today's security debate in constructive ways.

Violence in Capitalism

Devaluing Life in an Age of Responsibility

U of Nebraska Press What, James Tyner asks, separates the murder of a runaway youth from the death of a father denied a bone-marrow transplant because of budget cuts? Moving beyond our culture's reductive emphasis on whether a given act of violence is intentional—and may therefore count as deliberate murder—Tyner interrogates the broader forces that produce violence. His uniquely geographic perspective considers where violence takes place (the workplace, the home, the prison, etc.) and how violence moves across space. Approaching violence as one of several methods of constituting space, Tyner examines everything from the way police departments map crime to the emergence of "environmental criminology." Throughout, he casts violence in broad terms—as a realm that is not limited to criminal acts and one that can be divided into the categories of "killing" and "letting die." His framework extends the study of biopolitics by examining the state's role in producing (or failing to produce) a healthy citizenry. It also adds to the new literature on capitalism by articulating the interconnections between violence and political economy. Simply put, capitalism (especially its neoliberal and neoconservative variants) is structured around a valuation of life that fosters a particular abstraction of violence and crime.

Guidelines for Preventing Workplace Violence for Health Care & Social Service Workers

Anthropologies of Cancer in Transnational Worlds

Routledge Cancer is a transnational condition involving the unprecedented flow of health information, technologies, and people across national borders. Such movement raises questions about the nature of therapeutic citizenship, how and where structurally vulnerable populations obtain care, and the political geography of blame associated with this disease. This volume brings together cutting-edge anthropological research carried out across North and South America, Europe, Africa and Asia, representing low-, middle- and high-resource countries with a diversity of national health care systems. Contributors ethnographically map the varied nature of cancer experiences and articulate the multiplicity of meanings that survivorship, risk, charity and care entail. They explore institutional frameworks shaping local responses to cancer and underlying political forces and structural variables that frame individual experiences. Of particular concern is the need to interrogate underlying assumptions of research designs that may lead to the naturalizing of hidden agendas or intentions. Running throughout the chapters, moreover, are considerations of moral and ethical issues related to cancer treatment and research. Thematic emphases include the importance of local biologies in the framing of cancer diagnosis and treatment protocols, uncertainty and ambiguity in definitions of biosociality, shifting definitions of patienthood, and the sociality of care and support.
