IGEN

WHY TODAY'S SUPER-CONNECTED KIDS ARE GROWING UP LESS REBELLIOUS, MORE TOLERANT, LESS HAPPY--AND COMPLETELY UNPREPARED FOR ADULTHOOD--AND WHAT THAT MEANS FOR THE REST OF US

Simon and Schuster As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we

all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen goes, so goes our nation—and the world.

INVESTING IN CULTURAL DIVERSITY AND INTERCULTURAL DIALOGUE

UNESCO This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

THE BRAIN THAT CHANGES ITSELF

STORIES OF PERSONAL TRIUMPH FROM THE FRONTIERS OF BRAIN SCIENCE

Penguin “Fascinating. Doidge’s book is a remarkable and hopeful portrait of the endless adaptability of the human brain.”—Oliver Sacks, MD, author of *The Man Who Mistook His Wife for a Hat* What is neuroplasticity? Is it possible to change your brain? Norman Doidge’s inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they’ve transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

THE BOY ON THE WOODEN BOX

HOW THE IMPOSSIBLE BECAME POSSIBLE . . . ON SCHINDLER'S LIST

Simon and Schuster Leon Leyson (born Leib Lezjon) was only ten years old when the Nazis invaded Poland and his family was forced to relocate to the Krakow ghetto. With incredible luck, perseverance and grit, Leyson was able to survive the sadism of the Nazis, including that of the demonic Amon Goeth, commandant of Plaszow, the concentration camp outside Krakow. Ultimately, it was the generosity and cunning of one man, a man named Oskar Schindler, who saved Leon Leyson's life, and the lives of his mother, his father, and two of his four siblings, by adding their names to his list of workers in his factory - a list that became world renowned: Schindler's List. This, the only memoir published by a former Schindler's List child, perfectly captures the innocence of a small boy who goes through the unthinkable. Most notable is the lack of rancour, the lack of

venom, and the abundance of dignity in Mr Leyson's telling. The Boy on the Wooden Box is a legacy of hope, a memoir unlike anything you've ever read.

About the Book: The Most Dangerous Game, also published as The Hounds of Zaroff, is a short story by Richard Connell first published in Collier's magazine on January 19, 1924. It features a big-game hunter from New York who falls off a yacht and swims to an isolated island in the Caribbean where he is hunted by a Cossack aristocrat. The story is an adaptation of the big-game hunting safaris in Africa and South America that were fashionable among wealthy Americans in the 1920s. Big-game hunter Sanger Rainsford and his friend, Whitney, are traveling to the Amazon rainforest for a jaguar hunt. After a discussion about how they are "the hunters" instead of "the hunted," Whitney goes to bed and Rainsford hears gunshots. He climbs onto the yacht's rail and accidentally falls overboard, swimming to Ship-Trap Island, which is notorious for shipwrecks. On the island, he finds a palatial chateau inhabited by two Cossacks: the owner, General Zaroff, and his gigantic deaf-mute servant, Ivan. Zaroff, another big-game hunter, knows of Rainsford from his published account of hunting snow leopards in Tibet. Over dinner, the middle-aged Zaroff explains that although he has been hunting animals since he was a boy, he has decided that killing big-game has become boring for him, so after escaping the Russian Revolution he moved to Ship-Trap Island and set it up to trick ships into wrecking themselves on the jagged rocks that surround it. He takes the survivors captive and hunts them for sport, giving them food, clothing, a knife, and a three-hour head start, and using only a small-caliber pistol for himself. Any captives who can elude Zaroff, Ivan, and a

pack of hunting dogs for three days are set free. He reveals that he has won every hunt to date. Captives are offered a choice between being hunted or turned over to Ivan, who once served as official knouter for The Great White Czar. Rainsford denounces the hunt as barbarism, but Zaroff replies by claiming that "life is for the strong." Realizing he has no way out, Rainsford reluctantly agrees to be hunted. During his head start, Rainsford lays an intricate trail in the forest and then climbs a tree. Zaroff finds him easily, but decides to play with him as a cat would with a mouse, standing underneath the tree Rainsford is hiding in, smoking a cigarette, and then abruptly departing. After the failed attempt at eluding Zaroff, Rainsford builds a Malay man-catcher, a weighted log attached to a trigger. This contraption injures Zaroff's shoulder, causing him to return home for the night, but he shouts his respect for the trap before departing. The next day Rainsford creates a Burmese tiger pit, which kills one of Zaroff's hounds. He sacrifices his knife and ties it to a sapling to make another trap, which kills Ivan when he stumbles into it. To escape Zaroff and his approaching hounds, Rainsford dives off a cliff into the sea; Zaroff, disappointed at Rainsford's apparent suicide, returns home. Zaroff smokes a pipe by his fireplace, but two issues keep him from the peace of mind: the difficulty of replacing Ivan and the uncertainty of whether Rainsford perished in his dive. About the Author : Richard Edward Connell, Jr. was an American author and journalist, best known for his short story "The Most Dangerous Game." Connell was one of the best-known American short story writers of his time and his stories appeared in the Saturday Evening Post and Collier's Weekly. Connell had equal success as a journalist and screenwriter. He was nominated for an Academy Award in 1942 for best original story for the film Meet John Doe.

