MERENSTEIN & GARDNER'S HANDBOOK OF NEONATAL INTENSIVE CARE - E-BOOK

AN INTERPROFESSIONAL APPROACH

Elsevier Health Sciences Co-authored by an interprofessional collaborative team of physicians and nurses, *Merenstein & Gardner's Handbook of Neonatal Intensive Care, 9th Edition* is the leading resource for interprofessional, collaborative care of critically ill newborns. It offers comprehensive coverage with a unique interprofessional collaborative approach and a real-world perspective that make it a practical guide for both nurses and physicians. The new ninth edition features a wealth of expanded content on delivery-room care: new evidence-based care "bundles"; palliative care in the NICU; interprofessional collaborative care of parents with depression, grief, and complicated grief; and new pain assessment tools. Updated high-quality references have also been reintegrated into the book, making it easier for clinicians to locate research evidence and standards of care with minimal effort. These additions, along with updates throughout, ensure that clinicians are equipped with the very latest clinical care guidelines and practice recommendations — all in a practical quick-reference format for easy retrieval and review. UNIQUE! Core author team of two physicians and two nurses gives this internationally recognized reference a true interprofessional collaborative approach that is unmatched by any other resource. Consistent organization within clinical chapters include Physiology/Pathophysiology, Etiology, Prevention, Data Collection (History, Signs and Symptoms, and Laboratory Data), Treatment/Intervention, Complications, and Parent Teaching sections. UNIQUE! Color-highlighted point-of-care clinical content makes high-priority clinical content quick and easy to find. UNIQUE! Parent Teaching boxes outline the relevant information to be shared with a patient's caregivers. Critical Findings boxes outline symptoms and diagnostic findings that require immediate attention to help the provider prioritize assessment data and steps in initial care. Case studies demonstrate how to apply essential content to realistic clinical scenarios for application-based learning. NEW! Updated content throughout reflects the latest evidence-based practice, national and international guidelines, and current protocols for interprofessional collaborative practice in the NICU. NEW! Up-to-date, high-quality references are now reintegrated into the text for quick retrieval, making it easier for clinicians to locate research evidence and standards of care with minimal effort. NEW! Expanded content on delivery-room care includes the impact of staffing on quality of care, delayed cord clamping, resuscitation, and more. NEW! Coverage of the new evidence-based care "bundles" keeps clinicians up to date on new guidelines that have demonstrated improved outcomes of very preterm infants. NEW! Coverage of new pain assessment tools equips NICU providers with essential resources for maintaining patient comfort. NEW! Expanded coverage of palliative care in the NICU provides the tools needed to ensure patient comfort. NEW! Expanded coverage of interprofessional collaborative care of parents with depression, grief, and complicated grief prepares clinicians for this essential area of practice.

MERENSTEIN & GARDNER'S HANDBOOK OF NEONATAL INTENSIVE CARE

Mosby This text examines the intensive care of the neonate, with emphasis on clinical practice, evidence-based decision making, and collaborative care.

CORE CURRICULUM FOR NEONATAL INTENSIVE CARE NURSING - E-BOOK

Elsevier Health Sciences Perfect as a resource in the field or for exam preparation, this authoritative reference from the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN) includes in-depth coverage of the most common neonatal disorders and their management. The concise outline format highlights the essentials of each condition including definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes to help you find important information quickly. This new edition also features an increased focus on evidence-based practice, new CAMTS and AAMS guidelines, new techniques for PICC placement, and changes to the Neonatal Resuscitation Program. All necessary information to prepare for the neonatal intensive care nursing certification examination is included. Concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate. Text provides a collaborative effort between the three most authoritative associations in neonatal intensive care nursing - AWHONN, AACN, and NANN. Information on families, ethics, legal issues, research, case management, and the transition to home acknowledge the full scope of neonatal nursing practice. NEW! CAMTS and AAMS guidelines, techniques for PICC placement, and changes to the Neonatal Resuscitation Program are just a few of the updates that reveal the importance the new edition places on safety practices and procedures. NEW! Updated chapter on Patient Safety includes selected improvement strategies and resources for neonatal nurses to build a patient safety toolkit, discusses TeamSTEPPS (Team Strategies and Tools to Enhance Performance and Patient Safety), and recognizes human issues, such as shift work and fatigue. NEW! Increased focus on evidence-based practice for preterm infants, medications, and antepartum-intrapartum complications sets the standard for neonatal nursing practice. NEW! Strategies to promote inclusionary care better reflect nursing care today by focusing on family-centered care, comprehensive perinatal records, health care teams in the NICU, and best practices in the care of the late preterm infant. NEW! Comprehensively revised chapter on Immunology identifies risk factors for infection associated with term and preterm infants, distinguishes clinical symptoms and therapies associated with TORCHES CLAP spectrum infections, and includes prevention strategies for hospital-acquired infections. NEW! Thoroughly updated content and references reflect currency and technologic advances. NEW! Refocused chapter on Developmental Care guides the nurse to use assessment within the context of the environment and situation to initiate interventions in the moment or use patterns of responses for developing plans of care and presents core measures on evaluating developmental care practices in the NICU.

COMPREHENSIVE NEONATAL NURSING CARE

FIFTH EDITION

Springer Publishing Company Print+CourseSmart

CLOHERTY AND STARK'S MANUAL OF NEONATAL CARE

Lippincott Williams & Wilkins Concise and easy to read, this popular manual has provided a practical approach to the diagnosis and medical management of problems in the newborn through seven outstanding editions. The Eighth Edition of Cloherty and Stark's Manual of Neonatal Care maintains that tradition of excellence, offering NICU physicians, neonatal-perinatal fellows, residents, and neonatal nurse practitioners quick access to key clinical information, fully updated to reflect recent advances in the field. Written in an easy-access outline format, this extensively revised edition covers current, practical approaches to the evaluation and management of routine and complex conditions encountered in the fetus and the newborn.

