Strengthening Forensic Science in the United States A Path Forward

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best

practices with consistent application. **Strengthening Forensic Science in the United States: A Path Forward** provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. **Strengthening Forensic Science in the United States** gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Damnation Island

Poor, Sick, Mad, and Criminal in 19th-Century New York

Algonquin Books “A riveting character-driven dive into 19th-century New York and the extraordinary history of Blackwell’s Island.” —Laurie Gwen Shapiro, author of *The Stowaway: A Young Man’s Extraordinary Adventure to Antarctica* On a two-mile stretch of land in New York’s East River, a 19th-century horror story was unfolding . . . Today we call it Roosevelt Island. Then, it was Blackwell’s, site of a lunatic asylum, two prisons, an almshouse, and a number of hospitals. Conceived as the most modern, humane incarceration facility the world ever seen, Blackwell’s Island quickly became, in the words of a visiting Charles Dickens, “a lounging, listless madhouse.” In the first contemporary

investigative account of Blackwell's, Stacy Horn tells this chilling narrative through the gripping voices of the island's inhabitants, as well as the period's officials, reformers, and journalists, including the celebrated Nellie Bly. Digging through city records, newspaper articles, and archival reports, Horn brings this forgotten history alive: there was terrible overcrowding; prisoners were enlisted to care for the insane; punishment was harsh and unfair; and treatment was nonexistent. Throughout the book, we return to the extraordinary Reverend William Glenney French as he ministers to Blackwell's residents, battles the bureaucratic mazes of the Department of Correction and a corrupt City Hall, testifies at salacious trials, and in his diary wonders about man's inhumanity to man. In Damnation Island, Stacy Horn shows us how far we've come in caring for the least fortunate among us—and reminds us how much work still remains.

Caring for Veterans and Their Families: A Guide for

Nurses and Healthcare Professionals

Jones & Bartlett Learning Of the approximately 20 million veterans of the U.S. armed forces, less than half utilize the Veteran's Health Administration health care system. That means the majority of veterans are receiving care from nurses and healthcare professionals who may not be trained in treating or caring for patients who have served in the military. This unique book guides nurses and healthcare professionals through the specific needs veterans can present, including but not limited to PTSD. Topics covered include, defining military culture and how to apply that knowledge to provide informed treatment, transitioning from service to civilian life and the many challenges expected during re-adjustment and re-entry, recognizing and treating substance use disorders, identifying suicidal behaviors and warning signs, long-term care for elderly veterans, and many more topics unique to the healthcare of veterans.

A Framework to Guide Selection of Chemical Alternatives

National Academies Press Historically, regulations governing chemical use have often focused on widely used chemicals and acute human health effects of exposure to them, as well as their potential to cause cancer and other adverse health effects. As scientific knowledge has expanded there has been an increased awareness of the mechanisms through which chemicals may exert harmful effects on human health, as well as their effects on other species and ecosystems. Identification of high-priority chemicals and other chemicals of concern has prompted a growing number of state and local governments, as well as major companies, to take steps beyond existing hazardous chemical federal legislation. Interest in approaches and policies that ensure that any new substances substituted for chemicals of concern are assessed as carefully and thoroughly as possible has also burgeoned. The overarching goal of these approaches is to avoid regrettable substitutions, which occur when a toxic chemical is replaced by another chemical that later proved unsuitable because of persistence, bioaccumulation, toxicity, or other concerns. Chemical alternative assessments are tools designed to facilitate consideration of these factors to assist stakeholders in identifying chemicals that may have the greatest likelihood of harm to human and ecological health, and to provide guidance on how the industry may develop and adopt safer alternatives. **A Framework to Guide Selection of Chemical Alternatives** develops and demonstrates a decision framework for evaluating potentially safer substitute chemicals as primarily determined by human health and ecological risks. This new framework is informed by previous efforts by

regulatory agencies, academic institutions, and others to develop alternative assessment frameworks that could be operationalized. In addition to hazard assessments, the framework incorporates steps for life-cycle thinking - which considers possible impacts of a chemical at all stages including production, use, and disposal - as well as steps for performance and economic assessments. The report also highlights how modern information sources such as computational modeling can supplement traditional toxicology data in the assessment process. This new framework allows the evaluation of the full range of benefits and shortcomings of substitutes, and examination of tradeoffs between these risks and factors such as product functionality, product efficacy, process safety, and resource use. Through case studies, this report demonstrates how different users in contrasting decision contexts with diverse priorities can apply the framework. This report will be an essential resource to the chemical industry, environmentalists, ecologists, and state and local governments.

A Modern-Day Slave, an International Art Dealer, and the Unlikely Woman Who Bound Them Together

W Publishing Group Meet Denver, a man raised under plantation-style slavery in Louisiana in the 1960s; a man who escaped, hopping a train to wander, homeless, for eighteen years on the streets of Dallas, Texas. No longer a slave, Denver's life was still hopeless-until God moved. First came a godly woman who prayed, listened, and obeyed. And then came her husband, Ron, an international arts dealer at home in a world of Armani-suited millionaires. And then they all came together. But slavery takes many forms. Deborah discovers that she has cancer. In the face of possible death, she charges her husband to rescue Denver. Who will be saved, and who will be lost? What is the future for these unlikely three? What is God doing? This is the emotional tale of their story: a telling of pain and laughter, doubt and tears, dug out between the bondages of this earth and the free possibility of heaven. No reader or listener will ever forget it.
