SCANNING THE SKIES

A HISTORY OF TORNADO FORECASTING

University of Oklahoma Press *Tornadoes, nature's most violent and unpredictable storms, descend from the clouds nearly one thousand times yearly and have claimed eighteen thousand American lives since 1880. However, the U.S. Weather Bureau--fearing public panic and believing tornadoes were too fleeting for meteorologists to predict--forbade the use of the word "tornado" in forecasts until 1938. Scanning the Skies traces the history of today's tornado warning system, a unique program that integrates federal, state, and local governments, privately controlled broadcast media, and individuals. Bradford examines the ways in which the tornado warning system has grown from meager beginnings into a program that protects millions of Americans each year. Although no tornado forecasting program existed before WWII, the needs of the military prompted the development of a severe weather warning system in tornado prone areas. Bradford traces the post-war creation of the Air Force centralized tornado forecasting program and its civilian counterpart at the Weather Bureau. Improvements in communication, especially the increasing popularity of television, allowed the Bureau to expand its warning system further. This book highlights the modern tornado watch system and explains how advancements during the latter half of the twentieth-century--such as computerized data collection and processing systems, Doppler radar, state-of-the-art television weather centers, and an extensive public education program--have resulted in the drastic reduction of tornado fatalities.*

HOW TO HOOK AND LAUNCH

TRACTION MODS FOR STREET & STRIP

CarTech Inc *While building big horsepower has become easier, putting that power down to the pavement is still quite a challenge. Getting great "bite" involves a lot more than sticky tires and a smoky burnout. The suspension system is being put to work in a way it was never designed to operate. A better understanding of exactly what is happening to the suspension when the car launches from a standing start will assist you in maximizing your car's effectiveness on the street or at the track. In How to Hook and Launch: Traction Mods for the Street & Strip, author Dick Miller explains the physics behind what gets a car moving from a standing start, and how to best harness the various powers at work. Getting the rear tires to really bite and gain maximum traction is divided into several small steps, and Miller walks you through each phase of the launch. Today's enthusiasts face a wide range of potential traction improvements, from softer tires and basic bolt-ons to complete or partial chassis replacements. Most opt for something in-between, where some well-engineered components are chosen to replace the factory equipment and offer a greater capability and range of adjustment. It is this range of upgrades where Miller spends most of his time, explaining what the parts and pieces do, and how to use them to their highest potential.*

DIGGING FOR HISTORY AT OLD WASHINGTON

University of Arkansas Press *Positioned along the legendary Southwest Trail, the town of Washington in Hempstead County in southwest Arkansas was a thriving center of commerce, business, and county government in the nineteenth century. Historical figures*

such as Davy Crockett and Sam Houston passed through, and during the Civil War, when the Federal troops occupied Little Rock, the Hempstead County Courthouse in Washington served as the seat of state government. A prosperous town fully involved in the events and society of the territorial, antebellum, Civil War, and Reconstruction eras, Washington became in a way frozen in time by a series of events including two fires, a tornado, and being bypassed by the railroad in 1874. Now an Arkansas State Park and National Historic Landmark, Washington has been studied by the Arkansas Archeological Survey over the past twenty-five years. *Digging for History at Old Washington* joins the historical record with archaeological findings such as uncovered construction details, evidence of lost buildings, and remnants of everyday objects. Of particular interest are the homes of Abraham Block, a Jewish merchant originally from New Orleans, and Simon Sanders from North Carolina, who became the town's county clerk. The public and private lives of the Block and Sanders families provide a fascinating look at an antebellum town at the height of its prosperity.

OLDSMOBILE V-8 ENGINES

HOW TO BUILD MAX PERFORMANCE

CarTech Inc The traditional Oldsmobile V-8 powered some of the most memorable cars of the muscle car era, from the 442s of the 1960s and early 1970s to the Trans Ams of the late 1970s. These powerful V-8s were also popular in ski boats. They have found a new lease on life with the recent development of improved aftermarket cylinder heads, aggressive roller camshafts, and electronic fuel injection. Author Bill Trovato is recognized as being one of the most successful Oldsmobile engine experts, and he openly shares all of his proven tricks, tips, and techniques for this venerable power plant. In this revised edition of *Oldsmobile V-8 Engines: How to Build Max Performance*, he provides additional information for extracting the best performance. In particular, he goes into greater detail on ignition systems and other areas of performance. His many years of winning with the Olds V-8 in heads-up, street-legal cars proves he knows how to extract maximum power from the design without sacrificing durability. A complete review of factory blocks, cranks, heads, and more is teamed with a thorough review of available aftermarket equipment. Whether mild or wild, the important information on cam selection and Olds-specific engine building techniques are all here. Fans of the traditional Olds V-8 will appreciate the level of detail and completeness Trovato brings to the table, and his frank, to-the-point writing style is as efficient and effective as the engines he designs, builds, and races. Anyone considering an Oldsmobile V-8 to power their ride will save time, money, and headaches by following the clear and honest advice offered in *Oldsmobile V-8 Engines: How to Build Max Performance*. Plenty of full-color photos and step-by-step engine builds showcase exactly how these engines should be built to deliver the most power per dollar.

CARS OF THE STARS

TELEVISION WEATHERCASTING

A HISTORY

McFarland & Company Incorporated Pub *Will it rain tomorrow?* That perennial question has made weather the most popular segment of local television news for years. Yet weathercasters do far more than simply convey the latest outlook. Depending on the circumstances, they may inject humor into the forecast (having a Lhasa apso pant and wag its tail during the forecast, for instance), warn of a life-threatening tornado or hurricane, or instruct viewers on the science behind weather. This book, the first critically to examine weathercasters and their craft, is based on years of research and covers both the lighthearted and serious aspects of television weather. Chapters include pioneer weathercasters of the 1940s and 1950s, technical advances, interaction with the National Weather Service, severe weather coverage, celebrities who began with television weather, and the status of women and minorities in weathercasting.

EMERGENCY STOPPING & OTHER STORIES

Fiction "When a man living at the river's edge encounters a woman from the mortgage company, he realizes he hasn't spoken aloud for weeks. Another man looks into his long-absent father's face and discovers a terrifying truth. In this debut collection, Jeff Vande Zande portrays honest, hardworking folks who have had the rug pulled out from under them..Vande Zande sympathetically traces the patterns of ordinary lives until a quiet wisdom arises from the age"--Bonnie Jo Campbell. "while many of these stories concern themselves with the world of work, on a broader level, they are about the mysteries of who we are, and who we become. Vande Zande's powers of observation and empathy, his eye for the revealing detail, the feeling of raw authenticity his dialogue creates, all make this a memorable collection that should be read, and reread"--Jim Daniels.
