Plants for Your Food Forest

500 Plants for Temperate Food Forests and Permaculture Gardens

Independently Published **A food forest is a form of regenerative farming, a designed ecosystem modelled on nature, with the aim of growing food and sequestering carbon at the same time. As a forest it will consist of plants which occupy different layers, typically a canopy layer, shrub layer, herb layer and climbers. All plants will be perennials in order for the soil to be wild, undisturbed and regenerating. All plants will be food producing, will sequester carbon in their woody parts or in the soil, and will have useful functions in the forest ecosystem. The choice of what to grow in a food forest is challenging. It is not simply a matter of deciding what would be good to eat, and planting the corresponding food plants in beds alongside rows or patches of woodland. Most books about food forests, woodland gardening or carbon farming concentrate on the design principles involved. The focus of this book is the plants, their characteristics and personalities, what they have to offer a food forest ecosystem, as well as what kinds of foods they yield. We have selected over 500 plants that provide a mix of different growing conditions, plant size and structure, type of food, and contribution to a food forest ecosystem. There is also a quick-reference table of the key characteristics. The featured plants are arranged in sections corresponding to Forest Layer: Shrubs, Groundcover Shrubs, Trees, Herbaceous Plants, Herbaceous Groundcover Plants, Running Bamboos, Bulbs, Climbers. Further details of all the plants described here are available from the PFAF Plants Database, which can be accessed free of charge at pfaf.org**

Never Quit

How I Became a Special Ops Pararescue Jumper

St. Martin's Griffin **The young adult adaptation of the epic memoir of an Alaskan pararescue jumper, Special Forces Operator, and decorated war hero. "That Others May Live" is a mantra that defines the fearless men of Alaska's 212th Pararescue Unit, the PJs, one of the most elite military forces on the planet. Whether they are rescuing citizens injured and freezing in the Alaskan wilderness or saving wounded Rangers and SEALS in blazing firefights at war, the PJs are some of the least known and most highly trained of America's warriors. Never Quit is the true story of how Jimmy Settle, an Alaskan shoe store clerk, became a Special Forces Operator and war hero. After being shot in the head during a dangerous high mountain operation in Afghanistan, Jimmy returns to battle with his teammates for a heroic rescue, the bullet fragments stitched over and still in his skull. In a cross between a suicide rescue mission and an against-all-odds mountain battle, his team of PJs risk their lives again in an epic firefight. When his helicopter is hit and begins leaking fuel, Jimmy finds himself in the worst possible position as a rescue specialist—forced to leave members from his own team behind. Jimmy will have to risk everything to get back into the battle and save his brothers. From death-defying Alaskan wilderness training, wild rescues, and battles against the Taliban and Al Qaeda, this is the true story of how a boy from humble beginnings became an American hero.**

Breaking Into the Current

Boatwomen of the Grand Canyon

University of Arizona Press **In 1973, Marilyn Sayre gave up her job as a computer programmer and became the first woman in twenty years to run a commercial boat through the Grand Canyon. Georgie White had been the first, back in the 1950s, but it took time before other women broke into guiding passengers down the Colorado River. This book profiles eleven of the first full-season Grand Canyon boatwomen, weaving together their various experiences in their own words. Breaking Into the Current is a story of romance between women and a place. Each woman tells a part of every Canyon boatwoman's story: when Marilyn Sayre talks about leaving the Canyon, when Ellen Tibbets speaks of crew camaraderie, or when Martha Clark recalls the thrill of white water, each tells how all were involved in the same romance. All the boatwomen have stories to tell of how they first came to the Canyon and why they stayed. Some speak of how they balanced their passion for being in the Canyon against the frustration of working in a traditionally male-oriented occupation, where today women account for about fifteen percent of the Canyon's commercial river guides. As river guides in love with the Canyon and their work, these women have followed their hearts. "I've done a lot," says Becca Lawton, "but there's been nothing like holding those oars in my hands and putting my boat exactly where I wanted it. Nothing."**

America Calling

A Social History of the Telephone to 1940

Univ of California Press **The telephone looms large in our lives, as ever present in modern societies as cars and television. Claude Fischer presents the first social history of this vital but little-studied technology—how we encountered, tested, and ultimately embraced it with enthusiasm. Using telephone ads, oral histories, telephone industry correspondence, and statistical data, Fischer's work is a colorful exploration of how, when, and why Americans started communicating in this radically new manner. Studying three California communities, Fischer uncovers how the telephone became integrated into the private worlds and community activities of average Americans in the first decades of this century. Women were especially avid in their use, a phenomenon which the industry first vigorously discouraged and then later wholeheartedly promoted. Again and again Fischer finds that the telephone supported a wide-ranging network of social relations and played a crucial role in community life, especially for women, from organizing children's relationships and church activities to alleviating the loneliness and boredom of rural life. Deftly written and meticulously researched, America Calling adds an important new chapter to the social history of our nation and illuminates a fundamental aspect of cultural modernism that is integral to contemporary life.**

Future Mobile Transport Protocols

Adaptive Congestion Control for Unpredictable Cellular Networks

Springer Thomas Pötsch investigates the channel properties of cellular networks and analyzes the effects that cause inefficient performance of legacy congestion control protocols, such as TCP and its variants, on cellular networks. Inspired by the findings, a novel delay-based congestion control protocol called Verus is proposed and evaluated across a variety of network scenarios. Furthermore, the author develops a stochastic two-dimensional discrete-time Markov modeling approach that dramatically simplifies the understanding of delay-based congestion control protocols.

My Soul in Silence Waits

Meditations on Psalm 62

Cowley Publications **"For God alone my soul in silence waits...." In these reflections on Psalm 62 Margaret Guenther provides the foundation for a time of reflection and retreat without ever leaving home. The book's first chapter introduces us to ways of making a retreat wherever we are, at a place apart or in the midst of our daily lives. Guenther then offers eight meditations on Psalm 62, with its themes of waiting on God's presence with patience, trust, and expectation. She explores the images the psalm evokes of longing, silence, waiting, safety, enemies, and God as a rock and refuge. As in all her books, Guenther finds new ways to explore these ancient themes with the wit and practicality of an accomplished storyteller. These eight meditations can be read consecutively over the course of a single day or weekend, or spaced over time with periods of reflection in between. Each meditation ends with ideas for further prayer and pondering. My Soul in Silence Waits is one of our series of Cowley Cloister Books: smaller format, gift edition books designed for meditative and devotional reading.**
