THE HEALTH EFFECTS OF CANNABIS AND CANNABINOIDS

THE CURRENT STATE OF EVIDENCE AND RECOMMENDATIONS FOR RESEARCH

National Academies Press Significant changes have taken place in the policy landscape surrounding cannabis legalization, production, and use. During the past 20 years, 25 states and the District of Columbia have legalized cannabis and/or cannabidiol (a component of cannabis) for medical conditions or retail sales at the state level and 4 states have legalized both the medical and recreational use of cannabis. These landmark changes in policy have impacted cannabis use patterns and perceived levels of risk. However, despite this changing landscape, evidence regarding the short- and long-term health effects of cannabis use remains elusive. While a myriad of studies have examined cannabis use in all its various forms, often these research conclusions are not appropriately synthesized, translated for, or communicated to policy makers, health care providers, state health officials, or other stakeholders who have been charged with influencing and enacting policies, procedures, and laws related to cannabis use. Unlike other controlled substances such as alcohol or tobacco, no accepted standards for safe use or appropriate dose are available to help guide individuals as they make choices regarding the issues of if, when, where, and how to use cannabis safely and, in regard to therapeutic uses, effectively. Shifting public sentiment, conflicting and impeded scientific research, and legislative battles have fueled the debate about what, if any, harms or benefits can be attributed to the use of cannabis or its derivatives, and this lack of aggregated knowledge has broad public health implications. The Health Effects of Cannabis and Cannabinoids provides a comprehensive review of scientific evidence related to the health effects and potential therapeutic benefits of cannabis. This report provides a research agendaâ€œoutlining gaps in current knowledge and opportunities for providing additional insight into these issuesâ€œthat summarizes and prioritizes pressing research needs.

THERAPEUTIC USES OF CANNABIS

CRC Press At the last Annual Representative Meeting of the British Medical Association a motion was passed that `certain additional cannabinoids should be legalized for wider medicinal use." This report supports this landmark statement by reviewing the scientific evidence for the therapeutic use of cannabinoids and sets the agenda for change. It will be welcomed by those who believe that cannabinoids can be used in medical treatment. The report discusses in a clear and readable form the use and adverse effects of the drug for nausea, multiple sclerosis, pain, epilepsy, glaucoma, and asthma.

MEDITATIONS FOR WOMEN

*Jane Powell Tens of thousands of women have turned to Jane Powell's Meditations for Women Web site for guidance (www.meditationsforwomen.com). Now, a year's worth of Jane's best meditations in a purse-size book that you can carry with you wherever you go. In this book of wisdom, you'll feel empowered to live your life to your fullest potential. With each of the 366 daily meditations you will learn new ways of viewing familiar, everyday situations, and discover tools to transform those situations into opportunities and personal growth. * Improve self-esteem and confidence * Overcome fears holding you back * Break emotional bad habits * Enjoy loving relationships * Recognize your self-worth * Effortlessly set your boundaries * Let go of past hurts * Reach your most cherished goals * and much, much more!*

AMERICAN PSYCHIATRIC ASSOCIATION PRACTICE GUIDELINES

American Psychiatric Publishing The aim of the American Psychiatric Association Practice Guideline series is to improve patient care. Guidelines provide a comprehensive synthesis of all available information relevant to the clinical topic. Practice guidelines can be vehicles for educating psychiatrists, other medical and mental health professionals, and the general public about appropriate and inappropriate treatments. The series also will identify those areas in which critical information is lacking and in which research could be expected to improve clinical decisions. The Practice Guidelines are also designed to help those charged with overseeing the utilization and reimbursement of psychiatric services to develop more scientifically based and clinically sensitive criteria.

HEAVY WORK INVESTMENT

ITS NATURE, SOURCES, OUTCOMES, AND FUTURE DIRECTIONS

Routledge The book deals with the concept of Heavy Work Investment (HWI) recently initiated by Snir and Harpaz. Since its introduction the interest in the general HWI model has increased considerably. The book illustrates the development of HWI conceptualization, theory, and research. It deals with the foremost HWI subtype of workaholism. However, it also compares workaholism as a "negative" HWI subtype with work devotion/passion/engagement, as a "positive" HWI subtype. Most importantly, it addresses HWI in general, including its possible situational subtypes. In view of Snir and Harpaz's claim that the study of situational heavy work investors is relatively scarce, this certainly constitutes a promising step in the right direction. Finally, it deals with timely and important topics examined by prominent international researchers on Heavy Work Investment and such issues as: personality factors of workaholism, work-life balance, cross-cultural similarities and differences in HWI, work addiction and technology, HWI and retirement, and intergenerational similarity in work investment.

