**Coherency Management Architecting the Enterprise for Alignment, Agility and Assurance AuthorHouse** The book introduces the idea of Coherency Management, and asserts that this is the primary outcome goal of an enterprise's architecture. With submissions from over 30 authors and co-authors, the book reinforces the idea that EA is being practiced in an ever-increasing variety of circumstances - from the tactical to the strategic, from the technical to the political, and with governance that ranges from sell to tell. The characteristics, usages, value statements, frameworks, rules, tools and countless other attributes of EA seem to be anything but orderly, definable, classifiable, and understandable as might be hoped given heritage of EA and the famous framework and seminal article on the subject by John Zachman over two decades ago. Notably, EA is viewed as an Enterprise Design and Management approach, adopted to build better enterprises, rather than a IT Design and Management approach limited to build better systems. **Papers on Ancient Greek Linguistics Proceedings of the Ninth International Colloquium on Ancient Greek Linguistics (ICAGL 9), 30 August-1 September 2018, Helsinki Ancient Greek Linguistics New Approaches, Insights, Perspectives Walter de Gruyter GmbH & Co KG** The volume assembles about 50 contributions presented at the Intenational Colloquium on Ancient Greek Linguistics, held in Rome, March 2015. This Colloquium opened a new series of international conferences that has replaced previous national meetings on this subject. They embrace essential topics of Ancient Greek Linguistics with different theoretical and methodological approaches: particles and their functional uses; phonology; tense, aspect, modality; syntax and thematic roles; lexicon and onomastics; Greek and other languages; speech acts and pragmatics. **Legal Literacy in Premodern European Societies Palgrave MacMillan** This book analyses the legal literacy, knowledge and skills of people in premodern and modernizing Europe. It examines how laymen belonging both to the common people and the elite acquired legal knowledge and skills, how they used these in advocacy and legal writing and how legal literacy became an avenue for social mobility. Taking a comparative approach, contributors consider the historical contexts of England, Finland, France, Germany, Italy and Sweden. This book is divided into two main parts. The first part discusses various groups of legal literates (scriveners, court of appeal judges and advocates) and their different paths to legal literacy from the Middle Ages to the nineteenth century. The second part analyses the rise of the ownership and production of legal literature - especially legal books meant for laymen - as means for acquiring a degree of legal literacy from the eighteenth to the early twentieth century. **Basel in the Age of Burckhardt A Study in Unseasonable Ideas University of Chicago Press** This remarkable history tells the story of the independent city-republic of Basel in the nineteenth century, and of four major thinkers who shaped its intellectual history: the historian Jacob Burckhardt, the philologist and anthropologist Johann Jacob Bachofen, the theologian Franz Overbeck, and the philosopher Friedrich Nietzsche. "Remarkable and exceptionally readable . . . There is wit, wisdom and an immense erudition on every page."—Jonathan Steinberg, *Times Literary Supplement* "Gossman's book, a product of many years of active contemplation, is a tour de force. It is at once an intellectual history, a cultural history of Basel and Europe, and an important contribution to the study of nineteenth-century historiography. Written with a grace and elegance that many aspire to, few seldom achieve, this is model scholarship."—John R. Hinde, *American Historical Review* **Standardising English Cambridge University Press** Leading researchers shed new light on the history of the standardisation of English. **Post-Secular Society Routledge** Post-Secular Society argues for several characteristics of the secular: the experience of living in a secular age and the experience of living without religion as a normal condition. Religion in the West is often seen as marked by both innovation and disarray. In spite of differing approaches and perspectives of secularization, rational choice and de-secularization, many scholars agree that the West is experiencing a general "resurgence" of religion across most Western societies. Post-Secular Society discusses the changes in religion related to globalization and New Age forms of popular religion. The contributors review religion that is rooted in the globalized political economy and the relationship of post-secularism to popular consumer culture. Also reviewed is innovative discourse as a religious belief system, theories of the post-secular, religious, and spiritual well-being, and healing practices in Finland and environmentalism. This paperback edition includes a new preface by Peter Nynas. **Defining the art of grammar : ancient perceptions