Developing and Maintaining Emergency Operations Plans: Comprehensive Preparedness Guide (CPG) 101, Version 2. 0

Createspace Independent Pub Comprehensive Preparedness Guide (CPG) 101 provides Federal Emergency Management Agency (FEMA) guidance on the fundamentals of planning and developing emergency operations plans (EOP). CPG 101 shows that EOPs are connected to planning efforts in the areas of prevention, protection, response, recovery, and mitigation. Version 2.0 of this Guide expands on these fundamentals and encourages emergency and homeland security managers to engage the whole community in addressing all

risks that might impact their jurisdictions. While CPG 101 maintains its link to previous guidance, it also reflects the reality of the current operational planning environment. This Guide integrates key concepts from national preparedness policies and doctrines, as well as lessons learned from disasters, major incidents, national assessments, and grant programs. CPG 101 provides methods for planners to: Conduct community-based planning that engages the whole community by using a planning process that represents the actual population in the community and involves community leaders and the private sector in the planning process; Ensure plans are developed through an analysis of risk; Identify operational assumptions and resource demands; Prioritize plans and planning efforts to support their seamless transition from development to execution for any threat or hazard; Integrate and synchronize efforts across all levels of government. CPG 101 incorporates the following concepts from operational planning research and day-to-day experience: The process of planning is just as important as the resulting document; Plans are not scripts followed to the letter, but are flexible and adaptable to the actual situation; Effective plans convey the goals and objectives of the intended operation and the actions needed to achieve them. Successful operations occur when organizations know their roles, understand how they fit into the overall plan, and are able to execute the plan. Comprehensive Preparedness Guide (CPG) 101 provides guidelines on developing emergency operations plans (EOP). It promotes a common understanding of the fundamentals of risk-informed planning and decision making to help planners examine a hazard or threat and produce integrated, coordinated, and synchronized plans. The goal of CPG 101 is to make the planning process routine across all phases of emergency management and for all homeland security mission areas. This Guide helps planners at all levels of government in their efforts to develop and maintain viable all-hazards, all-threats EOPs. Accomplished properly, planning provides a methodical way to engage the whole community in thinking through the life cycle of a potential crisis, determining required capabilities, and establishing a framework for roles and responsibilities. It shapes how a community envisions and shares a desired outcome, selects effective ways to achieve it, and communicates expected results. Each jurisdiction's plans must reflect what that community will do to address its specific risks with the unique resources it has or can obtain. Planners achieve unity of purpose through coordination and integration of plans across all levels of government, nongovernmental organizations, the private sector, and individuals and families. This supports the fundamental principle that, in many situations, emergency management and homeland security operations start at the local level and expand to include Federal, state, territorial, tribal, regional, and private sector assets as the affected jurisdiction requires additional resources and capabilities. A shared planning community increases the likelihood of integration and synchronization, makes planning cycles more efficient and effective, and makes plan maintenance easier.

Managing Disruptive Change in Healthcare

Lessons from a Public-Private Partnership to Advance Cancer Care and Research

Oxford University Press, USA Healthcare faces unprecedented global challenges. Rapid advances in genomics, computational sciences, and technology -- as well as the new focus on value-based care and an increased trend toward healthcare commercialization -- represent disruptive changes to an already-fragmented delivery system. The healthcare establishment has been slow to adapt, and now faces rising cancer-care costs and lags in outcome improvement and genomically informed interventions. Managing Disruptive Change in Healthcare codifies the US National Cancer Institute's lessons from utilizing a public-private partnership with community hospitals to navigate the change needed to increase patient access to high-quality cancer care, and enhance hospitals' capacity to conduct and support research initiatives. The treatment of complex diseases requires a delivery system capable of translating scientific advances into care that is coordinated across the full continuum; this book offers a blueprint to just such an infrastructure.

Community and In-Home Behavioral Health Treatment

Routledge Learn how you can cut down on rapport-building time, make your services accessible to more people, and put your consumers at ease during treatment by offering in-home and natural community-based behavioral health services. This book examines the impact that the environment can have on the comfort level, perception, ability to connect, and general mindset of consumers during treatment. Home and natural community-based services have the potential to help adults, youth, and children live in their own homes and natural communities with specific supports in place that can address their behavioral health needs. Lynne Rice Westbrook examines these treatment settings from the most restrictive to the least restrictive, and demonstrates how such services can be implemented to bring coverage to remote, rural, and underserved areas. Providing services in the consumer's community allows children, youth, adults, and families to receive treatment they may not be able to access otherwise, and to stay together in their own community. This book provides a detailed map of the benefits, challenges and proposed solutions, and the steps professionals need to take in order to help change the tapestry of behavioral health provision one home, one healing at a time.