SELF-REGULATED LEARNING AND ACADEMIC ACHIEVEMENT

THEORETICAL PERSPECTIVES

Routledge This volume brings together internationally known researchers representing different theoretical perspectives on students' self-regulation of learning. Diverse theories on how students become self-regulated learners are compared in terms of their conceptual origins, scientific form, research productivity, and pedagogical effectiveness. This is the only comprehensive comparison of diverse classical theories of self-regulated learning in print. The first edition of this text, published in 1989, presented descriptions of such differing perspectives as operant, phenomenological, social learning, volitional, Vygotskian, and constructivist theories. In this new edition, the same prominent editors and authors reassess these classic models in light of a decade of very productive research. In addition, an information processing perspective is included, reflecting its growing prominence. Self-regulation models have proven especially appealing to teachers, coaches, and tutors looking for specific recommendations regarding how students activate, alter, and sustain their learning practices. Techniques for enhancing these processes have been studied with considerable success in tutoring sessions, computer learning programs, coaching sessions, and self-directed practice sessions. The results of these applications are discussed in this new edition. The introductory chapter presents a historical overview of research and a theoretical framework for comparing and contrasting the theories described in the following chapters, all of which follow a common organizational format. This parallel format enables the book to function like an authored textbook rather than a typical edited volume. The final chapter offers an historical assessment of changes in theory and trends for future research. This volume is especially relevant for students and professionals in educational psychology, school psychology, guidance and counseling, developmental psychology, child and family development, as well as for students in general teacher education.

WHO GUIDELINES ON HAND HYGIENE IN HEALTH CARE

FIRST GLOBAL PATIENT SAFETY CHALLENGE : CLEAN CARE IS SAFER CARE

World Health Organization The WHO Guidelines on Hand Hygiene in Health Care provide health-care workers (HCWs), hospital administrators and health authorities with a thorough review of evidence on hand hygiene in health care and specific recommendations to improve practices and reduce transmission of pathogenic microorganisms to patients and HCWs. The present Guidelines are intended to be implemented in any situation in which health care is delivered either to a patient or to a specific group in a population. Therefore, this concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants. Definitions of health-care settings are proposed in Appendix 1. These Guidelines and the associated WHO Multimodal Hand Hygiene Improvement Strategy and an Implementation Toolkit (<http://www.who.int/gpsc/en/>) are designed to offer health-care facilities in Member States a conceptual framework and practical tools for the application of recommendations in practice at the bedside. While ensuring consistency with the Guidelines recommendations, individual adaptation according to local regulations, settings, needs, and resources is desirable. This extensive review includes in one document sufficient technical information to support training materials and help plan implementation strategies. The document comprises six parts.

AT A CROSSROADS

HIGHER EDUCATION IN LATIN AMERICA AND THE CARIBBEAN

World Bank Publications "Higher education in Latin America and the Caribbean has expanded dramatically in the past 15 years, as the average gross enrollment rate has more than doubled, and many new institutions and programs have been opened. Although higher education access has become more equitable, and higher education supply has become more varied, many of the 'new' students in the system are, on average, less academically ready than are their more advantaged counterparts. Furthermore, only half of higher education students, on average, complete their degree, and labor market returns to higher education vary greatly across institutions and programs. Thus, higher education is at a crossroads today. Given the region's urgency to raise productivity in a low-growth, fiscally constrained environment, going past this crossroads requires the formation of skilled human capital fast and efficiently. 'At a Crossroads: Higher Education in Latin America and the Caribbean' contributes to the discussion by studying quality, variety, and equity of higher education in Latin America and the Caribbean. The book presents comprehensive evidence on the recent higher education expansion and evolution of higher education labor market returns. Using novel data and state-of-the-art methods, it studies demand and supply drivers of the recent expansion. It investigates the behavior of institutions and students and explores the unintended consequences of large-scale higher education policies. Framing the analysis are the singular characteristics of the higher education market and the market segmentation induced by the variety of students and institutions in the system. At this crossroads, a role emerges for incentives, information, accountability, and choice."