A MANUAL OF NEONATAL INTENSIVE CARE FIFTH EDITION

CRC Press Highly Commended, BMA Medical Book Awards 2014 The fifth edition of this highly successful and well-regarded book continues to provide those working in neonatal intensive care units with precise instructions on the diagnosis and management of common neonatal problems. This edition has been extensively updated and revised, while retaining the background physiology, key references, and diagrams that made previous editions so successful. Several new chapters have been added, including the subjects of fetal medicine, antenatal diagnosis, and obstetrics for the neonatologist. Using a clear, accessible style, this edition features discussions of evidence-based medicine and the introduction of additional easy-to-digest lists. The text has been made more internationally applicable, including a re-focus of the chapter on organization of neonatal care away from UK-specific admission criteria and more towards general reasons for admitting a baby to the intensive care ward. A Manual for Neonatal Intensive Care provides invaluable guidance for trainees in pediatrics, neonatology, and neonatal nursing and forms a useful ready-reference for the practicing pediatrician and nurse.

MANUAL OF NEONATAL SURGICAL INTENSIVE CARE

PMPH-USA The Manual of Surgical Neonatal Intensive Care addresses the interdisciplinary area of perioperative management of newborns with surgical conditions. These babies generally spend less than a day in the operating room, but require weeks, or even months of complex pre and post operative care that spans medical and surgical areas of expertise.

NEONATAL NURSING CARE HANDBOOK, THIRD EDITION

AN EVIDENCE-BASED APPROACH TO CONDITIONS AND PROCEDURES

Springer Publishing Company This benchmark handbook for neonatal nurse practitioners describes the most common conditions and procedures in an easy-to-access streamlined format. This thoroughly revised third edition continues to promote the foundational principles of evidence-based nursing practice worldwide, while taking the resources and requirements of different practice settings into account. It delivers updated information on trauma-informed care and offers new sections on parent perspectives about transition to home, neonatal opioid withdrawal syndrome (NOWS), and therapeutic hypothermia. Designed with a logical organization, *Neonatal Nursing Care Handbook, Third Edition* features brief narratives and plentiful illustrations and charts. This quick reference is easily used by English-as-second-language nurses and can be conveniently stored in a pocket for on-the-go referral. Part I uses a systems approach to address management of disorders related to each body system. All chapters include a brief definition of the neonatal problem, followed by diagnostic tests and labs. Part II encompasses special care considerations such as nutrition, surgical care, and palliative care. Part III discusses widely seen procedures and diagnostic tests, complete with lab values. Appendices contain additional useful content on weights and temperatures, common abbreviations, and pertinent web resources. New to the Third Edition: Addresses trauma-informed care Additional Content On: Generalized nursing care regarding respiratory, cardiovascular, gastrointestinal, renal, and hematologic/immune systems Bottle feeding Oral/Nasogastric/Gastrointestinal Tube Feedings Parent perspective on the transition home/primary care High frequency ventilation and new techniques Neonatal Abstinence Syndrome (NAS) and Neonatal Opioid Withdrawal (NOW) Total body cooling/therapeutic hypothermia Key Features: Written by neonatal nurses and other health professionals for neonatal nurses Assists neonatal nurses in making sound clinical decisions Provides streamlined, well-organized format for quick information retrieval Written in brief narratives supported by illustrations, diagrams, and flow charts Easily understandable to English-as-second-language nurses Covers diagnostic tests and lab values and includes medication guide

MANUAL OF NEONATAL CARE

Lippincott Williams & Wilkins This edition of the Manual of Neonatal Care has been completely updated and extensively revised to reflect the changes in fetal, perinatal, and neonatal care that have occurred since the sixth edition. This portable text covers current and practical approaches to evaluation and management of conditions encountered in the fetus and the newborn, as practiced in high volume clinical services that include contemporary prenatal and postnatal care of infants with routine, as well as complex medical and surgical problems. Written by expert authors from the Harvard Program in Neonatology and other major neonatology programs across the United States, the manual's outline format gives readers rapid access to large amounts of valuable information quickly. The Children's Hospital Boston Neonatology Program at Harvard has grown to include 57 attending neonatologists and 18 fellows who care for more than 28,000 newborns delivered annually. The book also includes the popular appendices on topics such as common NICU medication guidelines, the effects of maternal drugs on the fetus, and the use of maternal medications during lactation. Plus, there are intubation/sedation guidelines and a guide to neonatal resuscitation on the inside covers that provide crucial information in a quick and easy format.

A MANUAL OF NEONATAL INTENSIVE CARE

CRC Press Highly Commended, BMA Medical Book Awards 2014 The fifth edition of this highly successful and well-regarded book continues to provide those working in neonatal intensive care units with precise instructions on the diagnosis and management of common neonatal problems. This edition has been extensively updated and revised, while retaining the backgro

THE MICHIGAN MANUAL OF NEONATAL INTENSIVE CARE

Using an easy-to-follow outline style and filled with helpful tables and charts, this proven favorite was written to assist house officers, fellows, and nurses in day-to-day practice issues in neonatal intensive care. Extensively field-tested and highly practical, it truly provides everything you need to know to take care of very sick infants. Large hospitals with many rotating personnel will benefit by using one consistent source for handling problems in the NICU. Easy-to-read outline format provides clear guidelines on care in the NICU Comprehensive coverage in a handy white-coat-pocket size Evidence-based approach for all treatment recommendations Logical, step-by-step approach to major problems in the NICU Incorporates the latest technologic advances in neonatal care Content significantly updated throughout New chapters include Prenatal Diagnosis, Antepartum and Intrapartum Assessment, Multifetal Gestation, Grief and Bereavement, and Medical Informatics