The Health Information Exchange Formation Guide

The Authoritative Guide for Planning and Forming an HIE in Your State, Region or Community

HIMSS

An Introduction to Community Development

Routledge Beginning with the foundations of community development, An Introduction to Community Development offers a comprehensive and practical approach to planning for communities. Road-tested in the authors' own teaching, and through the training they provide for practicing planners, it enables students to begin making connections between academic study and practical know-how from both private and public sector contexts. An Introduction to Community Development shows how planners can utilize local economic interests and integrate finance and marketing considerations into their strategy. Most importantly, the book is strongly focused on outcomes, encouraging students to ask: what is best practice when it comes to planning for communities, and how do we accurately measure the results of planning practice? This newly revised and updated edition includes: increased coverage of sustainability issues, discussion of localism and its relation to community development, quality of life, community well-being and public health considerations, and content on local food systems. Each chapter provides a range of reading materials for the student, supplemented with text boxes, a chapter outline, keywords, and reference lists, and new skills based exercises at the end of each chapter to help students turn their learning into action, making this the most user-friendly text for community development now available.

The "People Power" Health Superbook: Book 24. Mental Health Guide (Live With

Yourself & Others In Peace)

Lulu Press, Inc The main book which covers mental illnesses is the Diagnostic Statistical Manual/ DSM. Try #362.20-362-26 or RA790.7 at the library for stories about how to deal with mental illness. The mental health section goes from #616.85-616.89 and RC435 to RC515 at the library. Remember that a hundred years ago or so, no clearly defined mental illnesses existed now they got thick books with all kinds of specific mental illnesses but I don't buy it. You are who you are, a unitary whole. You might feel depressed in the morning, grandiose in the afternoon then histrionic at night. At best, these so-called illnesses are a rough guide to what you're going through. You're you. No other human being will ever know what you're thinking. No label can describe your unique set of circumstances and feelings otherwise known as your life yet we got an entire industry of phony experts pretending they know something deep and advanced about the human condition.

Child Protective Services

A Guide for Caseworkers

From the Preface: This manual, Child Protective Services: A Guide for Caseworkers, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based-including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Quick Hits for Service-Learning

Successful Strategies by Award-Winning Teachers

Indiana University Press Service-learning, the integration of classroom instruction with community service projects, is rapidly gaining momentum as a successful teaching and learning strategy that benefits both students and their communities. Quick Hits for Service-Learning presents more than 80 examples of innovative curricula, developed by educators in a wide range of disciplines, designed to combine community service with instruction and reflection. Seven chapters offer tips for classroom activities that focus on the education of children and youth; civic awareness, engagement, and activism; language, literature, and communication; global studies and local outreach to exceptional populations; the study of history, the social sciences, and the arts; business, industry, and the health sciences; and the teaching of research and other "tools of the trade." Brimming with ideas that busy faculty members can easily adapt to their own classrooms, this book is a valuable reference for faculty new to the field or seasoned practitioners looking for fresh ideas.

Violence Interrupted

Confronting Sexual Violence on University Campuses

McGill-Queen's Press - MQUP We live in a moment of renewed and highly visible action on the issue of sexual violence. Rape culture is a real and salient force that dominates campus climates and student experiences. Canada has drafted a national framework, provincial legislation, and institutional policy to address incidences of sexual violence, and students have demanded that their universities respond. Yet rape culture persists on campuses throughout North America. Violence Interrupted presents different ways of thinking about sexual violence. It draws together multiple disciplinary perspectives to synthesize new conceptual directions on the nature of the problem and the changes that are required to address it. Analyzing survey data, educational programs, participatory photography projects, interviews, autoethnography, legal case studies, and existing policy, contributors open up the conversation to illustrate sexual violence on campus as a structural, cultural, and complex social phenomenon. The diversity of methodologies sets this study apart: a problem as complex and far-reaching as rape culture must be approached from a multitude of angles. Decades have passed since student advocates first called for "no means no" campaigns, but universities are still struggling to evolve. Violence Interrupted answers the call by bridging the gap between advocacy, research, and institutional change.