BOOKDOWN

AUTHORING BOOKS AND TECHNICAL DOCUMENTS WITH R MARKDOWN

CRC Press bookdown: *Authoring Books and Technical Documents with R Markdown* presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

THE ALADDIN FACTOR

HOW TO ASK FOR WHAT YOU WANT--AND GET IT

Penguin Learn how to get everything you want with this motivational book from the #1 New York Times bestselling authors of the *Chicken Soup for the Soul* series. Anything is possible...if you dare to ask! Personal happiness. Creative fulfillment. Professional success. Freedom from fear—and a new promise of joy that's yours for the asking. We have the ability at our fingertips to achieve these things. It's the Aladdin Factor: the magical wellspring of confidence, desire—and the willingness to ask—that allows us to make wishes come true. Now bestselling motivational authors Jack Canfield and Mark Victor Hansen introduce us to the Aladdin Factor—and help us put it into effect in our own lives. The Aladdin Factor helps us by pinpointing the major stumbling blocks to asking—and teaching simple techniques to overcome them. With inspirational stories about people who have succeeded by asking for what they want, this book shows us how to turn our lives around—no matter what kind of obstacles we face. And with this knowledge, we can reap the riches of a truly well-lived life—a treasure that comes not from an enchanted lamp, but from the heart.

ISLAMIC LIBERATION THEOLOGY

RESISTING THE EMPIRE

Routledge This book is a radical piece of counter-intuitive rethinking of the clash of civilizations theory and global politics. In this richly detailed criticism of contemporary politics, Hamid Dabashi argues that after 9/11 we have not seen a new phase in a long running confrontation between Islam and the West, but that such categories have in fact collapsed and exhausted themselves. The West is no longer a unified actor and Islam is ideologically depleted in its confrontation with colonialism. Rather we are seeing the emergence of the US as a lone superpower, and a confrontation between a form of imperial globalized capital and the rising need for a new Islamic theodicy. The combination of political salience and theoretical force makes *Islamic Liberation Theology* a cornerstone of a whole new generation of thinking about political Islamism and a compelling read for anyone interested in contemporary Islam, current affairs and US foreign policy. Dabashi drives his well-supported and thoroughly documented points steadily forward in an earnest and highly readable style.

DINOPHYSIS TOXINS: DISTRIBUTION, FATE IN SHELLFISH AND IMPACTS

MDPI Several species of *Dinophysis* produce one or two groups of lipophilic toxins: okadaic acid (OA) and its derivatives; or the dinophysistoxins (DTXs) (also known as diarrhetic shellfish poisons or DSP toxins) and pectenotoxins (PTXs). DSP toxins are potent inhibitors of protein phosphatases, causing gastrointestinal intoxication in consumers of contaminated seafood. Forty years after the identification of *Dinophysis* as the causative agent of DSP in Japan, contamination of filter feeding shellfish exposed to *Dinophysis* blooms is recognized as a problem worldwide. DSP events affect public health and cause considerable losses to the shellfish industry. Costly monitoring programs are implemented in regions with relevant shellfish production to prevent these socioeconomic impacts. Harvest closures are enforced whenever toxin levels exceed regulatory limits (RLs). *Dinophysis* species are kleptoplastic dinoflagellates; they feed on ciliates (*Mesodinium* genus) that have previously acquired plastids from cryptophycean (genera *Teleaulax*, *Plagioselmis*, and *Geminigera*) nanoflagellates. The interactions of *Dinophysis* with different prey regulate their growth and toxin production. When *Dinophysis* cells are ingested by shellfish, their toxins are partially biotransformed and bioaccumulated, rendering the shellfish unsuitable for human consumption. DSP toxins may also affect shellfish metabolism. This book covers diverse aspects of the abovementioned topics—from the laboratory culture of *Dinophysis* and the kinetics of uptake, transformation, and depuration of DSP toxins in shellfish to *Dinophysis* population dynamics, the monitoring and regulation of DSP toxins, and their impact on the shellfish industry in some of the aquaculture regions that are traditionally most affected, namely, northeastern Japan, western Europe, southern Chile, and New Zealand.

