MODERN DIESEL TECHNOLOGY

Through a carefully-maintained "building block" approach, this text offers an easy-to-understand guide to automotive, truck, and heavy equipment diesel engine technology in a single, comprehensive volume. Text focus is on state-of-the-art technology, as well as on the fundamental principles underlying today's technological advances in service and repair procedures. Industry accepted practices are identified; and, readers are encouraged to formulate a sound understanding of both the "why" and the "how" of modern diesel engines and equipment. Thorough, up-to-date treatment of diesel technology encompasses major advancements in the field, especially recent developments in the use of electronics in

heavy-duty trucks, off-highway equipment, and marine applications. The text's primary focus is on state-of-the-art "electronic fuel injection" systems such as those being used by such manufacturers as Caterpillar, Cummins, Detroit Diesel, Volvo, and Mack. A systematic, structured organization helps readers learn step-by-step, beginning with engine systems, and working logically through intake/exhaust, cooling, lubrication, and fuel injection systems, highlighting major changes in today's modern engines.

SOUTHEAST ASIA CRUISING GUIDE

[Imray, Laurie, Norie and Wilson Ltd](#) The only guide to Southeast Asia that covers the entire length and breadth of a region frequently visited by round-the-world sailors, many of whom leave Australia to head west. This 2008 edition concentrates on the most frequented routes and includes the most popular stops. There are hundreds of possible anchorages, the most popular of which are usefully summarised in tables. Introductory sections cover planning and the last part of the book deals with more general topics including advice on provisioning and the problems that are often faced by cruisers. Stephen Morgan and Elaine Davies first arrived in the region over 30 years ago. They work in Hong Kong- Stephen Davies as Director of the Hong Kong Maritime Museum and Elaine Morgan as a writer and editor. While this pilot is aimed at yachtsmen and indeed was surveyed from the Davies/Morgan yacht, it is just as relevant to the commercial or military mariner. The part of the world described in this work is one of the most interesting on our planet. Culturally, scenically, climatically and commercially- it has everything. This excellent book - now in its second edition, describes it all very enticingly. Set to the usual high standard of the Imray pilots that precede it, this one is spiced up by the wit and anecdotes the authors are so good at.
