*Createspace Independent Publishing Platform* Designed for ground instructors, flight instructors, and aviation maintenance instructors, the Aviation Instructor's Handbook was developed by the Flight Standards Service, Airman Testing Standards Branch, in cooperation with aviation educators and industry to help beginning instructors understand and apply the fundamentals of instruction. This handbook provides aviation instructors with up-to-date information on learning and teaching, and how to relate this information to the task of teaching aeronautical knowledge and skills to students. Experienced aviation instructors will also find the updated information useful for improving their effectiveness in training activities. While this handbook primarily uses the traditional term "student" to denote someone who is seeking certification in aviation, the accepted term in educational psychology is "learners."

### ALL THE AERONAUTICAL KNOWLEDGE REQUIRED TO PASS THE FAA EXAMS AND OPERATE AS A PRIVATE AND COMMERCIAL PILOT

---

*Pilot's Manual* The Pilot's Manual: Ground School will walk you through everything you need to know to pass your FAA Knowledge Exams and earn your pilot certificate. The Fifth Edition of this comprehensive textbook has been updated to reflect current rules, procedures, FAA Airman Certification Standards and technologies including drones, ADS-B, weather services available to pilots and BasicMed. Subjects covered include aerodynamics, the airplane and its performance factors, physiological factors affecting the pilot, weather, regulations, charts and airspace, airport operations, navigation, and flight planning, including specific instructions on how to use the flight computer. Helpful marginal notes are provided for quick definitions of terms, further emphasis of key points, and mnemonic devices that can be of tremendous benefit to study. Each chapter closes with review questions highlighting the important facts. Ninety percent of the material is for the private pilot applicant, and the remaining ten percent, well-separated, will raise you to the commercial pilot certificate standard. Also available in The Pilot's Manual Series: Flight School--How to fly all the maneuvers required for certification Instrument Flying--Aeronautical knowledge and skill required for the Instrument Rating Multi-Engine Flying--Aeronautical knowledge required to earn a Multi-Engine Rating Access to Flight--An integrated Private Certificate and Instrument Rating curriculum Airline Transport Pilot--Complete ATP certification training program

### PRIVATE PILOT AIRMAN CERTIFICATION STANDARDS - AIRPLANE

---

---

### FAA-S-ACS-6, FOR AIRPLANE SINGLE- AND MULTI-ENGINE LAND AND SEA

---

Ravenio Books The Federal Aviation Administration (FAA) has published the Private Pilot - Airplane Airman Certification Standards (ACS) document to communicate the aeronautical knowledge, risk management, and flight proficiency standards for the private pilot certification in the airplane category, single-engine land and sea; and multiengine land and sea classes. This ACS incorporates and supersedes the previous Private Pilot Practical Test Standards for Airplane, FAA-S-8081-14. The FAA views the ACS as the foundation of its transition to a more integrated and systematic approach to airman certification. The ACS is part of the safety management system (SMS) framework that the FAA uses to mitigate risks associated with airman certification training and testing. Specifically, the ACS, associated guidance, and test question components of the airman certification system are constructed around the four functional components of an SMS: Safety Policy that defines and describes aeronautical knowledge, flight proficiency, and risk management as integrated components of the airman certification system; Safety Risk Management processes through which internal and external stakeholders identify and evaluate regulatory changes, safety recommendations and other factors that require modification of airman testing and training materials; Safety Assurance processes to ensure the prompt and appropriate incorporation of changes arising from new regulations and safety recommendations; and Safety Promotion in the form of ongoing engagement with both external stakeholders (e.g., the aviation training industry) and FAA policy divisions. The FAA has developed this ACS and its associated guidance in collaboration with a diverse group of aviation training experts. The goal is to drive a systematic approach to all components of the airman certification system, including knowledge test question development and conduct of the practical test. The FAA acknowledges and appreciates the many hours that these aviation experts have contributed toward this goal. This level of collaboration, a hallmark of a robust safety culture, strengthens and enhances aviation safety at every level of the airman certification system.