CERTIFICATION AND CORE REVIEW FOR NEONATAL INTENSIVE CARE NURSING - E-BOOK

Elsevier Health Sciences Get ready for your neonatal intensive care nursing certification exam with the only review developed in collaboration with three leading nursing organizations! From AACN, AWHONN, and NANN, Certification and Core Review for Neonatal Intensive Care Nursing, 5th Edition prepares you for your examination with hundreds of high-quality study questions and realistic test simulation. Based on the latest test plans of the AACN's CCRN®-Neonatal exam and the NCC's Neonatal Intensive Care Nursing (RNC-NIC) exam, review questions cover the changes to the Core Curriculum and reflect the latest evidence, essential knowledge, and best practices. New to this edition are three new chapters and 225 completely new review questions. This powerful study tool offers unparalleled preparation for your certification exam! Endorsed by the three most authoritative associations in neonatal intensive care nursing: the American Association of Critical-Care Nurses (AACN); the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN); and the National Association of Neonatal Nurses (NANN). Realistic exam practice is offered through 675 total questions that mirror the certification exam content, the multiple-choice question format, and the distribution of content. Answers are provided for each question, accompanied by rationales and references, to enhance your understanding of the material. Online flexibility allows you to organize review questions and test format by your preferred examination, either the AACN or NCC. Online exam simulation — included free with each new copy of the book — mirrors the test-taking experience with an interactive, timed format. Customized study lets you choose whether to work through online questions in Study Mode or Examination Mode. Online remediation includes rationales for both correct and incorrect answers, and in-book remediation provides rationales for correct answers. A compact, portable size makes the book easier to study anytime, anywhere. 225 NEW review questions include 75 in the book and 150 additional online questions on the Evolve companion website. Thoroughly UPDATED review content reflects AACN's latest CCRN®-Neonatal exam and the NCC's latest Neonatal Intensive Care Nursing (RNC-NIC) exam, information in Core Curriculum for Neonatal Intensive Care Nursing, 5th Edition, and the newest evidence-based guidelines for neonatal critical care. NEW! Three new chapters include Grieving Process, Quality Improvement, and Facilitation of Learning. NEW focus on culturally sensitive care is included in an expanded Family Integration and Culturally Sensitive Care chapter. UPDATED rationales in the Answer Key are referenced to the most recent literature and evidence-based guidelines. Compatibility with iPads, iPhones, and other mobile devices allows online exam practice that is easy and convenient.

CORE CURRICULUM FOR NEONATAL INTENSIVE CARE NURSING E-BOOK

Elsevier Health Sciences Perfect as a resource in the field or for exam preparation, this authoritative reference from the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN) includes in-depth coverage of the most common neonatal disorders and their management. The concise outline format highlights the essentials of each condition including definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes to help you find important information quickly. Coverage of key content on the neonatal intensive care nursing certification exam prepares you for test success. Information on families, ethics, legal issues, research, case management, and the transition to home emphasizes the importance of total care of the neonatal patient and family. New and updated content on late preterm infants, neurologic disorders, and ventilatory strategies provide the latest information from the field for more effective patient outcomes.

PHYSICAL ASSESSMENT OF THE NEWBORN

A COMPREHENSIVE APPROACH TO THE ART OF PHYSICAL EXAMINATION, FIFTH EDITION

Springer Publishing Company Physical Assessment of the Newborn, 5th Edition, is a comprehensive text with a wealth of detailed information on the assessment of the newborn. This valuable and essential resource illustrates the principles and skills needed to gather assessment data systematically and accurately, and also provides a knowledge base for interpretation of this data. Coverage addresses: gestational assessment, neurologic assessment, neonatal history, assessment of the dysmorphic infant, and systemic evaluation of individual body systems, as well as key information on behavioral and pain assessment, including the use of specific tools with various groups ranging from term to extremely preterm infants. Numerous tables, figures, illustrations, and photos, many of them in full color, are a major strength that enhances the book's usefulness as a clinical resource. The text is an excellent teaching tool and resource for anyone who performs newborn examinations including nurses, neonatal and pediatric nurse practitioners, nurse-midwives, physicians and therapists. It can also serve as a core text for any program preparing individuals for advanced practice roles in neonatal care. KEY FEATURES: An authoritative and renowned text that comprehensively addresses all key aspects of newborn assessment Provides a well-ordered evaluation of individual body systems. Assists the practitioner in identifying infant state, behavioral clues, and signs of pain, facilitating individualized care. Comprehensively addresses the tremendous range of variation among newborns of different gestational ages. The content is amplified by numerous photos and illustrations, many in full color Includes Power Point slides and an Image Bank

