IMMUNE INFERTILITY

IMPACT OF IMMUNE REACTIONS ON HUMAN FERTILITY

Springer This book offers comprehensive coverage of both basic and clinical aspects of immune reactions responsible for infertility. It has four sections focusing on Sperm antigens, Antisperm antibodies (ASAs), Clinical impact of ASAs, and Immune contraception, and include contributions from leading experts in these fields. This new edition of the book offers a comprehensive update that reflects the very significant advances in reproductive immunology that have been achieved over the past five years, especially related to the sperm proteome, sperm-egg binding/fusion proteins, gene knockout studies, and immunocontraception. Reproductive immunology continues to be a fast-growing discipline in which new knowledge is emerging almost every day. Immune Infertility is a model source of vital and reliable information on the latest scientific developments in the field. It will be of value for clinicians, scientists, students, residents, and fellows working in reproductive biology, obstetrics and gynecology, and urology.

HOW TO MAKE LOVE TO A PLASTIC CUP

A GUY'S GUIDE TO THE WORLD OF INFERTILITY

Harper Collins "A Guy's Guide to the World of Infertility," How to Make Love to a Plastic Cup is a light-hearted, laugh-out-loud funny, yet at the same time helpful and informative handbook to all things infertility-related written with the male wannabe babymaker in mind. Greg Wolf, who has "been there," delivers the goods in a humorous, direct way that every potential dad will love...and every hopeful mom will want to purchase for the often clueless man in her life.

CLINICAL MANAGEMENT OF MALE INFERTILITY

Springer This book provides andrologists and other practitioners with reliable, up-to-date information on all aspects of male infertility and is designed to assist in the clinical management of patients. Clear guidance is offered on classification of infertility, sperm analysis interpretation and diagnosis. The full range of types and causes of male infertility are then discussed in depth. Particular attention is devoted to poorly understood conditions such as

unexplained couple infertility and idiopathic male infertility, but the roles of diverse disorders, health and lifestyle factors and environmental pollution are also fully explored. Research considered stimulating for the reader is highlighted, reflecting the fascinating and controversial nature of the field. International treatment guidelines are presented and the role of diet and dietary supplements is discussed in view of their increasing importance. Clinicians will find that the book's straightforward approach ensures that it can be easily and rapidly consulted.

You will also find the author's personal recommendations for how to implement certain measures. Lastly, you will find a brief outline highlighting certain things you can do to modify your diet and lifestyle according to specific fertility challenges.

EDUCATION AND WOMEN EMPOWERMENT

Scientific e-Resources Education fills in as the conductor by which women, since quite a while ago established in the private circle, move into people in general circle and declare themselves on an equivalent premise with men. As a springboard to business and monetary freedom, advocates say, education gives the basic establishment from which encourage strengthening streams. It is in this setting the present paper tries to discover the connection between imbalance in education and women strengthening. To discover the effect of disparity in education on different parameters, a relationship framework has been computed. To know the level of women strengthening in different parts of the world, the factors like female offer in national parliament, level of female education and female work drive support rate has taken. Engaging women through education has turned into a best need of worldwide advancement endeavors. Erin Murphy-Graham draws on over a time of subjective research to look at the encounters of Juanita and eighteen other women who took part in the SAT program. Their stories propose the straightforward yet unpretentious ways education can start the strengthening procedure, and additionally the part of men and young men in advancing sexual orientation correspondence.

RECURRENT PREGNANCY LOSS

John Wiley & Sons Recurrent Pregnancy Loss Edited by Ole B Christiansen, MD, D.M.Sc., Rigshospitalet, Copenhagen and Aalborg University Hospital, Aalborg, Denmark Recurrent Pregnancy Loss is a silent problem for many women The spontaneous loss of a pregnancy in the first 22 weeks is often not recorded as the mother needed no medical or surgical treatment. Women who repeatedly suffer this tragedy can go unheard as a result. Gynecologists can feel unable to help. But they can help. Research is showing how to identify women who suffer recurrent pregnancy loss and which treatments might prevent a further recurrence. Gynecologists are learning how to monitor subsequent pregnancies for the early signals of problems. Recurrent Pregnancy Loss provides a practical approach to this hidden clinical challenge. The highly experienced, international author team explores: How to obtain a relevant history Which investigations to order The physiological reasons behind recurrent pregnancy loss The best approach to treatment How to monitor patients in subsequent pregnancies Clinical in approach, practical in execution, with the patient at the centre, Recurrent Pregnancy Loss guides you as you support your patients.

