HANDBOOK OF AFRICAN MEDICINAL PLANTS, SECOND EDITION

[CRC Press](#) With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.

SELECTED WATER RESOURCES ABSTRACTS

GLOBAL STRATEGY FOR INFANT AND YOUNG CHILD FEEDING

[World Health Organization](#) WHO and UNICEF jointly developed this global strategy to focus world attention on the impact that feeding practices have on the nutritional status, growth and development, health, and thus the very survival of infants and young children. The strategy is the result of a comprehensive two-year participatory process. It is based on the evidence of nutrition's significance in the early months and years of life, and of the crucial role that appropriate feeding practices play in achieving optimal health outcomes. The strategy is intended as a guide for action; it identifies interventions with a proven positive impact; it emphasizes providing mothers and families the support they need to carry out their crucial roles, and it explicitly defines the obligations and responsibilities in this regard of governments, international organizations, and other concerned parties.

THE IMPACT OF DISASTERS AND CRISES ON AGRICULTURE AND FOOD SECURITY: 2021

[Food & Agriculture Org.](#) On top of a decade of exacerbated disaster loss, exceptional global heat, retreating ice and rising sea levels, humanity and our food security face a range of new and unprecedented hazards, such as megafires, extreme weather events, desert locust swarms of magnitudes previously unseen, and the COVID-19 pandemic. Agriculture underpins the livelihoods of over 2.5 billion people – most of them in low-income developing countries – and remains a key driver of development. At no other point in history has agriculture been faced with such an array of familiar and unfamiliar risks, interacting in a hyperconnected world and a precipitously changing landscape. And agriculture continues to absorb a disproportionate share of the damage and loss wrought by disasters. Their

growing frequency and intensity, along with the systemic nature of risk, are upending people's lives, devastating livelihoods, and jeopardizing our entire food system. This report makes a powerful case for investing in resilience and disaster risk reduction – especially data gathering and analysis for evidence informed action – to ensure agriculture's crucial role in achieving the future we want.

THE PALGRAVE HANDBOOK OF WINE INDUSTRY ECONOMICS

Springer This Palgrave Handbook offers the first international comparative study into the efficiency of the industrial organization of the global wine industry. Looking at several important vineyards of the main wine countries, the contributors analyze differences in implementation and articulation of three key stages: grape production, wine making and distribution (marketing, selling and logistics). By examining regulations, organization theory, industry organizational efficiency and vertical integration, up to date strategies in the sector are presented and appraised. Which models are most efficient? What are the most relevant factors for optimal performance? How do reputation and governance impact the industry? Should different models co-exist within the wine countries for global success? This comprehensive volume is essential reading for students, researchers and professionals in the wine industry.

CONCISE WORLD ATLAS

Penguin Find out all about our world today with the new edition of this reference atlas From the defining boundaries of the Balkan states to the icy terrain of Antarctica over 400 maps created with the latest digital mapping techniques and satellite data are combined to bring you Earth in more detail than ever before. Terrain models reveal physical features, while informative text, photographs and diagrams provide a superb overview of the physical, political, economic and demographic geography of the world. Detailed fact files on all 193 nations, including each region's land use, industrial activities and population distribution. Plus a 75,000 index-gazetteer makes this an essential desktop reference for business, home, or school use. Visit www.dk.com/worldfactfile to find out more about the world's 193 countries, from maps and historical information to up-to-date statistics.

INFANT AND YOUNG CHILD FEEDING

MODEL CHAPTER FOR TEXTBOOKS FOR MEDICAL STUDENTS AND ALLIED HEALTH PROFESSIONALS

The Model Chapter on Infant and Young Child Feeding is intended for use in basic training of health professionals. It describes essential knowledge and basic skills that every health professional who works with mothers and young children should master. The Model Chapter can be used by teachers and students as a complement to textbooks or as a concise reference manual.