MANUAL OF NEONATAL RESPIRATORY CARE

Springer Respiratory care is the largest overall component of neonatal intensive care, and the fifth edition of the Manual of Neonatal Respiratory Care is the leading bedside guide for all aspects of respiratory care in the neonatal intensive care unit. Its easy-to-read outline format is simple yet comprehensive and covers all aspects of lung disease in the newborn infant, including embryology, principles of mechanical ventilation, procedures and techniques, monitoring, devices, adjunctive therapies, management of respiratory illness, complications, outcomes, and related issues. The latest edition includes fully revised and updated information, coverage on new equipment and devices, and an expanded authorship to enhance its international appeal. The new edition also features two new co-editors, Dr. Mark Mammel and Dr. Anton Van Kaam, internationally recognized experts in the field who bring a fresh perspective to the manual. Divided into sixteen sections, the book begins with a section on lung development and maldevelopment, specifically covering the development of the respiratory system, malformations, deformations, disorders of the neonatal airway, and developmental lung anomalies. The second section reviews the principles of mechanical ventilation, with coverage on such topics as spontaneous breathing, oxygen therapy, oxygen toxicity, pulmonary mechanics, and ventilator parameters. The third section of the manual outlines procedures and techniques, including neonatal resuscitation, laryngoscopy and endotracheal intubation, and tracheostomy. The following section dives into the monitoring of the ventilated patient, specifically focusing on continuous monitoring techniques, clinical controversies in pulse oximetry, and echocardiography. The next section spotlights noninvasive ventilatory techniques, such as nasal interfaces, humidified high-flow nasal cannula therapy, and sustained inflation. The sixth section of the manual focuses on ventilatory modes and modalities, with coverage on intermittent mandatory ventilation, pressure support ventilation, and pressure control ventilation. The following section segues into high-frequency ventilation, reviewing general concepts, high-frequency jet ventilation, and high-frequency oscillatory ventilation. The eighth section centers around commonly used neonatal ventilators, such as the DRAEGER VN500 ventilator, the AVEA ventilator, and the Twinstream ventilator. The ninth section reviews adjunctive therapies, including hemodynamic support, nutritional support, the use of sedation and analgesia, inhaled nitric oxide therapy, and ECMO. The tenth section shifts gears to spotlight the management of common neonatal respiratory diseases, with chapters on mechanisms of respiratory failure, tissue hypoxia, respiratory distress syndrome, persistent pulmonary hypertension, and pulmonary hypoplasia/agensis among others. Section eleven reviews the etiology, pathogenesis, and management of bronchopulmonary dysplasia, as well as the long-term outcome of newborns with this chronic lung disease. The next section presents complications associated with mechanical ventilation, such as thoracic air leaks, neonatal pulmonary hemorrhage, and neurologic complications. The following two sections spotlights ethical, legal and other considerations, among them nursing care of the ventilated infant, long-term ventilator dependency, home ventilation, withdrawal of ventilatory support, and medical liability and risk management. The fifteenth section focuses on research and literature, with coverage on interpreting medical literature, data collection and assessment of respiratory outcomes, and contemporary classics in neonatal respiratory care. The final section presents ventilatory case studies. The text also features over 300 high-yield radiographic images, figures, tables, and algorithms.

NEONATAL INTENSIVE CARE NURSING

Routledge Thoroughly revised and updated, this new edition of Neonatal Intensive Care Nursing is a comprehensive, evidence-based text for nurses and midwives caring for sick newborn babies. Written by and for nurses, it concentrates on the common problems occurring within the neonatal intensive care unit. This user-friendly text will enable nurses to recognise, rationalise and remedy these problems using both a multi-systems and an evidence-based approach. Individual chapters include: Professional Development • Developmentally-focused Nursing Care • Resuscitation of the Newborn • Management of Thermal Stability • Management of Respiratory Disorders • Cardiovascular Management • Brain Injury in the Preterm Infant • Haematological Problems • Pain Management • Fluid and Electrolyte Balance • Nutritional management • Neonatal Infection • Diagnostic and Therapeutic Procedures • Neonatal Anaesthesia • Surgical Aspects of Neonatal Intensive Care • Neonatal Transport • Family Support • Ethics and Neonatal Nursing • Medication in the Newborn • Death and Dying in the Neonatal Unit It is essential reading for experienced nurses and midwives caring for sick newborn babies within the neonatal intensive care unit, for nurses undertaking qualifications in the specialism of neonatal nursing and for pre-registration students undertaking relevant modules or placements.

GUIDELINES FOR PERINATAL CARE

This guide has been developed jointly by the American Academy of Pediatrics and the American College of Obstetricians and Gynecologists, and is designed for use by all personnel involved in the care of

pregnant women, their foetuses, and their neonates.

MATERNAL CHILD NURSING CARE - E-BOOK

Elsevier Health Sciences Master the essentials of maternity and pediatric nursing with this comprehensive, all-in-one text! *Maternal Child Nursing Care, 7th Edition* covers the issues and concerns of women during their childbearing years and children during their developing years. It uses a family-centered, problem-solving approach to patient care, with guidelines supported by evidence-based practice. New to this edition is an emphasis on clinical judgment skills and a new chapter on children with integumentary dysfunction. Written by a team of experts led by Shannon E. Perry and Marilyn J. Hockenberry, this book provides the accurate information you need to succeed in the classroom, the clinical setting, and on the Next Generation NCLEX-RN® examination. Focus on the family throughout the text emphasizes the influence of the entire family in health and illness. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Information on victims of sexual abuse as parents and human trafficking helps you prepare to handle these delicate issues. Nursing Alerts highlight critical information that could lead to deteriorating or emergency situations. Guidelines boxes outline nursing procedures in an easy-to-follow format. Evidence-Based Practice boxes include findings from recent clinical studies. Emergency Treatment boxes describe the signs and symptoms of emergency situations and provide step-by-step interventions. Atraumatic Care boxes describe how to manage pain and provide competent care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, provide resources and guidance, and illustrate nursing care in a variety of settings. Patient Teaching boxes highlight important information nurses need to communicate to patients and families. Cultural Considerations boxes describe beliefs and practices relating to pregnancy, labor and birth, parenting, and women's health. Family-Centered Care boxes draw attention to the needs or concerns of families that you should consider to provide family-centered care.