of γραμματική and grammatica** "The subject of this dissertation, which belongs to the field of Classical Philology, are the definitions of the art of grammar found in Greek and Latin sources from the Classical era to the second century CE. Definitions survive from grammarians, philosophers, and general scholars. I have examined these definitions from two main points of view: how they are formed, and how they reflect the development of the art itself"--Preliminaries. **Contacts and Networks in the Baltic Sea Region Austmarr as a Northern Mare Nostrum, Ca. 500-1500 CE Crossing Boundaries: Turku Medieval and Early Modern Studies** Since prehistoric times, the Baltic Sea has functioned as a northern \*mare nostrum\* "a crucial nexus that has shaped the languages, folklore, religions, literature, technology, and identities of the Germanic, Finnic, SÁ;mi, Baltic, and Slavic peoples. This anthology explores the networks among those peoples. The contributions to \*Contacts and Networks in the Baltic Sea Region:\* Austmarr \*as a Northern\* mare nostrum, \*ca. 500-1500 ad\* address different aspects of cultural contacts around and across the Baltic from the perspectives of history, archaeology, linguistics, literary studies, religious studies, and folklore. The introduction offers a general overview of crosscultural contacts in the Baltic Sea region as a framework for contextualizing the volume's twelve chapters, organized in four sections. The first section concerns geographical conceptions as revealed in Old Norse and in classical texts through place names, terms of direction, and geographical descriptions. The second section discusses the movement of cultural goods and persons in connection with elite mobility, the slave trade, and rune-carving practice. The third section turns to the history of language contacts and influences, using examples of Finnic names in runic inscriptions and Low German loanwords in Finnish. The final section analyzes intercultural connections related to mythology and religion spanning Baltic, Finnic, Germanic, and SÁ;mi cultures. Together these diverse articles present a dynamic picture of this distinctive part of the world. **Roman de Silence MSU Press** This bilingual edition, based on a reexamination of the Old French manuscript, makes *Silence* available to specialists and students in various fields of literature, to those in women's studies and, most important, to everyone who loves a first-rate story. **The Rise of Universities Sergei Prokofiev Materials, Articles, Interviews Western Esotericism Based on Papers Read at the Symposium on Western Esotericism, Held at Åbo, Finland on 15-17 August 2007 Ad Ius Criminale Humanius Essays in Criminology, Criminal Justice and Criminal Policy Library Research Associates Incorporated Western Esotericism in Scandinavia BRILL** Western Esotericism in Scandinavia is a detailed encyclopaedic work covering all major esoteric currents in Denmark, Finland, Norway, and Sweden. **Slave Stealers True Accounts of Slave Rescues: Then and Now** Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all. **Tribal Nation The Making of Soviet Turkmenistan Princeton University Press** On October 27, 1991, the Turkmen Soviet Socialist Republic declared its independence from the Soviet Union. Hammer and sickle gave way to a flag, a national anthem, and new holidays. Seven decades earlier, Turkmenistan had been a stateless conglomeration of tribes. What brought about this remarkable transformation? Tribal Nation addresses this question by examining the Soviet effort in the 1920s and 1930s to create a modern, socialist nation in the Central Asian Republic of Turkmenistan. Adrienne Edgar argues that the recent focus on the Soviet state as a "maker of nations" overlooks another vital factor in Turkmen nationhood: the complex interaction between Soviet policies and indigenous notions of identity. In particular, the genealogical ideas that defined premodern Turkmen identity were reshaped by Soviet territorial and linguistic ideas of nationhood. The Soviet desire to construct socialist modernity in Turkmenistan conflicted with Moscow's policy of promoting nationhood, since many Turkmen viewed their "backward customs" as central to Turkmen identity. Tribal Nation is the first book in any Western language on Soviet Turkmenistan, the first to use both archival and indigenous-language sources to analyze Soviet nation-making in Central Asia, and among the few works to examine the Soviet multinational state from a non-Russian perspective. By investigating Soviet nation-making in one of the most poorly understood regions of the Soviet Union, it also sheds light on broader questions about nationalism and colonialism in the twentieth century. **Nature and History in Modern Italy Ohio University Press** Marco Armiero is Senior Researcher at the Italian National Research Council and Marie Curie Fellow at the Institute of Environmental Sciences and Technologies, Universitat Aut(noma de Barcelona. By the 1930s, intellectuals and artists all over the