CREATING SUSTAINABLE BIOECONOMIES

THE BIOSCIENCE REVOLUTION IN EUROPE AND AFRICA

Taylor & Francis The growing global demand for food, feed and bio-based renewable material is changing the conditions for agricultural production worldwide. At the same time, revolutionary achievements in the field of biosciences are contributing to a transition whereby bio-based alternatives for energy and materials are becoming more competitive. Creating Sustainable Bioeconomies explores the prospects for biosciences and how its innovation has the potential to help countries in the North (Europe) and the South (Africa) to move towards resource efficient agriculture and sustainable bioeconomies. Throughout the book, the situations of Europe and Sub-Saharan Africa will be compared and contrasted, and opportunities for mutual learning and collaboration are explored. The chapters have been written by high profile authors and deal with a wide range of issues affecting the development of bioeconomies on both continents. This book compares and contrasts the situations of these two regions as they endeavour to develop knowledge based bioeconomies. This volume is suitable for those who are interested in ecological economics, development economics and environmental economics. It also provides action plans assisting policy-makers in both areas to support the transition to knowledge based and sustainable bioeconomies.

PULMONARY VASCULAR DISEASE

Elsevier Health Sciences Offers a current and comprehensive review of the pathophysiology, diagnosis, and treatment of pulmonary hypertension and venous thromboembolism. Discusses indepth the pharmacologic and non-pharmacologic therapies used in the treatment of pulmonary vascular disease -- including the benefits and risks of each -- allowing for more informed care decisions.

MARRIAGE AND FAMILY

PERSPECTIVES AND COMPLEXITIES

Columbia University Press Family life has been radically transformed over the past three decades. Half of all households are unmarried, while only a quarter of all married households have kids. A third of the nation's births are to unwed mothers, and a third of America's married men earn less than their wives. With half of all women cohabitating before they turn thirty and gay and lesbian couples settling down with increasing visibility, there couldn't be a better time for a book that tracks new conceptions of marriage and family as they are being formed. The editors of this volume explore the motivation to marry and the role of matrimony in a diverse group of men and women. They compare empirical data from several emerging family types (single, co-parent, gay and lesbian, among others) to studies of traditional nuclear families, and they consider the effect of public policy and recent economic developments on the practice of marriage and the stabilization or destabilization of family. Approaching this topic from a variety of perspectives, including historical, cross-cultural, gendered, demographic, socio-biological, and social-psychological viewpoints, the editors highlight the complexity of the modern American family and the growing indeterminacy of its boundaries. Refusing to adhere to any one position, the editors provide an unbiased account of contemporary marriage and family.

DIASPORA, FOOD AND IDENTITY

NIGERIAN MIGRANTS IN BELGIUM

P.I.E-Peter Lang S.A., Editions Scientifiques Internationales This book questions the relationship between what Nigerian migrants in the diaspora eat, their self-perception and how they engage with outsiders. Yet, food plays a prominent role: on the one hand, it contributes to the affirmation of Nigerian feelings, and on the other hand, food serves as a means of communication with the host country.

DESIGN AND CONSTRUCTION OF BRIDGE APPROACHES

Transportation Research Board This synthesis will be of interest to geotechnical, bridge construction, and maintenance engineers and others interested in design, construction, and maintenance of embankment approaches to bridge abutments. Information is provided on available techniques to minimize problems associated with the bump at the end of the bridge. The transition from a roadway to a bridge structure entails design, construction, and maintenance problems. This report of the Transportation Research Board describes

those problems as well as the many solutions that are applicable to specific situations.

OBSTETRIC MEDICINE

A PROBLEM-BASED APPROACH

Springer Science & Business Media Recognition of the importance of maternal medicine is now reflected in the content of the MRCOG exam, core training and higher training in both obstetrics and medicine. This book approaches obstetric medicine from the point of view of real patients and clinical scenarios as well as model answers to exam questions. The book will be invaluable for trainees and consultants who want to 'test themselves'.

AFRICAN ENCYCLOPEDIA

London ; Toronto : Oxford University Press African and British scholars, scientists, and government officials present articles on topics ranging from African history and social studies to astronomy and physics

CLINICAL MANAGEMENT OF MALE INFERTILITY

Springer This book provides andrologists and other practitioners with reliable, up-to-date information on all aspects of male infertility and is designed to assist in the clinical management of patients. Clear guidance is offered on classification of infertility, sperm analysis interpretation and diagnosis. The full range of types and causes of male infertility are then discussed in depth. Particular attention is devoted to poorly understood conditions such as unexplained couple infertility and idiopathic male infertility, but the roles of diverse disorders, health and lifestyle factors and environmental pollution are also fully explored. Research considered stimulating for the reader is highlighted, reflecting the fascinating and controversial nature of the field. International treatment guidelines are presented and the role of diet and dietary supplements is discussed in view of their increasing importance. Clinicians will find that the book's straightforward approach ensures that it can be easily and rapidly consulted.