OXFORD HANDBOOK OF NEONATOLOGY

Oxford University Press Now in its second edition, the *Oxford Handbook of Neonatology* is the essential user-friendly guide for all healthcare professionals involved in the care of newborns. Accessible, practical, and updated with the latest evidence, this is a key resource designed for use at the cot-side. Using guidance from the Royal College of Paediatrics and Child Health and including the most up to date NICE guidelines, the second edition of this handbook uses extensive diagrams and an easy-to-use format to cover good communication practice, neonatal emergencies and technical procedures. Fully updated and revised with expanded sections covering therapeutic hypothermia and developmental care amongst other advances in the field, the *Oxford Handbook of Neonatology* is a valuable and up-to-date guide to a rapidly evolving field. Taking a valuable family-centred approach to neonatal care, this is the essential resource for all healthcare professionals working with newborns, from the undergraduate medical student to the doctor on the ward.

MERENSTEIN & GARDNER'S HANDBOOK OF NEONATAL INTENSIVE CARE E-BOOK

Elsevier Health Sciences The leading resource for collaborative critical care for newborns, *Merenstein & Gardner's Handbook of Neonatal Intensive Care, 7th Edition* provides a multidisciplinary approach and a real-world perspective. It focuses on evidenced-based practice, with clinical directions in color for easy retrieval and review. Special features help you prioritize the steps in initial care, and provide a guide to sharing information with parents. With each chapter written jointly by both physicians and nurses, this book is comprehensive enough to suit the needs of the entire team in your neonatal intensive care unit. Unique! A multidisciplinary perspective is provided by an editorial team of two physicians and two nurses, and each chapter is written and reviewed by a physician and nurse team, so information mirrors the real-world experience in a neonatal intensive care unit. Unique! Clinical content is in color, so you can quickly scan through chapters for information that directly affects patient care. Unique! Parent Teaching boxes highlight the relevant information to be shared with a patient's caregivers. Critical Findings boxes outline symptoms and diagnostic findings that require immediate attention, helping you prioritize assessment data and steps in initial care. Coverage in clinical chapters includes pathophysiology and etiology, prevention, data collection, treatment, complications, outcomes, prognosis, and parent education. Expanded Neonatal Surgery chapter covers all of the most common procedures in neonatal surgery. Follow-up of the Neonatal Intensive Care Unit Infant chapter is expanded to include coverage of outcomes management and discharge planning. Streamlined references are updated to include only the most current or classic sources.

S.T.A.B.L.E. PROGRAM POST-RESUSCITATION PRE-TRANSPORT STABILIZATION CARE OF SICK INFANTS

Amer Academy of Pediatrics The STABLE Program is a neonatal education program that focuses on the post-resuscitation/pre-transport stabilization care of sick newborns. This learner manual serves as a student handbook for either self-study or instructor-led presentations. It includes more than 220 pages, illustrated in full color.

NEONATAL NURSE PRACTITIONER CERTIFICATION INTENSIVE REVIEW

FAST FACTS AND PRACTICE QUESTIONS

Springer Publishing Company The definitive certification review for exam success! Written by leading APRN neonatal educators and clinicians, this authoritative study guide delivers all the tools neonatal nurse practitioners need to pass the National Certification Corporation (NCC) certification exam and the Continuing Competency Assessment (CCA). User friendly and concise, this review's content mirrors that of the actual exam and is structured in accordance with the most updated test plan blueprint. This resource's numerous exam-style questions and answers with rationales included in each chapter help readers uncover gaps in their knowledge. This review synthesizes the knowledge required to pass the exam, saving the reader time and effort by omitting extraneous material. In addition to spotlighting essential content throughout the text, recommended references provide the reader with the option to seek out additional information as needed. Additional benefits include important information about the exam along with savvy study and test-taking tips. This review will ensure exam success for both new NNPs and those who are taking the CCA exam. KEY FEATURES Mirrors the format of the certification exam Concise outline format for easy access to essential content Written by leading NNP educators and clinicians Includes valuable study and test-taking tips Exam-style questions and answers with explanatory rationales Includes more than double the amount of questions on the exam, including a 175-question simulated practice exam Purchase includes digital access for use on most mobile devices or computers

MANUAL OF NEONATAL RESPIRATORY CARE

Springer Science & Business Media This popular book covers the "how-to" of the respiratory care of newborns in outline format. It includes case studies for self-review and is illustrated with high quality radiographic images, figures, tables, and algorithms. Written and edited by international experts, the Third Edition is a thorough update and remains a convenient source of practical information on respiratory physiology, exam techniques, tips for performing procedures, radiography, ventilation, pain management, transport, and discharge planning. Up-to-date clinical information from world experts Case studies Easy-to-consult outline format Condensed information about all of the major mechanical ventilators (e.g., modes, displays, and alarms) "The extent of coverage, easy readability, superb organization [and] ...practical pearls make [this book] worthwhile...simply a great bargain." --Journal of Perinatology (review of a previous edition)

POCKET BOOK OF HOSPITAL CARE FOR CHILDREN

GUIDELINES FOR THE MANAGEMENT OF COMMON CHILDHOOD ILLNESSES

World Health Organization The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Managem.

MATERNITY NURSING - REVISED REPRINT - E-BOOK

Elsevier Health Sciences Designed to meet the needs of today's students, *Lowdermilk's Maternity Nursing, 8th Edition — Revised Reprint* addresses the fundamentals of maternity nursing with a concise, focused presentation of the care of women during the childbearing years. Integrating considerations for family, culture, and health promotion into the continuum of care, it also addresses community-based care to emphasize that nursing care takes place in many settings. *Maternity Nursing* focuses on childbearing issues and concerns, including care of the newborn, as well as wellness promotion and management of common women's health problems. Critical thinking exercises present case studies of real-life situations and corresponding critical thinking questions to help you develop your analytical skills. NEW! A helpful appendix identifies text content that reflects the QSEN competencies — patient-centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, and informatics — to assist you in developing competencies to provide safe and effective nursing care. NEW! Focus on the family recognizes the nurse's need to integrate the family in the care of the mother and newborn and the importance of the role of the mother to the wellbeing of the family. NEW! Content updates throughout, including information on the late preterm infant and associated concerns such as feeding; guidelines on prioritization and delegation where relevant; and centering pregnancy, a new model of health care that brings women together in groups for their care. NEW! Evidence-based practice content focuses your attention on how to use current research to improve patient outcomes. NEW! Improved readability helps you learn more efficiently with shorter, more focused content discussions. NEW! 21st Century Maternity Nursing: Culturally Competent, Community Focused chapter combines introductory material, culture, and community into one chapter to help you focus on key content and concepts. NEW! Streamlined content highlights the most essential, need-to-know information.