MAN, PLAY, AND GAMES

University of Illinois Press Play is "an occasion of pure waste: waste of time, energy, ingenuity, skill, and often of money." It is also an essential element of human social and spiritual development. In this study, Roger Caillois defines play as a voluntary activity that occurs in a pure space, isolated and protected from the rest of life. Within limits set by rules that provide a level playing field, players move toward an unpredictable outcome by responding to their opponents' actions. Caillois qualifies types of games and ways of playing, from the improvisation characteristic of children's play to the disciplined pursuit of solutions to gratuitously difficult puzzles. He also examines the means by which games become part of daily life, ultimately giving cultures their most characteristic customs and institutions.

CLOSING OF THE AMERICAN MIND

Simon and Schuster The brilliant, controversial, bestselling critique of American culture that “hits with the approximate force and effect of electroshock therapy” (The New York Times)—now featuring a new afterword by Andrew Ferguson in a twenty-fifth anniversary edition. In 1987, eminent political philosopher Allan Bloom published *The Closing of the American Mind*, an appraisal of contemporary America that “hits with the approximate force and effect of electroshock therapy” (The New York Times) and has not only been vindicated, but has also become more urgent today. In clear, spirited prose, Bloom argues that the social and political crises of contemporary America are part of a larger intellectual crisis: the result of a dangerous narrowing of curiosity and exploration by the university elites. Now, in this twenty-fifth anniversary edition, acclaimed author and journalist Andrew Ferguson contributes a new essay that describes why Bloom’s argument caused such a furor at publication and why our culture so deeply resists its truths today.

FRACTURED LANDS

HOW THE ARAB WORLD CAME APART

Anchor From the bestselling author of *Lawrence in Arabia*, a piercing account of how the contemporary Arab world came to be riven by

catastrophe since the 2003 United States invasion of Iraq. In 2011, a series of anti-government uprisings shook the Middle East and North Africa in what would become known as the Arab Spring. Few could predict that these convulsions, initially hailed in the West as a triumph of democracy, would give way to brutal civil war, the terrors of the Islamic State, and a global refugee crisis. But, as New York Times bestselling author Scott Anderson shows, the seeds of catastrophe had been sown long before. In this gripping account, Anderson examines the myriad complex causes of the region's profound unraveling, tracing the ideological conflicts of the present to their origins in the United States invasion of Iraq in 2003 and beyond. From this investigation emerges a rare view into a land in upheaval through the eyes of six individuals—the matriarch of a dissident Egyptian family; a Libyan Air Force cadet with divided loyalties; a Kurdish physician from a prominent warrior clan; a Syrian university student caught in civil war; an Iraqi activist for women's rights; and an Iraqi day laborer-turned-ISIS fighter. A probing and insightful work of reportage, *Fractured Lands* offers a penetrating portrait of the contemporary Arab world and brings the stunning realities of an unprecedented geopolitical tragedy into crystalline focus.

Penguin The definitive history of America's greatest incubator of innovation and the birthplace of some of the 20th century's most influential technologies "Filled with colorful characters and inspiring lessons . . . The Idea Factory explores one of the most critical issues of our time: What causes innovation?" —Walter Isaacson, *The New York Times Book Review* "Compelling . . . Gertner's book offers fascinating evidence for those seeking to understand how a society should best invest its research resources." —*The Wall Street Journal* From its beginnings in the 1920s until its demise in the 1980s, Bell Labs-officially, the research and development wing of AT&T-was the biggest, and arguably the best, laboratory for new ideas in the world. From the transistor to the laser, from digital communications to cellular telephony, it's hard to find an aspect of modern life that hasn't been touched by Bell Labs. In *The Idea Factory*, Jon Gertner traces the origins of some of the twentieth century's most important inventions and delivers a riveting and heretofore untold chapter of American history. At its heart this is a story about the life and work of a small group of brilliant and eccentric men-Mervin Kelly, Bill Shockley, Claude Shannon, John Pierce, and Bill Baker-who spent their careers at Bell Labs. Today, when the drive to invent has become a mantra, Bell Labs offers us a way to enrich our understanding of the challenges and solutions to technological innovation. Here, after all, was where the foundational ideas on the management of innovation were born.