6TH INTERNATIONAL CONFERENCE ON THE CONSERVATION OF EARTHEN ARCHITECTURE

ADOBE 90 PREPRINTS

Getty Publications On October 14-19, 1990, the 6th International Conference on the Conservation of Earthen Architecture was held in Las Cruces, New Mexico. Sponsored by the GCI, the Museum of New Mexico State Monuments, ICCROM, CRATerre-EAG, and the National Park Service, under the aegis of US/ICOMOS, the event was organized to promote the exchange of ideas, techniques, and research findings on the conservation of earthen architecture. Presentations at the conference covered a diversity of subjects, including the historic traditions of earthen architecture, conservation and restoration, site preservation, studies in consolidation and seismic mitigation, and examinations of moisture problems, clay chemistry, and microstructures. In discussions that focused on the future, the application of modern technologies and materials to site conservation was urged, as was using scientific knowledge of existing structures in the creation of new, low-cost, earthen architecture housing.

PRACTICE GUIDELINE FOR THE TREATMENT OF PATIENTS WITH MAJOR DEPRESSIVE DISORDER

Amer Psychiatric Pub Incorporated This manual provides the American Psychiatric Association's guidelines for the treatment of patients with major depressive disorder. It is divided into three sections, covering treatment recommendations; background information and review of available evidence; and future research needs. It seeks to summarize the specific forms of somatic, psychotherapeutic, psychosocial and educational treatments that have been developed to deal with major depressive disorder.

MEASURING ARTHROPOD BIODIVERSITY

A HANDBOOK OF SAMPLING METHODS

Springer Nature This book brings together a wide range of sampling methods for investigating different arthropod groups. Each chapter is organised to describe and evaluate the main sampling methods (field methods, materials and supplies, sampling protocols, effort needed, and limitations); in addition, some chapters describe the specimen preparation and conservation, species identification, data collection and management (treatment, statistical analysis, interpretation), and ecological/conservation implications of arthropod communities. The book aims to be a reference for zoologists, entomologists, arachnologists, ecologists, students, researchers, and for those interested in arthropod science and biodiversity. We hope the book will contribute to advance knowledge on field assessments and conservation strategies. Arthropods represent the most speciose group of organisms on Earth, with a remarkable number of species and interactions still to be described. These invertebrates are recognized for playing key ecological roles in terrestrial, freshwater and marine ecosystems. Because of the increasing and relentless threats arthropods are facing lately due to a multitude of human induced drivers, this book represents an important contribution to assess their biodiversity and role in ecosystem functioning and generation of ecosystem services worldwide.

A FRESH LOOK AT ANXIETY DISORDERS

BoD - Books on Demand This book, the ideal following of the previous *New Insights into Anxiety Disorders*, collects papers of a number of clinical psychiatrists all over the world, giving their contribution to the comprehension and clinical management of anxiety disorders. Following the previously edited book on anxiety, this new one will focus on some specific clinical issues such as PTSD, psychosomatics, and complementary approaches to anxiety management themes which were not discussed in the previous book.

SINGLE CASE EXPERIMENTAL DESIGNS

STRATEGIES FOR STUDYING BEHAVIOR CHANGE

Allyn & Bacon

DEGROWTH IN MOVEMENT(S)

EXPLORING PATHWAYS FOR TRANSFORMATION

John Hunt Publishing Degrowth is an emerging social movement that overlaps with proposals for systemic change such as anti-globalization and climate justice, commons and transition towns, basic income and Buen Vivir. Degrowth in Movement(s) reflects on the current situation of social movements aiming at overcoming capitalism, industrialism and domination. The essays ask: What is the key idea of the respective movement? Who is active? What is the relation with the degrowth movement? What can the degrowth movement learn from these other movements and the other way around? Which common proposals, but also which contradictions, oppositions and tensions exist? And what alliances could be possible for broader systemic transformations? Corinna Bukhart, Matthias Schmelzer, and Nina Treu have curated an impressive demonstration that there are, beyond regressive neoliberalism and techno-fixes, emancipatory alternatives contributing to a good life for all. Degrowth in Movement(s) explores this mosaic for social-ecological transformation - an alliance strengthened by diversity.

DAD, HOW DO I?

PRACTICAL "DADVICE" FOR EVERYDAY TASKS AND SUCCESSFUL LIVING

HarperCollins From the host of the YouTube channel that went viral—Dad, How Do I?—comes a book that's part memoir/part inspiration/part DIY. Rob Kenney's father left him and his seven siblings when he was fourteen years old, and the youngest had to fend for themselves. He wished that he had someone who could teach him the basics—how to tie a tie, jump-start a car, unclog a drain, use tools properly—as well as succeed in life. But he and his siblings had to figure these things out on their own. Now a father himself, Rob decided that he would help people out by providing how-to tips as well as advice—and even throw in some bad dad jokes. He started a YouTube channel for anyone looking for fatherly advice, and in the course of three months, gained a following of nearly 2.5 million subscribers, with millions of views for his how-to and inspirational videos. In this book, Rob shares his story of overcoming a difficult childhood with the strength of faith and family, and offers inspiration and hope. In addition, he provides 50 practical DIY instructions (30 of which will be unique to the book), illustrated with helpful line drawings.