NEONATAL CARE FOR NURSES AND MIDWIVES

PRINCIPLES FOR PRACTICE 2ND EDITION

Elsevier Health Sciences Written by neonatal nurses and midwives for nurses and midwives, the 2nd edition highlights the collaborative nature of neonatal care and the provision of individualised, developmentally and culturally appropriate, family-centred care. Spanning all neonatal care levels and considerations, across special care baby units (SCBU) and neonatal intensive care units (NICU), the text comprehensively addresses newborn screening, resuscitation, interdisciplinary teamwork, retrievals and transport; stabilisation of the high-risk newborn; legal and ethical issues; care of the normal newborn and end-of-life care in the neonatal unit. With an increased focus on the role of the midwife within the neonatal environment, the text is ideally suited to undergraduate nursing and midwifery students and as an introductory text for postgraduate neonatal intensive care specialisation. Key learning objectives emphasised Aligned to the Council of International Neonatal Nursing (COINN) Competency framework Nursing and midwifery-focused case studies provide the vital link between theory and practice Clinical practice and reflection boxes provide additional insights and knowledge Glossary demystifies complex neonatal concepts Test bank questions and journal articles allow the reader to test their knowledge An eBook included in all print purchases Additional resources on Evolve: eBook on VitalSource Instructor resources: Test bank Additional case studies Journal articles with questions Answer guide for test bank, case studies and journal articles & questions Weblinks Image bank Student resources: Test bank Additional case studies Journal articles with questions Weblinks Image bank Increased focus on international data, evidence-based research and exemplars for the principles

of best practice New chapters Care of the normal newborn Care of the neonate with congenital abnormality Extensively revised content on neonatal nutrition and fluid management

MATERNITY NURSING - E-BOOK

Elsevier Health Sciences A streamlined approach covers the fundamentals of maternity nursing! *Maternity Nursing, 8th Edition* focuses on the care of women during the childbearing years. Designed to meet the needs of today's students, the book offers a clear, readable style and a concise, focused presentation. It integrates an understanding of family, culture, and health promotion into the continuum of care, and coverage of community-based care emphasizes nursing care in many different settings. Not only does *Maternity Nursing* focus on childbearing issues and concerns, including care of the newborn, but it also addresses wellness promotion and the management of common women's health problems. The Evolve companion website includes useful study tools, including medical animations, video clips, a care plan builder, and NCLEX® exam-style review questions. A companion Evolve website includes student resources such as NCLEX® exam-style review questions, audio chapter summaries, a care plan builder, nursing skills, interactive case studies, video clips and animations, anatomy reviews, and an audio glossary with Spanish pronunciations. Unique! Nursing Alerts highlight critical information in providing care. Unique! Emergency boxes provide step-by-step procedures for pediatric and maternity emergencies. Unique! Cultural Considerations boxes discuss customs and beliefs of different cultures that may affect care for patients and families. Unique! Community Activity boxes provide maternal and newborn exercises to enhance care in local community settings. Unique! Nursing Process boxes identify information on major diseases and conditions. Patient Instructions for Self-Management boxes highlight the information nurses need to communicate to patients and families. Critical Thinking exercises are based on case studies of real-life situations. Coverage of nursing care management uses a framework of the five steps of the nursing process as well as a focus on collaborative care. Nursing care plans include specific guidelines and rationales for interventions.

HANDBOOK OF PERINATAL AND NEONATAL PALLIATIVE CARE

A GUIDE FOR NURSES, PHYSICIANS, AND OTHER HEALTH PROFESSIONALS

Springer Publishing Company The first resource of its kind, this authoritative handbook holistically addresses the multidimensional aspects of perinatal and neonatal palliative care. Written by an interprofessional team of renowned specialists, it is both a text and an evidencebased reference for all members of the palliative care team. This book helps individual team members forge interdisciplinary approaches to care, assess current programs, improve the quality of care, and tailor new models of care. Encompassing the perspectives of numerous multidisciplinary healthcare providers, the book underscores the unique aspects of perinatal and neonatal palliative care, with a focus on improving quality of life, as well as comfort at the end of life. It describes healthcare for neonates and pregnant mothers, care and support of the family, planning and decision-making, and effective support for grief and bereavement, addressing all palliative and neonatal care settings. Other chapters focus on the prenatal period after diagnosis of the expected baby's life-threatening condition. These include such topics as care of the mother, delivering devastating news, and advance care planning. Each chapter contains photos, figures, and/or tables and case studies with clinical implications and critical thinking questions. Also included is an extensive listing of relevant palliative care organizations. Paintings and poetry provide an artistic backdrop to the authors' inspiring words. Key Features: Addresses a growing need for specific provider resources in neonatal palliative care Covers the clinical and emotional aspects of palliative care for babies and their families Abundant resources for effective and compassionate family-centered care Case studies with critical thinking questions Accompanying video clips of healthcare and family interactions Supplemental image bank included