world thought of Moscow as a mecca of secular enlightenment. In Moscow, the Fourth Rome, Katerina Clark shows how Soviet officials and intellectuals, in seeking to capture the imagination of leftist and anti-fascist intellectuals throughout the world, sought to establish their capital as the cosmopolitan center of a post-Christian confederation and to rebuild it to become a beacon for the rest of the world. Clark provides an interpretative cultural history of the city during the crucial 1930s, the decade of the Great Purge. She draws on the work of intellectuals such as Sergei Eisenstein, Sergei Tretiakov, Mikhail Koltsov, and Ilya Ehrenburg to shed light on the singular Zeitgeist of that most Stalinist of periods. In her account, the decade emerges as an important moment in the prehistory of key concepts in literary and cultural studies today-transnationalism, cosmopolitanism, and world literature. By bringing to light neglected antecedents, she provides a new polemical and political context for understanding canonical works of writers such as Brecht, Benjamin, Lukacs, and Bakhtin. Moscow, the Fourth Rome breaches the intellectual iron curtain that has circumscribed cultural histories of Stalinist Russia, by broadening the framework to include considerable interaction with Western intellectuals and trends. Its integration of the understudied international dimension into the interpretation of Soviet culture remedies misunderstandings of the world-historical significance of Moscow under Stalin. **Stalinist Confessions Messianism and Terror**

at the Leningrad Communist University University of Pittsburgh Pre During Stalin's Great Terror, accusations of treason struck fear in the hearts of Soviet citizens-and lengthy imprisonment or firing squads often followed. Many of the accused sealed their fates by agreeing to confessions after torture or interrogation by the NKVD. Some, however, gave up without a fight. In *Stalinist Confessions*, Igal Halfin investigates the phenomenon of a mass surrender to the will of the state. He deciphers the skillfully rendered discourse through which Stalin defined his cult of personality and consolidated his power by building a grassroots base of support and instilling a collective psyche in every citizen. By rooting out evil (opposition) wherever it hid, good communists could realize purity, morality, and their place in the greatest society in history. Confessing to trumped-up charges, comrades made willing sacrifices to their belief in socialism and the necessity of finding and making examples of its enemies. Halfin focuses his study on Leningrad Communist University as a microcosm of Soviet society. Here, eager students proved their loyalty to the new socialism by uncovering opposition within the University. Through their meetings and self-reports, students sought to become Stalin's New Man. Using his exhaustive research in Soviet archives including NKVD records, party materials, student and instructor journals, letters, and newspapers, Halfin examines the transformation in the language of Stalinist socialism. From an initial attitude that dismissed dissent as an error in judgment and redeemable through contrition to a doctrine where members of the opposition became innately wicked and their reform impossible, Stalin's socialism now defined loyalty in strictly black and white terms. Collusion or allegiance (real or contrived, now or in the past) with "enemies of the people" (Trotsky, Zinoviev, Bukharin, Germans, capitalists) was unforgivable. The party now took to the task of purging itself with ever-increasing zeal. **Islam after Communism Religion and Politics in Central Asia Univ of California Press** Adeeb Khalid combines insights from the study of both Islam and Soviet history in this sophisticated analysis of the ways that Muslim societies in Central Asia have been transformed by the Soviet presence in the region. Arguing that the utopian Bolshevik project of remaking the world featured a sustained assault on Islam that destroyed patterns of Islamic learning and thoroughly de-Islamized public life, Khalid demonstrates that Islam became synonymous with tradition and was subordinated to powerful ethnonational identities that crystallized during the Soviet period. He shows how this legacy endures today and how, for the vast majority of the population, a return to Islam means the recovery of traditions destroyed under Communism. **Islam after Communism** reasons that the fear of a rampant radical Islam that dominates both Western thought and many of Central Asia's governments should be tempered by an understanding of the politics of antiterrorism, which allows governments to justify their own authoritarian policies by casting all opposition as extremist. Comparing the secularization of Islam in Central Asia to experiences in Turkey, the former Yugoslavia, and other secular Muslim states, the author lays the groundwork for a nuanced and well-informed discussion of the forces at work in this crucial region. **Texas Outlaw Little, Brown** To Rory Yates