### TRUE, WITTY, INSIGHTFUL STORIES ILLUSTRATING THE FUNDAMENTALS OF INSTRUCTING

---

Aviation Supplies & Academics "In addition to demonstrating proficiency as a safe and effective pilot, instructors must be able to teach flight. Communicating effectively and facilitating student learning is at the heart of a flight instructor's job, and this requires a bit of psychology to understand how people learn. All flight (CFI) and ground instructors must take the FAA Fundamentals of Instructing (FOI) Knowledge Exam. The Aviation Instructor's Handbook is the primary reference for this FOI Knowledge Exam and an important text to introduce the needed psychology relative to teaching. However, the basic, hands-on, practical application of the material can be lost in the theoretical coverage. As a result, instructors result to memorizing acronyms for testing, rather than learning how to be an effective instructor. The Flight Instructor's Survival Guide is a companion text for The Aviation Instructor's Handbook allowing instructors to be the proverbial fly-on-the-wall in watching this important information being used to make a safe pilot. Student pilot readers will gain perspective that they aren't the only ones experiencing a particular issue in their flight training. This book is necessary for anyone striving to be aviation-citizens with character, professionalism and ethical values. Delightful and full of wisdom and humor, Arlynn's book is a gift to all flight instructors who will inevitably share or recognize these fundamentals of instructing issues in their own cast of clients"--Provided by publisher.

**A FLIGHT INSTRUCTOR'S GUIDE TO SCENARIO-BASED TRAINING**

---

---

Aviation Supplies & Academics The first comprehensive guide to scenario-based instruction (SBT), this flight instructor's manual combines latest studies and proven practices. The concrete guidelines and tips help flight instructors expand their FAA practical test standards and numerous topics are covered such as systematic risk reduction, critical and evaluation, including past accidents, and tailoring programs to reach specific and individualized goals. Learn how to build effective, creative scenarios for IFR training, advanced training, and instrument proficiency. Using structured scripts, SBT teaches students to consider all aspects of every flight, from beginning to end. Train Like You Fly is packed with scenarios, guidelines and tips that will help flight instructors reach well beyond the FAA Practical Test Standards to help students to train like they fly, so they fly like they train. In this new Second Edition, the author provides specific narrative examples of scenario-based training for each chapter and topic.

**THE SAVVY FLIGHT INSTRUCTOR**

---

---

**SECRETS OF THE SUCCESSFUL CFI**

---

---

Aviation Supplies & Academics You've mastered the FAA handbooks and wrapped up one of the toughest orals of your flying career. You can now fly and talk at the same time, all from the right seat. You can create lesson plans, enter mysterious endorsements in student logbooks, and actually explain the finer points of a lazy eight. That's everything you'll ever need to know in order to flight instruct...or is it? This book is designed to help with all those "other" flight instructing questions, like why and how to become a CFI in the first place, and how to get your first instructing job. Where do flight students come from? And once you've got them, how do you keep them flying? How can you optimize your students' pass rate on checkrides? And how do you get flight customers to come back to you for their advanced ratings? Written by Greg Brown (author of *The Turbine Pilot's Flight Manual and Job Hunting for Pilots*), this Second Edition of *The Savvy Flight Instructor* provides nearly 20 years of additional wisdom, experience, and know-how, and includes new "Finer Points" contributed by industry experts. While this edition retains the key marketing, pilot training, and customer support concepts that made the original edition required CFI reading, those areas have been refined and expanded to incorporate the latest industry philosophies and techniques. Readers will learn how best to sell today's prospects on flying and how to utilize online marketing and social media. Greg Brown lays out tips for offering flight-instructing services with the sophistication of other competitive activities that beckon from just a click away on potential customers' computers and mobile devices. Aspiring flight instructors will learn why and how to qualify, and how to get hired once you earn the certificate. There's extensive coverage of techniques for systematizing customer success and satisfaction policies, strategies for pricing and structuring flight training to fit today's market, integration of affordable simulation technologies into your training programs, and tips for coping with the "CFI shortage." Along with tips on how to attract and retain flight students, the author examines professionalism in flight instructing. In short, *The Savvy Flight Instructor* shows you how to use your instructing activities to increase student satisfaction, promote general aviation, and advance your personal flying career all at the same time. Contributing writers in the new "Finer Points" sections are Heather Baldwin (a commercial pilot and marketing writer), and CFIs Jason Blair (a designated pilot examiner), Ben Eichelberger (a flight training standardization expert), Dorothy Schick (flight school owner and marketing innovator), and Ian Twombly (noted flight-training writer and editor).
