STRATEGIES FOR SUSTAINABLE FINANCING OF SECONDARY EDUCATION IN SUB-SAHARAN AFRICA

World Bank Publications **Investment in secondary schooling in Sub-Saharan Africa** has been neglected since the World Conference on Education for All at Jomtien. The World Education Forum at Dakar began to recognize the growing importance of post-primary schooling for development. Only 25 percent of school-age children attend secondary school in the region--and fewer complete successfully, having consequences for gender equity, poverty reduction, and economic growth. As universal primary schooling becomes a reality, demand for secondary schools is increasing rapidly. Gaps between the educational levels of the labor force in Sub-Saharan Africa and other regions remain large. Girls are more often excluded from secondary schools than boys. Secondary schooling costs are high to both governments and households. This study explores how access to secondary education can be increased. Radical reforms are needed in low-enrollment countries to make secondary schooling more affordable and to provide more access to the majority currently excluded. The report identifies the rationale for increasing access, reviews the status of secondary education in Sub-Saharan Africa, charts the growth needed in different countries to reach different levels of participation, identifies the financial constraints on growth, and discusses the reforms needed to make access affordable. It concludes with a road map of ways to increase the probability that more of Africa's children will experience secondary schooling.

ANALYZING SCHOOL CONTEXTS

INFLUENCES OF PRINCIPALS AND TEACHERS IN THE SERVICE OF STUDENTS

IAP Analyzing School Contexts is the ninth volume in a series of research and theory in school administration dedicated to advancing our understanding of schools through empirical study and theoretical analysis. The current selection of readings is loosely organized around the broad topics of school contexts, leadership, and organizational properties that influence the effectiveness of schools. The book begins with a reflective analysis of the importance of organizational theories and theorizing in educational in administration and then proceeds to examine research on how leaders, especially principals, can strengthen the instructional and academic capacity of the school to enhance teachers' effectiveness in producing strong student outcomes. The analyses deal not only with what instructional leadership practices make positive differences in teaching and learning, but also with how district leadership is pivotal in developing school partnerships with business and how district mentoring programs to develop future school leaders succeed. Finally, we examine school climate, academic optimism of teachers, organizational trust, and the constraints and opportunities that the law provides to develop and maintain a respectful school environment conducive to learning.

SCHOOL EFFECTIVENESS AND IMPROVEMENT RESEARCH, POLICY AND PRACTICE

CHALLENGING THE ORTHODOXY?

Routledge This book provides a contemporary overview of school effectiveness and improvement. It charts the development theory and research in this area and looks at the contribution made to policy and practice. It also challenges some assumptions that have become ingrained into the theoretical and methodological traditions of the

field. By challenging these orthodoxies, it provides a framework that sets a new agenda and repositions the field to meet the emerging challenges of the twenty-first century. It argues that traditional measures of school effectiveness are challenged as systems have attempted to adapt to a complex range of emerging agendas. New theoretical perspectives are required which consider 'education' and a 'broader set of outcomes'. This shift requires a rethink of how effectiveness and improvement have been understood by the field, and a reconstruction by policy makers and practitioners. Attention must be given to promoting equity as well as effectiveness so that one school or student's gain no longer means another's loss. The field must develop new methodologies if inequities are to be challenged and a broader set of outcome measures are to be developed. The two questions guiding this book are: How can educational effectiveness and improvement research and practice support the development of a more equitable education service? What are the key indicators of educational effectiveness and improvement and what are the new methodologies required to facilitate a shift from 'school' effectiveness and improvement to 'educational' effectiveness and improvement? This book uses lenses of research, policy and practice to explore these key questions and articulate what such a repositioning may look like and how it may be achieved. It will prove invaluable for teachers, school leaders and anyone involved in policy and educational research.

MARKETS FOR SCHOOLING

AN ECONOMIC ANALYSIS

Routledge Nick Adnett and Peter Davies develop an economic analysis of schooling markets, emphasizing both the strengths and weaknesses of orthodox analyses. They explain the economic and social contexts that have generated the widespread desire to reform state schooling and develop a systematic analysis of the key policy components examining both theory and international evidence. The authors employ a unique framework based upon economic analysis that is informed by research performed by educationalists and other social scientists. Markets for Schooling is designed to be accessible and of interest to all researchers, administrators and policy-makers concerned with education and economics.