being a Texas Ranger is about justice, but all of that changes when he is brought to a small southern town to help uncover the mysteries behind a local woman's death—only to discover corruption and lies. Rory escapes his newfound fame when he's sent to the remote West Texas town of Rio Lobo, a municipality with two stoplights. And now, according to the Chief of Police, it has one too many Texas Rangers. Rio Lobo Detective Ariana Delgado is the one who requested Rory, and the only person who believes a local councilwoman's seemingly accidental death is a murder. Then Rory begins to uncover a tangle of small-town secrets, favors, and lies as crooked as Texas law is straight. To get to the truth before more people die, Rory is forced to take liberties with the investigation. The next ballad of Rory Yates may not be about a hero, but rather an outlaw song. **Ritualistics Based on Papers Read at the Symposium on Ritualistics Held at Åbo, Finland, on the July 31-August 2, 2002 Defining Issues in English Language Teaching Oxford University Press** This text goes back to basics by investigating fundamental assumptions about the way English should be defined and taught as a foreign language. Sufficiently diagnostic short-term assay procedures have been developed in recent years for us to determine that there are mutagenic agents among thousands of chemicals to which the human population is exposed today. These chemicals were not significantly present prior to the industrial revolution. As of today, there are no procedures available which have been adequately demonstrated to assess individual susceptibility to genotoxic exposures, and as a result we have had to rely on extrapolating toxicological data from animal model systems. The question is can we afford to allow such an increased environmental selection pressure via mutagenic exposures to occur without expecting adverse long-term effects on our health. It is apparent from this line of reasoning that what is lacking and immediately needed are test procedures that can be applied to humans to assess genotoxic exposure as well as individual susceptibility to it. There have already been two conferences which have focused attention on this research area. "Guidelines for studies of human populations exposed to mutagenic and reproductive hazards" (A. D. Bloom, ed., March of Dimes Birth Defects Foundation, White Plains, New York, 1981) and "Indicators of genotoxic exposure in humans" (Banbury Report 13, B. A. Bridges, B. E. Butterworth, and I. The Bolsheviks preached the moral transformation of Russians into model Communists for their political and personal salvation. To screen the population for moral and political deviance, the Bolsheviks enlisted natural scientists, doctors, psychologists, sexologists, writers, and Party prophets to establish criteria for judging people. Self-inspection became a central Bolshevik practice. Communists were expected to write autobiographies in which they reconfigured their life experience in line with the demands of the Party. Halfin traces the intellectual contortions of this project. Initially, the Party denounced deviant Communists, especially the Trotskyists, as degenerate, but innocuous, souls; but in a chilling turn in the mid-1930s, the Party came to demonize the unreformed as virulent, malicious counterrevolutionaries. The insistence that the good society could not triumph unless every wicked individual was destroyed led to the increasing condemnation of Party members as helplessly flawed. Combining the analysis of autobiography with the study of Communist psychology and sociology and the politics of Bolshevik self-fashioning, Halfin gives us powerful new insight into the preconditions of the bloodbath that was the Great Purge. **Bayonets Before Bullets The Imperial Russian Army, 1861-1914** *Bayonets before Bullets* is the first comprehensive institutional and operational history of the Imperial Russian Army during the crucial period of its modernization, 1861-1914. Bruce W. Menning surveys the development of organization, doctrine, and strategy from the aftermath of Russia's defeat in the Crimean War through the wars against Turkey in 1877-1878 and Japan in 1904-1905, to the eve of World War I. Describing how the Russian army organized, trained, and armed itself to fight during a critical era of change, Menning weaves analysis of reforms in technology and military art with lively accounts of combat operations and portraits of the personalities involved. Enhanced by superb battlefield maps, operational diagrams, and rare photographs of the leading Russian military commanders, *Bayonets before Bullets* provides a fascinating account of how the Imperial Russian Army struggled to modernize in a Darwinian world that dealt harshly with those who failed to adapt to changes in technology and military art. **Modelling and Assessing Vocabulary Knowledge Brings together contributions from internationally-renowned researchers on new approaches and developments in the field of vocabulary research and testing.**