EQUALITY IN WATER AND SANITATION SERVICES

Routledge There is growing acceptance that the progress delivered under the Millennium Development Goal target for drinking water and sanitation has been inequitable. As a result, the progressive reduction of inequalities is now an explicit focus of the Sustainable Development Goal (SDG) targets, adopted in 2015, for universal access to drinking water, sanitation and hygiene (WASH). This shift in focus has implications for the way in which the next generation of WASH policies and programmes will be conceived, designed, financed and monitored. This book provides an authoritative textbook for students, as well as a point of reference for policy-makers and practitioners interested in reducing inequalities in access to WASH services. Four key areas are addressed: background to the human right to water and development goals; dimensions of inequality; case studies in delivering water and sanitation equitably; and monitoring progress in reducing inequality.

151 TRADING STRATEGIES

Springer The book provides detailed descriptions, including more than 550 mathematical formulas, for more than 150 trading strategies across a host of asset classes and trading styles. These include stocks, options, fixed income, futures, ETFs, indexes, commodities, foreign exchange, convertibles, structured assets, volatility, real estate, distressed assets, cash, cryptocurrencies, weather, energy, inflation, global macro, infrastructure, and tax arbitrage. Some strategies are based on machine learning algorithms such as artificial neural networks, Bayes, and k-nearest neighbors. The book also includes source code for illustrating out-of-sample backtesting, around 2,000 bibliographic references, and more than 900 glossary, acronym and math definitions. The presentation is intended to be descriptive and pedagogical and of particular interest to finance practitioners, traders, researchers, academics, and business school and finance program students.

INTERNATIONAL PROTECTION OF INVESTMENTS

THE SUBSTANTIVE STANDARDS

Cambridge University Press This book outlines the protection standards typically contained in international investment agreements as they are actually applied and interpreted by investment tribunals. It thus provides a basis for analysis, criticism, and stocktaking of the existing system of investment arbitration. It covers all main protection standards, such as expropriation, fair and equitable treatment, full protection and security, the non-discrimination standards of national treatment and MFN, the prohibition of unreasonable and discriminatory measures, umbrella clauses and transfer guarantees. These standards are covered in separate chapters providing an overview of textual variations, explaining the origin of the standards and analysing the main conceptual issues as developed by investment tribunals. Relevant cases with quotations that illustrate how tribunals have relied upon the standards are presented in depth. An extensive bibliography guides the reader to more specific aspects of each investment standard permitting the book's use as a commentary of the main investment protection standards.

BERGER ON DRAWING

DIO DI ABRAMO, ISACCO E GIACOBBE

Le promesse dell'alleanza di Dio non falliscono. Questo libro è stato scritto per aiutarti a ottenere le promesse di Dio per la tua vita. È uno studio attento e elaborato, con testimonianze personali, sulla capacità e volontà di Dio di eseguire tutte le sue parole su di noi. Disse che veglierà sulle sue parole perché si avverino.- Qui, guarderemo in modo critico le dinamiche di una promessa divina; com'è stabilita, mantenuta fino alla sua realizzazione. Ogni promessa ha un inizio, tempistica e condizioni. Dobbiamo sempre essere in grado di entrare perfettamente e comodamente nella volontà di Dio per la nostra vita. Veramente, tutto questo è possibile con Dio!

ADOLESCENT SLEEP PATTERNS

BIOLOGICAL, SOCIAL, AND PSYCHOLOGICAL INFLUENCES

Cambridge University Press There is a growing concern in relation to the problem of insufficient sleep, particularly in the United States. In the early 1990s a Congressionally mandated commission noted that insufficient sleep is a major contributor to catastrophic events, such as Chernobyl and the Exxon Valdez, as well as personal tragedies, such as automobile accidents. Adolescents appear to be among the most sleep-deprived populations in our society, though they are rarely included in sleep assessments. This book explores the genesis and development of sleep patterns in adolescents. It examines biological and cultural factors that influence sleep patterns, presents risks associated with lack of sleep, and reveals the effects of environmental factors such as work and school schedules on sleep. Adolescent Sleep Patterns will appeal to psychologists and sociologists of adolescence who have not yet considered the important role of sleep in the lives of our youth.

