Hunter's Horn Michigan State University Press is proud to announce the re-release of Harriette Simpson Arnow's 1949 novel Hunter's Horn, a work that Joyce Carol Oates called "our most unpretentious American masterpiece." In Hunter's Horn, Arnow has written the quintessential account of Kentucky hill people—the quintessential novel of Southern Appalachian farmers, foxhunters, foxhounds, women, and children. New York Times reviewer Hirschel Brickell declared that Arnow "writes...as effortlessly as a bird sings, and the warmth, beauty, the sadness and the ache of life itself are not even once absent from her pages." Arnow writes about Kentucky in the way that William Faulkner writes about Mississippi, that Flannery O'Connor writes about Georgia, or that Willa Cather writes about Nebraska—with studied realism, with landscapes and characters that take on mythic proportions, with humor, and with memorable and remarkable attention to details of the human heart that motivate literature. They begin with state space tools for analysis and design, including stability of solutions, Lyapunov functions, reachability, state feedback observability, and estimators. The matrix exponential plays a central role in the analysis of linear control systems, allowing a concise development of many of the key concepts for this class of models. Åström and Murray then develop and explain tools in the frequency domain, including transfer functions, Nyquist analysis, PID control, frequency domain design, and robustness. Features a new chapter on design principles and tools, illustrating the types of problems that can be solved using feedback Includes a new chapter on fundamental limits and new material on the Routh-Hurwitz criterion and root locus plots Provides exercises at the end of every chapter Comes with an electronic solutions manual An ideal textbook for undergraduate and graduate students Indispensable for researchers seeking a self-contained resource on control theory Moody's Manual of Investments American and Foreign American government securities); 1928-53 in 5 annual vols.: [v.1] Railroad securities (1952-53.