THE BUILDING SCHOOLS FOR THE FUTURE PROGRAMME

RENEWING THE SECONDARY SCHOOL ESTATE

The Stationery Office (BSF) programme believe that it is leading to more strategic procurement of school infrastructure than previous school building programmes. Local Authorities are using BSF to rearrange the location, type and number of schools in their area and create facilities and school environments which support their educational objectives. BSF schools are built to higher specifications and space standards than previous schools. The Department for Children, Schools and Families (DCSF) and Partnerships for Schools (the body established by DCSF to manage the BSF programme centrally) were too optimistic in their assumptions of how quickly the first schools could be delivered. By December 2008, only 42 of the planned 200 schools had been built, with 54 due to open next year and 121 the year after. To include all schools in the programme, 250 schools will need to be built a year and the number of schools in procurement and construction at any one time will need to double from 2011 onwards. The extent to which problems in the finance markets will affect BSF is still unclear. DCSF and Partnerships for Schools estimate that the total cost of renewing the school estate will be between £52 billion to £55 billion which is £7 billion to £10 billion more than was estimated at the outset of the programme.

THE INTERNATIONAL HANDBOOK OF EDUCATIONAL RESEARCH IN THE ASIA-PACIFIC REGION

[Springer Science & Business Media](#) **The aim of the Handbook is to present readily accessible, but scholarly sources of information about educational research in the Asia-Pacific region. The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region. In so doing, the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues. Moreover, since new problems and issues are constantly arising, the articles in the Handbook also indicate the likely directions of future developments. The different articles within the Handbook seek to conceptualize the problems in each specific content area under review, provide an integration of the research conducted within that area, the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified. Thus, the articles do not involve the reporting of newly conducted research, but rather require a synthesis of the research undertaken in a particular area, with reference to the research methods employed and the theoretical frameworks on which the research is based. In general, the articles do not advocate a single point of view, but rather, present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research. Furthermore, it should be noted, that the Handbook is not concerned with research methodology, and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region.**

A PLAN FOR EVALUATING THE DISTRICT OF COLUMBIA'S PUBLIC SCHOOLS

FROM IMPRESSIONS TO EVIDENCE

National Academies Press **The District of Columbia (DC) has struggled for decades to improve its public education system. In 2007 the DC government made a bold change in the way it governs public education with the goal of shaking up the system and bringing new energy to efforts to improve outcomes for students. The Public Education Reform Amendment Act (PERAA) shifted control of the city's public schools from an elected school board to the mayor, developed a new state department of education, created the position of chancellor, and made other significant management changes. A Plan for Evaluating the District of Columbia's Public Schools offers a framework for evaluating the effects of PERAA on DC's public schools. The book recommends an evaluation program that includes a systematic yearly public reporting of key data as well as in-depth studies of high-priority issues including: quality of teachers, principals, and other personnel; quality of classroom teaching and learning; capacity to serve vulnerable children and youth; promotion of family and community engagement; and quality and equity of operations, management, and facilities. As part of the evaluation program, the Mayor's Office should produce an annual report to the city on the status of the public schools, including an analysis of trends and all the underlying data. A Plan for Evaluating the District of Columbia's Public Schools suggests that D.C. engage local universities, philanthropic organizations, and other institutions to develop and**

sustain an infrastructure for ongoing research and evaluation of its public schools. Any effective evaluation program must be independent of school and city leaders and responsive to the needs of all stakeholders. Additionally, its research should meet the highest standards for technical quality.

It shows a 'big divide' separates these countries across the range of MDG economic, social and environmental indicators.

EUROPE'S LIFELONG LEARNING MARKETS, GOVERNANCE AND POLICY

USING AN INSTRUMENTS APPROACH

Springer Nature This book explores European governance and policy coordination within lifelong learning markets. Using an instruments approach, the editors and contributors examine the ways in which governance mechanisms employed by the European Union influence policy to regulate lifelong learning, and intervene in lifelong learning markets, at both European and national levels. Filling an important gap in the current literature, this book examines how strengthened policy coordination at the EU level contributed to the blurring of boundaries between policy fields and the redefinition of the function of adult education after the 2008 recession. Divided into three parts, this book draws on a range of case studies from countries including Spain, Denmark, Bulgaria and the UK. It will be of interest and value to students and scholars of education policy and governance, adult education and lifelong learning.

Narayana Murthy, Chairman and Chief Mentor Infosys Technologies Ltd. Information and communication technology (ICT) is rapidly evolving, changing rich and poor societies alike. It has become a powerful tool for participating in the global economy and for offering new opportunities for development efforts. ICT can and should advance economic growth and reduce poverty in developing countries. It has been 20 years since the first telephone operator was privatized, a little over 10 since the World Wide Web emerged, and 5 since the telecommunications bubble burst. How have the ICT sector and its role in development evolved? What have we learned? How can we move forward? Information and Communications for Development 2006: Global Trends and Policies contains lessons from both developed and developing countries. It examines the roles of the public and private sectors, identifying the challenges and the benefits of adopting and expanding ICT use. The report assesses topics essential to building an information society, including investment, access, diffusion, and country policies and strategies. Assessing what has worked, what hasn't, and why, this report is an invaluable guide for understanding how to capture the benefits of ICT around the world."