PHILOSOPHY OF GLOBALIZATION

Walter de Gruyter GmbH & Co KG Not so long ago, it seemed the intellectual positions on globalization were clear, with advocates and opponents making their respective cases in decidedly contrasting terms. Recently, however, the fronts have shifted dramatically. The aim of this publication is to contribute philosophical depth to the debates on globalization conducted within various academic fields – principally by working out its normative dimensions. The interdisciplinary nature of this book's contributors also serves to scientifically ground the ethical-philosophical discourse on global responsibility. Though by no means exhaustive, the expansive scope of the works herein encompasses such other topics as the altering consciousness of space and time, and the phenomenon of globalization as a discourse, as an ideology and as a symbolic form.

ADVANCES IN EMERGING TRENDS AND TECHNOLOGIES

VOLUME 1

Springer Nature This book constitutes the proceedings of the 1st International Conference on Advances in Emerging Trends and Technologies (ICAETT 2019), held in Quito, Ecuador, on 29–31 May 2019, jointly organized by Universidad Tecnológica Israel, Universidad Técnica del Norte, and Instituto Tecnológico Superior Rumiñahui, and supported by SNOTRA. ICAETT 2019 brought together top researchers and practitioners working in different domains of computer science to share their expertise and to discuss future developments and potential collaborations. Presenting high-quality, peer-reviewed papers, the book discusses the following topics: Technology Trends Electronics Intelligent Systems Machine Vision Communication Security e-Learning e-Business e-Government and e-Participation

CHALLENGE FOR THE ACTOR

Simon and Schuster The actress and teacher guides actors in developing their art, covering such aspects as voice techniques, timing, rhythm, and including exercises to correct problems

DEVELOPMENTS AND ADVANCES IN DEFENSE AND SECURITY

PROCEEDINGS OF THE MULTIDISCIPLINARY INTERNATIONAL CONFERENCE OF RESEARCH APPLIED TO DEFENSE AND SECURITY (MICRADS 2018)

Springer This book includes a selection of articles from The 2018 Multidisciplinary International Conference of Research Applied to Defense and Security (MICRADS'18), held in Salinas, Peninsula de Santa Elena, Ecuador, from April 18 to 20, 2018. MICRADS is an international forum for researchers and practitioners to present and discuss the most recent innovations, trends, results, experiences and concerns in the various areas of defense and security, together with their technological development and applications. The main topics covered are: Information and Communication Technology in Education; Computer Vision in Military Applications; Engineering Analysis and Signal Processing; Cybersecurity and Cyberdefense; Maritime Security and Safety; Strategy, Geopolitics and Oceanopolitics; Defense planning; Leadership (e-leadership); Defense Economics; Defense Logistics; Health Informatics in Military Applications; Simulation in Military Applications; Computer Networks, Mobility and Pervasive Systems; Military Marketing; Military Physical Training; Assistive Devices and Wearable Technology; Naval and Military Engineering; Weapons and Combat Systems; Operational Oceanography. The book is aimed at all those dealing with defense and security issues, including practitioners, researchers and teachers as well as undergraduate, graduate, master's and doctorate students.

THE 11TH INTERNATIONAL CONFERENCE ON EUROPEAN TRANSNATIONAL EDUCATIONAL (ICEUTE 2020)

Springer Nature This book contains accepted papers presented at ICEUTE 2020 held in the beautiful and historic city of Burgos (Spain), in September 2020. The 11th International Conference on European Transnational Education (ICEUTE 2020) has been a meeting point for people working on transnational education within Europe. It has provided a stimulating and fruitful forum for presenting and discussing the latest works and advances on transnational education within European countries. After a thorough peer-review process, the ICEUTE 2020 International Program Committee selected 44 papers which are published in these conference proceedings achieving an acceptance rate of 41%. Due to the COVID-19 outbreak, the ICEUTE 2020 edition was blended, combining on-site and on-line participation. In this relevant edition, a special emphasis was put on the organization of five special sessions related to relevant topics as Role of English in Transnational Education and Teacher Training, Personalization and ICT: a Path to Educational Inclusion, Innovation and Research Findings in Engineering Higher Education, Practical Implementations of Novel Initiatives, and Innovation in Computer Science Higher Education. The selection of papers was extremely rigorous in order to maintain the high quality of the conference, and we would like to thank the members of the Program Committees for their hard work in the reviewing process. This is a crucial process to the creation of a high standard conference, and the ICEUTE conference would not exist without their help.