CERTIFICATION AND CORE REVIEW FOR NEONATAL INTENSIVE CARE NURSING - E-BOOK

Elsevier Health Sciences The only exam review for the two leading neonatal critical-care nursing certification examinations, *Certification and Core Review for Neonatal Intensive Care Nursing, 4th Edition* prepares you for your exam with realistic questions and test simulation. Based on the blueprints of the AACN's CCRN-Neonatal exam and the NCC's Neonatal Intensive Care Nursing (RNC-NIC) exam, review questions cover the information in Core Curriculum for Neonatal Intensive Care Nursing, 3rd Edition, and reflect essential knowledge, the latest evidence, and best practices. A total of 600 questions and answers with rationales are provided. Developed by the AACN, AWHONN, and NANN, this powerful review tool offers excellent preparation for your certification exam! This title includes additional digital media when purchased in print format. For this digital book edition, media content is not included. Endorsed by the three most authoritative associations in neonatal intensive care nursing: the American Association of Critical-Care Nurses (AACN); the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN); and the National Association of Neonatal Nurses (NANN). Answers are provided for each question, accompanied by rationales and references, to enhance your understanding of the material. Realistic exam practice is offered through questions that mirror the certification exam content, the multiple-choice question format, and the distribution of content. Updated questions reflect the information in Core Curriculum for Neonatal Intensive Care Nursing, 4th Edition, and the latest test plans by both AACN and NCC. Complete remediation includes rationales for both correct and incorrect answers. A compact, portable size makes the book easier to study anytime, anywhere.

NEONATAL CERTIFICATION REVIEW FOR THE CCRN AND RNC HIGH-RISK EXAMINATION

Jones & Bartlett Publishers Neonatal Certification Review for the CCRN and RNC High-Risk Examination is the essential guide for critical care nurses preparing for the Neonatal CCRN and the RNC High Risk exams. With an increasing number of hospitals seeking Magnet status, more critical care nurses will be required to get this certification. This unique review guide provides insight into the difference between the CCRN and RNC exams as well as information about the Low Risk Neonatal Intensive Care RNC. By learning through an effective question and answer format with rationale for all answers, critical care nurses will now be able to take the exams with confidence! Key features include: * Questions written in the style of the RNC exam * Explanation of the test plans for both the CCRN and RNC exams, including comparison in style and question presentation * Comprehensive questions and answers covering areas such as the cardiovascular system, neurology, and genetics * Information about test-taking strategies, exam registration, the Synergy model, and much more!

MANUAL OF NEONATAL CARE

Now in its Fourth Edition, *Manual of Neonatal Care* provides comprehensive yet concise advice about neonatal problems and disorders. Written by experts from Harvard's world-famous Joint Program in Neonatology, this Spiral(R) Manual covers the complete spectrum of perinatal-neonatal medicine, and furnishes detail sufficient for confident decision-making. Coverage begins with a section on maternal-fetal problems and concludes with appendices that provide drug information and lab values. The outline format makes it easy to quickly locate exactly the information needed. Numerous illustrations and more than 100 tables supplement the text. Written for daily consultation in both the neonatal intensive care unit and the well-baby nursery, *Manual of Neonatal Care, Fourth Edition* offers practical and time-saving information for all members of the neonatal care team.

MATERNAL CHILD NURSING CARE IN CANADA - E-BOOK

Elsevier Health Sciences Featuring the most accurate, current, and clinically relevant information available, *Perry's Maternal Child Nursing Care in Canada* combines essential maternity and pediatric nursing information in one text. Comprehensive coverage includes promotion of wellness and the care for persons experiencing common health concerns throughout the lifespan, care in childbearing, as well as the health care of children and child development in the context of the family. Health concerns, including physiological dysfunctions and special needs and illnesses, are also featured. This text provides a family-centred care approach that recognizes the importance of collaboration with families when providing care. Medication Alerts stress medication safety concerns for better therapeutic management. Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice. Research Focus boxes identify best practices by presenting evidence and how to apply the knowledge learned. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Clinical reasoning case studies offer you opportunities to test and develop your analytical skills and apply knowledge in various settings. Cultural Awareness boxes explore beliefs and practices about pregnancy, childbirth, parenting, women's health concerns, and caring for sick children. Evidence-Informed Practice boxes highlight findings that confirm effective practices or that identify practices with unknown, ineffective, or harmful effects. Emergency boxes alert you to emergency situations and guide you step-by-step through emergency procedures. Family-Centred Care boxes highlight the needs or concerns of families that you should consider in providing family-centred care. Guidelines boxes outline nursing procedures in an easy-to-follow format. Home Care boxes detail important information that you need to deliver care to patients and families in the home setting. Medication Guide boxes include key information about medications used in maternity and newborn care, including their indications, adverse effects, and nursing considerations. Patient Teaching boxes assist you in helping patients and families become involved in their own care with optimal outcomes.

MATERNAL-CHILD NURSING - E-BOOK

Elsevier Health Sciences Build your skills in the science and art of maternity and pediatric nursing! *Maternal-Child Nursing, 6th Edition* makes it easy to understand the essentials of women's health, maternity, and children's nursing care. It simplifies the steps of the nursing process and relates them to care, helping you develop clinical judgment skills and provide safe, effective care in evidence-based practice. This edition adds case studies preparing you for the new Next Generation NCLEX® examination. Best of all, active learning tools and features make it fun to master nursing concepts, offering plenty of opportunities to apply your knowledge to the practice setting. Nursing Care Plans help students apply the nursing process to plan individualized care in the most common maternity and pediatric situations. Clinical Reference sections in pediatrics chapters provide basic information on disorders and their related anatomy and physiology, differences in body systems between children and adults, commonly used drugs, lab values, diagnostic tests, and procedures. Clinical Judgment boxes highlight situations designed to test clinical judgment skills. Health Promotion boxes highlight information needed to perform a comprehensive assessment of well infants and children at various ages. Safety Alerts emphasize what is important to remember when providing safe and optimal quality care. Pathophysiology boxes present an illustrated overview of illnesses and how to manage them. Want to Know boxes provide teaching guidelines, including sample answers for questions that are likely to be asked or topics that need to be taught. Communication Cues offer practical tips for verbal and nonverbal communication with patients and families. Glossary at the end of the book gives students quick access to all key terms and definitions. NEW! Next Generation NCLEX® (NGN) examination-style case studies expose students to how content will be tested in the exam; case studies are either single-situation or unfolding studies. NEW! Updated Drug Guides summarize the latest information on medications.

