The molecular, cellular, and tissue determinants of different tumours are discussed showing that each is a different disease, often corresponding to a particular developmental stage. The natural history of several cancers illustrates how clinical incidence can be just the visible part of the iceberg, while the first changes at the tissue level sometimes occur several years before tumour growth becomes manifest. Several mechanisms are proposed to explain the distribution of cancers during the human life span and the decline of the incidence of cancers during human senescence. *Build Your Own Search Engine Python Programming Series* Mirzal provides software you need to implement your own search engine. The EU's eastern expansion and economic globalization have reinforced competition on the one hand; on the other hand the importance of outsourcing and off-shoring has increased. Against this background the intensification of innovation dynamics becomes crucial - and with them the role of regional innovation clusters. The analysis examines seven regions and six EU countries. The focus is on cluster and network dynamics in both industries, as regional ICT clusters are playing an increasingly central role in many European regions. Specialization and structural change in the automotive sector are highlighted, and new strategic approaches for multinational companies and changes in policy options are identified. *Business Plans that Work: A Guide for Small Business 2/E* McGraw Hill Professional Turn your great idea into BIG PROFITS with a powerful, persuasive business plan! As a frequent monastic guest, he learned firsthand from the monks as they grew an incredibly successful portfolio of businesses. Service and selflessness are at the heart of the 1,500-year-old monastic tradition's remarkable business success. It is an ancient though immensely relevant economic model that preserves what is positive and productive about capitalism while transcending its ethical limitations and internal contradictions. Combining vivid case studies from his thirty-year business career with intimate portraits of the monks at work, Turak shows how Trappist principles can be successfully applied to a variety of secular business settings and to our personal lives as well. He demonstrates that monks and people like Warren Buffett are wildly successful not despite their high principles but because of them. Turak also introduces other "transformational organizations" that share the crucial monastic business strategies so critical for success. *Beyond the Big Ditch Politics, Ecology, and Infrastructure at the Panama Canal* MIT Press A historical and ethnographic study of the conflict between global transportation and rural development as the two intersect at the Panama Canal. In this innovative book, Ashley

Carse traces the water that flows into and out from the Panama Canal to explain how global shipping is entangled with Panama's cultural and physical landscapes. By following container ships as they travel downstream along maritime routes and tracing rivers upstream across the populated watershed that feeds the canal, he explores the politics of environmental management around a waterway that links faraway ports and markets to nearby farms, forests, cities, and rural communities. Carse draws on a wide range of ethnographic and archival material to show the social and ecological implications of transportation across Panama. The Canal moves ships over an aquatic staircase of locks that demand an enormous amount of fresh water from the surrounding region. Each passing ship drains 52 million gallons out to sea—a volume comparable to the daily water use of half a million Panamanians. Infrastructures like the Panama Canal, Carse argues, do not simply conquer nature; they rework ecologies in ways that serve specific political and economic priorities. Interweaving histories that range from the depopulation of the U.S. Canal Zone a century ago to road construction conflicts and water hyacinth invasions in canal waters, the book illuminates the human and nonhuman actors that have come together at the margins of the famous trade route. 2014 marks the 100th anniversary of the Panama Canal. Beyond the Big Ditch calls us to consider how infrastructures are materially embedded in place, producing environments with winners and losers. **Developing Supervisors and Team Leaders** Routledge Leaders and supervisors do not grow on trees; they must be developed. This logical two-part structure creates an excellent foundation upon which students can build their knowledge of the entire research process. David Levy's Guide to Observing Meteor Showers Cambridge University Press Introduction to observing meteors for both seasoned and budding astronomers. Design and Analysis of Clinical Nursing Research Studies Routledge This invaluable text on the design and analysis of clinical research studies explains the basis of experimental design and statistics in a way that is sensitive to the clinical context in which nurses work. It uses data from actual studies to illustrate how to: *design the study *use and select data *present research findings *use a computer for statistical analysis. The scope of the study designs and associated statistical techniques covered in the book allow both the beginning nurse researcher and the more seasoned professional nurse investigator to approach a research study with confidence and optimism. The authors show how qualitative data can be approached quantitatively, what the advantages of this are from the nursing viewpoint, and how quantitative methodology can help nurses to develop a common research language with other disciplines involved in patient care. Cognition, Education, and Communication Technology Routledge Cognition, Education, and Communication Technology presents some of the recent theoretical developments in the cognitive and educational sciences and implications for the use of information and communication technology (ICT) in the organization of school and university education. Internationally renowned researchers present theoretical perspectives with proposals for and evaluations of educational practices. Each chapter discusses different aspects of the use of ICT in education, including: *the role of perceptual processes in learning; *external cognition as support for interactive learning; *the role of meta-cognition; *simulation learning environments as cognitive tools; *the role of science controversy for knowledge integration; *the use of ICT in the development of educators; and *the role of narratives in education. ICT has great potential for revolutionizing education. Large investments of resources are being made, often without a strong understanding of how ICT will or should be implemented. The expectation is that students will show immediate improvements in terms of their motivation to learn and their learning achievements, but reality is different. Progress of ICT in education requires more than just computers in the classroom. It demands an understanding of the complex processes contributing to human learning and how they interact with new technologies. This text provides theoretical perspectives on the learning processes that can be used as a foundation for constructing pedagogically valuable tools based on ICT. The combination of results--from cognitive science and pedagogy, with more practically oriented suggestions for how ICT can be used in various forms of education--makes this book suitable for researchers and students in the cognitive and educational sciences, as well as for practitioners and planners of education. Bullying in the Workplace Causes, Symptoms, and Remedies Routledge Bullying in the workplace is a phenomenon that has recently intrigued researchers studying management and organizational issues, leading to such questions as why it occurs and what causes such harassment. This volume written by experts in a wide range of fields including Industrial and Organizational psychology, Counseling, Management, Law, Education and Health presents research on relational and social aggression issues which can result in lost productivity, employee turnover and costly lawsuits. Understanding this phenomenon is important to managers and employee morale.

Defeasibility in Philosophy Knowledge, Agency, Responsibility, and the Law Rodopi Defeasibility, most generally speaking, means that given some set of conditions A, something else B will hold, unless or until defeating conditions C apply. While the term was introduced into philosophy by legal philosopher H.L.A. Hart in 1949, today, the concept of defeasibility is employed in many different areas of philosophy. This volume for the first time brings together contributions on defeasibility from epistemology (Mikael Janvid, Klemens Kappel, Hannes Ole Matthiessen, Marcus Willaschek, Michael Williams), legal philosophy (Frederick Schauer) and ethics and the philosophy of action (Claudia Blöser, R. Jay Wallace, Michael Quante and Katarzyna Paprzycka). The volume ends with an extensive bibliography (by Michael de Araujo Kurth).

Cutting Tool Technology Industrial Handbook Springer Science & Business Media It is a well acknowledged fact that virtually all of our modern-day components and assemblies rely to some extent on machining operations in their manufacturing process. Thus, there is clearly a substantive machining requirement which will continue to be of prime importance for the foreseeable future. *Cutting Tool Technology* provides a comprehensive guide to the latest developments in the use of cutting tool technology. The book covers new machining and tooling topics such as high-speed and hard-part machining, near-dry and dry-machining strategies, multi-functional tooling, ‘diamond-like’ and ‘atomically-modified’ coatings, plus many others. Also covered are subjects important from a research perspective, such as micro-machining and artificial intelligence coupled to neural network tool condition monitoring. A practical handbook complete with troubleshooting tables for common problems, *Cutting Tool Technology* is an invaluable reference for researchers, manufacturers and users of cutting tools.