CELIAC DISEASE AND NON-CELIAC GLUTEN SENSITIVITY

BoD - Books on Demand This book contains recent advances about CD and NCGS written in eight chapters and is divided in three sections. In the first section, the main hallmarks of both diseases are described, together with the current diagnostic criteria of CD and its influence on the response to the vaccination against hepatitis B virus infection. The second section is dedicated to the description of several techniques for gluten determination in foods and if its consumption is good for nonceliac people. Finally, the third section contains complementary information related to the description and application of novel endoscopic techniques for confirming the diagnosis of CD. Another topic describes the growing consumption of gluten-free products and the adherence to this type of diet.

BIOBANKS

PATENTS OR OPEN SCIENCE?

Woodhead Pub Limited Biobanks represent an invaluable research tool and, as a result of their intrinsic and extrinsic nature, may be looked upon as archives or repositories largely made up of libraries, or collections of content where the content is the biological material derived from different individuals or species, representing valuable tangible assets. Biobanks analyses aspects of the commons and common intellectual property relating to the concepts of private property, not only concerning data but biological materials as well, and the advantages and disadvantages of patents in scientific research. Several recent initiatives in biomedical research have attempted to make their data freely available to others, so as to foster innovation. Many of these initiatives have adopted the open source model, which has gained widespread recognition in the computer industry. This title is structured into eight chapters and begins with an introduction, which is followed by chapters that discuss how the term 'biobank' came about in scientific literature; legal matters relating to biobanks; and intellectual and physical property. Later chapters comprehensively analyse the intellectual property of biobanks within the sphere of copyright; biotechnological inventions and research patentability; open data sharing in biobanks; and biobanks as commons or vault. Considers biobanks as both repositories and as collections of tangible assets Argues that the data in biobanks represents a high value intangible asset Explores regulatory gaps exploited by the private sector

ANOTHER WAY OF TELLING

Vintage "There are no photographs which can be denied. All photographs have the status of fact. What is to be examined is in what way photography can and cannot give meaning to facts." With these words, two of our most thoughtful and eloquent interrogators of the visual offer a singular meditation on the ambiguities of what is seemingly our straightforward art form. As constructed by John Berger and the renowned Swiss photographer Jean Mohr, that theory includes images as well as words; not only analysis, but anecdote and memoir. Another Way of Telling explores the tension between the photographer and the photographed, between the picture and its viewers, between the filmed moment and the memories that it so resembles. Combining the moral vision of the critic and the practical engagement of the photographer, Berger and Mohr have produced a work that expands the frontiers of criticism first charged by Walter Benjamin, Roland Barthes, and Susan Sontag.

CANNABIS AND CANNABINOIDS

PHARMACOLOGY, TOXICOLOGY, AND THERAPEUTIC POTENTIAL

Routledge Study the latest research findings by international experts! This comprehensive volume presents state-of-the-art scientific research on the therapeutic uses of cannabis and its derivatives. All too often, discussions of the potential medical uses of this substance are distorted by political considerations that have no place in a medical debate. Cannabis and Cannabinoids: Pharmacology, Toxicology, and Therapeutic Potential features fair, equitable discussion of this emerging and controversial medical topic by the world's foremost researchers. Cannabis and Cannabinoids examines the benefits, drawbacks, and side effects of medical marijuana as a treatment for various conditions and diseases. This book discusses the scientific basis for marijuana's use in cases of pain, nausea, anorexia, and cachexia. It also explores its possible benefits in glaucoma, ischemia, spastic disorders, and migraine. Cannabis and Cannabinoids examines all facets of the medical use of marijuana, including: botany history biochemistry pharmacology clinical use toxicology side effects Cannabis and Cannabinoids is a reference work that will become indispensable to physicians, psychologists, researchers, biochemists, graduate students, and interested members of the public. No other book available offers this comprehensive, even-handed look at a deeply divisive subject.

TEXTBOOK OF FAMILY MEDICINE

Elsevier Health Sciences Edited by Robert E. Rakel, MD and David P. Rakel, MD, Textbook of Family Medicine remains your #1 choice for complete guidance on the principles of family medicine, primary care in the community, and all aspects of clinical practice.