MATERNITY NURSING CARE (BOOK ONLY)

Cengage Learning MATERNITY NURSING CARE, 2nd Edition delivers all of the core components of obstetrical nursing, along with in-depth study features to help you develop and enhance analytical skills. Starting with women's health issues and pregnancy care, the chapters progress through labor and childbirth, postpartum care, and newborn development, addressing the nursing considerations for both normal and high-risk scenarios where appropriate. Written from a nursing perspective, MATERNITY NURSING CARE, 2ND Edition emphasizes overall patient care as opposed to medical treatment alone, and illustrates the critical importance of fostering the nurse-patient relationship. MATERNITY NURSING CARE, 2ND Edition is also bound with a helpful StudyWARE™ online, which includes case studies, NCLEX-style review questions, videos, activities, a glossary, and many other features to help you meet and exceed the highest standards of obstetrical nursing care. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

NURSING THE HIGHLY DEPENDENT CHILD OR INFANT

A MANUAL OF CARE

John Wiley & Sons Nursing the Highly Dependent Infant or Child is an accessible and clinical guide to the caring for the acutely ill child. It provides guidance on the specific nursing skills required to care for children and infants who require a 'step up' level of care from those on the general paediatric ward or a 'step down' level of care on discharge from neonatal or paediatric critical care facilities. The book follows a general systems approach, covering themes such as respiratory care, renal care and cardiac care as well as covering specialities such as neuro-trauma, burns and transportation of the acutely ill infant or child. Other areas explored include pain and sedation, monitoring and meeting the nutritional needs of the highly dependent child. Each chapter provides an overview of relevant anatomy and physiology, guidance on assessment and monitoring, and outlines effective nursing care and management guidance of common conditions encountered in acute children's care.

COMPREHENSIVE NEONATAL NURSING CARE, SIXTH EDITION

Springer Publishing Company Praise for the Fifth Edition: "This book provides a complete look at neonatal healthcare delivery...[It] includes discussions of contemporary topics of interest, such as informatics, genetics, global health, and family-centered care, which are vital to providers caring for neonates today. The case studies and evidence-based practice dialogues provide great opportunities for further reflection. The book is useful to a wide audience in nursing, including undergraduate and graduate nursing students, practicing neonatal and pediatric nurses, and advanced practice nurses who care for neonates." Score: 92, 4 Stars--Doody's Medical Reviews The sixth edition of this acclaimed neonatal nursing text is completely updated to encompass the most current research findings and strategies for providing cost-effective and evidence-based care. It continues to address neonatal care from a physiologic and pathophysiologic perspective, with a major emphasis on nursing management at the bedside and advanced practice level. It examines each neonatal body system and describes evidence-based interventions that assist in understanding the 'why' behind various clinical presentations. Integrative management is threaded throughout the text along with extensive research findings to support practice strategies and rationales for sound clinical decision-making. Case studies, evidence-based practice boxes, QSEN competencies, and online resources help to amplify and reinforce content. New to the Sixth Edition: New technologies including neonatal health care simulation Trauma-Informed Care Substantial revisions to the Neonatal Resuscitation Program Updates in Continuous Quality Improvement Emphasis on neuroprotective factors Emerging global trends Genomics and its relationship to precision health prevention of diseases Maternal-Fetal Units Neonatal Abstinence Syndrome and maternal drug use Leadership and cost management of the NICU Updates on neonatal care protocols and procedures, new treatments, and new trends in family-centered integrative developmental care New palliative care protocols Video clips regarding parental caregiving Parent perspectives on care Podcasts from experts in the field Highlighted callouts for Emergency Alert, Quality and Safety Issues, and Family Concerns Key Features: Complete physiologic and embryologic foundation of each neonatal body system The relevance of various diagnostic tests Integrates quality and safety as per QSEN competencies Case studies, evidence-based practice boxes, parent handouts, and online resources Authored by internationally reputed "mother" of neonatal nursing Parent Voices provide new perspective on neonatal care

WONG'S ESSENTIALS OF PEDIATRIC NURSING: SECOND SOUTH ASIAN EDITION

Elsevier India Wong's Essentials of Pediatric Nursing: Second South Asian Edition

ESSENTIAL NEONATAL MEDICINE

John Wiley & Sons Providing a comprehensive yet concise guide for trainee doctors, neonatal nurses and midwives, Essential Neonatal Medicine continues to be an indispensable resource that combines the depth and breadth of a textbook with the efficiency of a revision guide. Extensively updated and full-colour throughout, this edition includes new chapters on neonatal transport and palliative care, as well as further content on pathophysiology and embryology, quality improvement and risk management, infection control, and non-invasive ventilation. With an improved artwork programme and a new glossary of terms, Essential Neonatal Medicine is ideal for all trainee health professionals new to neonatology, or looking for a comprehensive aid to support them.

FOUNDATION STUDIES FOR CARING

USING STUDENT-CENTRED LEARNING

Bloomsbury Publishing Supported by a companion skills volume and website, Foundation Studies for Caring is a comprehensive introductory text for all health professionals, which maps directly on to the key skills framework. Taking a student-centred learning and interprofessional approach, it is the most inclusive and engaging theory text in the market.