HORTICULTURAL ABSTRACTS

TROPICAL VETERINARIAN

PEDIATRIC LYMPHOMAS

Springer Science & Business Media This is a comprehensive textbook of Hodgkin's and non-Hodgkin's lymphomas written by leaders in the field of childhood lymphomas. It includes clinical, pathologic and molecular biology of each subtype of lymphoma. The pathology chapters are comprehensive and include excellent photographs. The book is at the level of subspecialists in pediatric hematology and oncology, radiation oncology, pediatric surgery and hematopathology.

BRITISH MEDICAL JOURNAL

DEVELOPMENT AND THE NEXT GENERATION

World Bank Publications "The theme of The World Development Report 2007 is youth - young people between the ages of 12 to 24. As this population group seeks identity and independence, they make decisions that affect not only their own well-being, but that of others, and they do this in a rapidly changing demographic and socio-economic environment. Supporting young people's transition to adulthood poses important opportunities and risky challenges for development policy. Are education systems preparing young people to cope with the demands of changing economies? What kind of support do they get as they enter the labor market? Can they move freely to where the jobs are? What can be done to help them avoid serious consequences of risky behavior, such as death from HIV-AIDS and drug abuse? Can their creative energy be directed productively to support development thinking? The report will focus on crucial capabilities and transitions in a young person's life: learning for life and work, staying healthy, working, forming families, and exercising citizenship. For each, there are opportunities and risks; for all, policies and institutions matter."

ACTA VETERINARIA SCANDINAVICA JULY-SEPTEMBER 2013

This book contains open access research articles from July-September of 2013 published in Acta Veterinaria Scandinavica. Topics include: Farming practices in Sweden related to feeding milk and colostrum from cows treated with antimicrobials to dairy calves; Theileria annae in a young Swedish dog; An unusual case of a mature teratoma on the left perineal region of a young cat: surgical treatment and pathological description; A retrospective study of clinical signs and epidemiology of chronic valve disease in a group of 207 Dachshunds in Poland; Phenotypic and genotypic identification of streptococci and related bacteria isolated from bovine intramammary infections; Effect of polyoxyethylene and polyoxypropylene nonionic block copolymers on performance and recruitment of immune cell subsets in weaned pigs; Relationship between herd-level incidence rate of energy-related postpartum diseases, general risk factors and claw lesions in individual dairy cows recorded at maintenance claw trimming; Prevalence of bovine genital campylobacteriosis and trichomonosis of bulls in northern Nigeria; Persistent organic pollutants in meat, liver, tallow and bone marrow from semi-domesticated reindeer (Rangifer tarandus tarandus L.) in Northern Norway; Plasma total antioxidant status in horses after 8-hours of road transportation; Physiological responses of young thoroughbred horses to intermittent high-intensity treadmill training; Assessment of postoperative pain after unilateral mastectomy using two different surgical techniques in dogs; Occurrence and characterization of methicillin-resistant staphylococci from bovine mastitis milk samples in Finland; Factors influencing the cell adhesion and invasion capacity of Mycoplasma gallisepticum; Multiple dermoid sinuses of type Vb and IIIb on the head of a Saint Bernard dog; Seminal plasma did not influence the presence of transforming growth factor-beta1, interleukine-10 and

interleukin-6 in porcine follicles shortly after insemination; Canine parvovirus type 2c identified from an outbreak of severe gastroenteritis in a litter in Sweden; Prevalence of antibodies against Leptospira sp. in snakes, lizards and turtles in Slovenia; Haemorrhagic pneumonia in sled dogs caused by Streptococcus equi subsp. zooepidemicus - one fatality and two full recoveries: a case report; Ultrasonography of the spleen, liver, gallbladder, caudal vena cava and portal vein in healthy calves from birth to 104 days of age; The first detection of influenza in the Finnish pig population: a retrospective study; Looking for prognosticators in ovine anaplasmosis: discriminant analysis of clinical and haematological parameters in lambs belonging to differently susceptible breeds experimentally infected with Anaplasma ovis; The presence of heat-labile factors interfering with binding analysis of fibrinogen with ferritin in horse plasma.