CLUELESS IN ACADEME

HOW SCHOOLING OBSCURES THE LIFE OF THE MIND

Yale University Press Gerald Graff argues that our schools and colleges make the intellectual life seem more opaque, narrowly specialized, and beyond normal learning capacities than it is or needs to be. Left clueless in the academic world, many students view the life of the mind as a secret society for which only an elite few qualify. In a refreshing departure from standard diatribes against academia, Graff shows how academic unintelligibility is unwittingly reinforced not only by academic jargon and obscure writing, but by the disconnection of the curriculum and the failure to exploit the many connections between academia and popular culture. Finally, Graff offers a wealth of practical suggestions for making the culture of ideas and arguments more accessible to students, showing how students can enter the public debates that permeate their lives.

NONSENSE

THE POWER OF NOT KNOWING

Crown An illuminating look at the surprising upside of ambiguity—and how, properly harnessed, it can inspire learning, creativity, even empathy Life today feels more overwhelming and chaotic than ever. Whether it's a confounding work problem or a faltering relationship or an unclear medical diagnosis, we face constant uncertainty. And we're continually bombarded with information, much of it contradictory. Managing ambiguity—in our

jobs, our relationships, and daily lives—is quickly becoming an essential skill. Yet most of us don't know where to begin. As Jamie Holmes shows in *Nonsense*, being confused is unpleasant, so we tend to shutter our minds as we grasp for meaning and stability, especially in stressful circumstances. We're hard-wired to resolve contradictions quickly and extinguish anomalies. This can be useful, of course. When a tiger is chasing you, you can't be indecisive. But as *Nonsense* reveals, our need for closure has its own dangers. It makes us stick to our first answer, which is not always the best, and it makes us search for meaning in the wrong places. When we latch onto fast and easy truths, we lose a vital opportunity to learn something new, solve a hard problem, or see the world from another perspective. In other words, confusion—that uncomfortable mental place—has a hidden upside. We just need to know how to use it. This lively and original book points the way. Over the last few years, new insights from social psychology and cognitive science have deepened our understanding of the role of ambiguity in our lives and Holmes brings this research together for the first time, showing how we can use uncertainty to our advantage. Filled with illuminating stories—from spy games and doomsday cults to Absolut Vodka's ad campaign and the creation of Mad Libs—*Nonsense* promises to transform the way we conduct business, educate our children, and make decisions. In an increasingly unpredictable, complex world, it turns out that what matters most isn't IQ, willpower, or confidence in what we know. It's how we deal with what we don't understand.

THE DIARY OF A YOUNG GIRL

Anchor THE DEFINITIVE EDITION • Discovered in the attic in which she spent the last years of her life, Anne Frank's remarkable diary has since become a world classic—a powerful reminder of the horrors of war and an eloquent testament to the human spirit. Updated for the 75th Anniversary of the Diary's first publication with a new introduction by Nobel Prize-winner Nadia Murad "The single most compelling personal account of the Holocaust ... remains astonishing and excruciating."—The New York Times Book Review In 1942, with Nazis occupying Holland, a thirteen-year-old Jewish girl and her family fled their home in Amsterdam and went into hiding. For the next two years, until their whereabouts were betrayed to the Gestapo, they and another family lived cloistered in the "Secret Annex" of an old office building. Cut off from the outside world, they faced hunger, boredom, the constant cruelties of living in confined quarters, and the ever-present threat of discovery and death. In her diary Anne Frank recorded vivid impressions of her experiences during this period. By turns thoughtful, moving, and amusing, her account offers a fascinating commentary on human courage and frailty and a compelling self-portrait of a sensitive and spirited young woman whose promise was tragically cut short.

NATIONAL IDENTITY, POPULAR CULTURE AND EVERYDAY LIFE

Routledge The Millennium Dome, Braveheart and Rolls Royce cars. How do cultural icons reproduce and transform a sense of national identity? How does national identity vary across time and space, how is it contested, and what has been the impact of globalization upon national identity and culture?This book examines how national identity is represented, performed, spatialized and materialized through popular culture and in everyday life. National identity is revealed to be inherent in the things we often take for granted - from landscapes and eating habits, to tourism, cinema and music. Our specific experience of car ownership and motoring

can enhance a sense of belonging, whilst Hollywood blockbusters and national exhibitions provide contexts for the ongoing, and often contested, process of national identity formation. These and a wealth of other cultural forms and practices are explored, with examples drawn from Scotland, the UK as a whole, India and Mauritius. This book addresses the considerable neglect of popular cultures in recent studies of nationalism and contributes to debates on the relationship between 'high' and 'low' culture.