IMMUNOLOGY OF RECURRENT PREGNANCY LOSS AND IMPLANTATION FAILURE

Academic Press Immunology of Recurrent Pregnancy Loss provides doctors and immunologists with the information they need to help couples who experience recurrent pregnancy losses. Sections cover unexplained infertility, repeated in vitro fertilization, embryo transfer failures, history of second or third trimester pregnancy losses of unknown cause,

or pregnancy with a history of or active autoimmune and/or alloimmune disease. Reproductive failure (RF), including recurrent pregnancy losses (RPL) and repeated implantation failures (RIF) is rather a syndrome than a disease caused by multiple etiologies, such as anatomical, endocrine, genetic, infectious, immunological, thrombotic and unexplained etiologies, hence this book strives to present the latest information. In 27 chapters, divided in 5 sections, the book introduces the current update of reproductive immunology topics in RF and provides systematic diagnostic guidelines, systemic and immune etiologies and therapeutic approaches. Provides detailed immunological background for understanding the etiology and management of reproduction failure Evaluates various immunological factors involved in the pathogenesis and management of reproduction failure Gives insights into various immunological and therapeutic approaches for reproduction failure

IS YOUR BODY BABY-FRIENDLY?

UNEXPLAINED INFERTILITY, MISCARRIAGE AND IVF FAILURE - EXPLAINED AND TREATED

Ajr Pub Llc According to this reference from a leading authority who has worked with more than 7,000 couples, women who have experienced difficulty conceiving or multiple miscarriages may be suffering from treatable dysfunctions of their immune systems. Providing details that are both technical and accessible, this book explains how chemical therapy can temporarily regulate immune responses that might otherwise unleash natural killer cells. Sections cover the most common and adverse immune problems, including tissue compatibility, blood clotting defects, and antibodies that fight sperm, fetal cells, hormones, and neurotransmitters, and also outline clinical protocol for comprehensive immune testing. The discussion incorporates the author's own dramatic account of his clinical breakthroughs, the rejection of his ideas by mainstream medical practitioners, and his research showing that failed in vitro fertilization (IVF), infertility, and repeated miscarriages are often the result of abnormal immune reactions.

IMMUNOLOGY OF PREGNANCY 2013

Bentham Science Publishers Since a September, 1992, Nature article which read: “Can there be life without LIF?”, researchers now realize that the maternal immune system is both a foe (it can reject the conception) and a friend (immune cells and molecules are also necessary for successful pregnancy). Leukemia Inhibitory Factor (LIF) when absent, prevents embryo implantation in rodents. From fecundation to parturition, immunity acts as a Janus, required but potentially dangerous. However, the complexity and the diversity of immunity in pregnancy deters many from entering the field. This book will try to give a complete overview of immunity from gametes till parturition, in brief, but with complete chapters and subsections, each written by specialists in the field. The importance of the topic relies not only on “the riddle of the fetal allograft”, which is per se fascinating, but on its consequences, linked to the development of IVF and in general, Assisted Reproductive Technologies (ART) / Medicine. Since the discovery that there would not be (mammalian) life without LIF, it has become clear that Immune Molecules, and in general, transient post mating inflammatory reactions are required for successful implantation. Disruptions of this process can lead to implantation failure / sterility. In later stages of pregnancy immunological cells, mostly of the innate immune system, control formation of local spiral arteries. Finally, a state of tolerance establishes itself, whose “break’ leads to immune abortion and the vascular bed is further transformed and enlarged, till delivery, and here again “immunological cytokines” do play a major role and can eventually cause immune mediated abortion. Failure of, not just, the cytokine and cell recognition mediated dialogue, but also the pre and peri-implantation “preparation of the uterus”, as stated, leads to sterility, early pregnancy loss and recurrent abortions. There is also an increasingly stronger argument to implicate immunology in pre-eclampsia. Further still, immunology is also implicated in the control of local infection, mother to child transmission of pathogens (notably, but not limited to, HIV). Finally, pregnancy is the only known physiological phenomenon where the once named “suppressor T cells,” re-emerge as “regulatory T cells”, and play a

cardinal role. This E-book provides a complete compendium of gynecological immunology, spanning from fecundation to delivery. Topics also include the role of various cell types (such as T regs ad NK cells) in implantation and uterine changes as well as the genetic regulation of immunological processes. As such it will be of interest not only to fundamental and reproductive immunologists, but more importantly, clinicians in obstetrics and gynecology.
