CASH BOX

THE INVENTION AND GLOBALIZATION OF THE ATM

"Any historical account of banking business, tech or self service would be incomplete without the story of the ATM. Though invented almost five decades ago, this simple machine has survived competing technologies, evolving consumer habits and cultural shifts. ... The book unravels the machine's invention story and reveals intriguing historical facts: How the PIN came to be ... How the machine has thrived despite massive regulation and fraud; The story of the global ATM Industry Association; The truth about the cashless society."-- Jacket flap.

MANAGEMENT AND COMPUTER SYSTEMS

CRITICAL CARE MEDICINE

THE ESSENTIALS

Lippincott Williams & Wilkins Ideally suited for students in critical care rotations and residents, this concise, practical handbook presents the essentials of medical and surgical critical care in an easy-to-read format. The authors succinctly explain the pathophysiology underlying clinical disorders and the key principles of diagnosis and patient management, emphasizing cost-effective approaches. The Fourth Edition includes Controversies in Critical Care boxes in many chapters, which briefly summarize opposing arguments on controversial points. Other highlights include enhanced discussion of CT for abdominal disorders, new ACLS guidelines, and new material on removable IVC filters, interventional radiologic techniques for GI bleeding, and use of vascular ultrasound.

THE HIMALAYAN GAZETTEER

CATEGORY FRAUD

Studios have been gaming the Oscar nominations for years - it's time the Academy took action! "Category fraud," Guy Lodge wrote in *Variety*, is "the practice of campaigning a leading performance in a supporting category (or, more rarely, vice versa) to increase an actor's chances of a nomination or win - and, in some cases, to avoid competition." There have been instances of category fraud ever since the Academy introduced the Best Supporting Actor and Best Supporting Actress categories in 1936 to honour the work of character actors and featured players without them having to compete at the Oscars with famous movie stars. In recent years, however, as awards season campaigns have become a ruthless and expensive business, category fraud has become more common and egregious. With publicists taking any opportunity to secure nominations for their famous clients, many lesser-known performers are missing out on well-deserved recognition at the Oscars. Supporting performers are being pushed aside by famous stars in co-lead roles, backed by powerful studios and well-funded 'for your consideration' campaigns. When studios first began promoting established stars in co-lead roles for the supporting categories in the 1950s, influential figures in the Screen Actors Guild protested and the Academy was forced to change its rules. Once the controversy subsided, however, the reform was repealed. Half a

century later the practice is back: bigger and uglier than ever. Category Fraud charts the controversial history of this betrayal of the original reason for the introduction of the supporting categories and argues that it's once again time the Academy took action."

HANDBOOK OF CRITICAL CARE

Springer Science & Business Media Previously published as Handbook of Critical Care by CMG this book is a pocket-sized basic intensive care manual. The handbook is divided into 15 chapters, eight substantial ones covering the major organ systems, as well as infection, nutrition, physical injury and toxicology, and brief chapters on scoring systems and obstetrics. Many of the sections are loaded with very clear pictures, comparative tables, diagrams and lists, and provide more than adequate information for juniors training in intensive care medicine. The definitions, aetiology, clinical features and differential diagnoses are well covered. Excellent use is made of bullet points and numbering, which vastly increases the clarity of presentation compared with many other books that are pitched at a similar audience.

LEARNED BRAIN SELF-REGULATION FOR EMOTIONAL PROCESSING AND ATTENTIONAL MODULATION: FROM THEORY TO CLINICAL APPLICATIONS

Frontiers Media SA Mounting evidence in the last years has demonstrated that self-regulation of brain activity can successfully be achieved by neurofeedback (NF). These methodologies have constituted themselves as new tools for cognitive neuroscience establishing causal links between voluntary brain activations and cognition and behavior, and as potential novel approaches for clinical applications in severe neuropsychiatric disorders (e.g. schizophrenia, depression, Parkinson's disease, etc.). Current developments of brain imaging-based neurofeedback include the study of the behavioral modifications and neural reorganization produced by learned regulation of the activity of circumscribed brain regions and neuronal network activations. In a rapidly developing field, many open questions and controversies have arisen, i.e. choosing the proper experimental design, the adequate use of control conditions and subjects, the mechanism of learning involved in brain self-regulation, and the still unexplored potential long-lasting effect on brain reorganization and clinical alleviation, among others. This special issue on self-regulation of the brain of emotion and attention using NF approaches interested authors to report technical and methodological advances, scientific investigations in understanding the relation between brain activity and behaviour using NF, and finally studies developing clinical treatment of emotional and attentional disorders. The editors of this special issue anticipate rapid developments in this emerging field.

WHAT IS MONEY?

"[What is Money? and The Credit Theory of Money is] the best pair of articles on the nature of money written in the twentieth century." -L. Randall Wray, professor of Economics, Bard College (2004) What is Money? (1913) is one of two important articles written by British economist Alfred Mitchell-Innes about money and credit. This publication includes a positive review by John Maynard Keynes. Together with Mitchell-Innes' other article, The Credit Theory of Money (also available from Cosimo Classics), it influenced Modern Monetary Theory, which states that governments can print as much money as they need without having to borrow or tax to finance spending. What is Money? is essential reading for students of monetary theories and economic history.

INDIAN KITCHEN: SECRETS OF INDIAN HOME COOKING

Hachette UK Jamie Oliver: 'I love Maunika's cooking. Her food is a joy - she makes incredible Indian food really achievable at home. A fantastic Indian cookbook.' Yotam Ottolenghi: 'Reading Maunika's book feels as though you're actually sitting in an Indian family kitchen, sharing stories and recipes. I've been inspired by her to make my own paneer and to play with pickled watermelon rind. Delightful!' Growing up in Mumbai, Maunika Gowardhan learned the secrets of home cooking, Indian-style. Now living in the UK, Maunika is often asked, 'what do Indians cook on a day to day basis?' And, 'how is it that you can rustle up a curry for an everyday meal when you're so busy?' The answer is in chapters of this book. Hungry include recipes made from easy-to-find ingredients for when you're starving and short of time. And Lazy contains recipes for when you want something a bit slower, a bit comforting, but still straightforward. Indian food is also about feasting, so when you have the luxury of time and want to put some real love into a meal at the weekend, you can turn to Indulgent, or when you have friends and family coming over then Celebratory is the chapter for you. Whatever your mood, Indian Kitchen will inspire you to add Indian cooking into your weekly menu.