Services of General Economic Interest in EU Competition Law

Striking a Balance Between Non-economic Values and Market Competition

Springer Nature This book provides a comprehensive examination of the interaction between Services of General Economic Interest (SGEI) and EU competition law, covering in particular Article 106 of the Treaty on the Functioning of the European Union (TFEU) and state aid rules. It also takes the telecommunications, postal service and transport sectors as case studies, taking into account the technological, economic and political backgrounds to these sectors. The area of SGEI has undergone fundamental developments over the past three decades and the most recent changes in the Lisbon Treaty, recognizing SGEI as a shared value and granting explicit competence to the EU, mark its constitutional significance. The key issue is how to balance economic values underlying competitive markets and non-economic public service values such as universal access to essential services. The essence of the question is the relationship between the market and the state. This controversial issue is addressed through a critical analysis of a number of landmark EU Court judgments and Commission decisions over the decades. Offering a clear appreciation of the evolution of the EU regulatory framework on SGEI that lays out the limits and boundaries within which the Member States define, organize and fund SGEI, the book is particularly aimed at academics with a research interest in the interaction between public services and EU competition law, but as it also demonstrates clearly how the application of EU competition law has transformed the public utilities sectors, it will be of interest to law makers, legal professionals and policy makers as well. Dr. Lei Zhu is a Research Associate at the Institute of International Law at Wuhan University in Wuhan, China. He studied at the

Institute for Competition & Procurement Studies of the Bangor University Law School in Wales, United Kingdom, where he obtained his PhD in law in 2015.

House of Commons - Communities and Local Government Committee: Community Budgets - HC 163

Third Report of Session 2013-14, Report, Together with Formal Minutes, Oral and Written Evidence

The Stationery Office Community Budgets are demonstrating their potential to deliver cheaper, more integrated and more effective public services. They are at risk, however, of being replaced after a few years if key issues are not resolved. If this opportunity is missed, the Committee warns that local services could come under unsustainable pressure in the face of increased demand and reduced budgets. This in turn may result in more spending later on judicial and emergency health and welfare interventions. The Government should send a clear message that it will assist every local authority wishing to introduce Community Budgets and to set out the specific assistance it will provide them with. Furthermore, the programme of pilots must not be allowed to slow progress towards wider implementation. If they are to succeed, public service providers and local authorities must realise investment in Community Budgets will bring them benefits. Local authorities, their partners, and central government should, therefore, develop a framework for agreements on how the benefits of investment are to be shared. On the Troubled Families Programme, the Committee is supportive of the work being done but highlights the need for greater focus on how work with these families will continue after the programme ends in 2016. Noting that the resources available have not increased in proportion to the number of families added to the programme in June, DCLG needs to monitor carefully progress and provide more resources to local authorities if necessary

Child Neglect

A Guide for Prevention, Assessment, and Intervention

Local Government Actions to Prevent Childhood Obesity

National Academies Press The prevalence of childhood obesity is so high in the United States that it may reduce the life expectancy of today's generation of children. While parents and other adult caregivers play a fundamental role in teaching children about healthy behaviors, even the most positive efforts can be undermined by local environments that are poorly suited to supporting healthy behaviors. For example, many communities lack ready sources of healthy food choices, such as supermarkets and grocery stores. Or they may not provide safe places for children to walk or play. In such communities, even the most motivated child or adolescent may find it difficult to act in healthy ways. Local governments--with jurisdiction over many aspects of land use, food marketing, community planning, transportation, health and nutrition programs, and other community issues--are ideally positioned to promote behaviors that will help children and adolescents reach and maintain healthy weights. Local Government Actions to Prevent Childhood Obesity presents a number of recommendations that touch on the vital role of government actions on all levels--federal, state, and local--in childhood obesity prevention. The book offers healthy eating and physical activity strategies for local governments to consider, making it an excellent resource for mayors, managers, commissioners, council members, county board members, and administrators.

The Ultimate Guide to Urban Farming

Sustainable Living in Your Home, Community, and Business

Simon and Schuster How to maximize your food production in an urban environment. The idea of bringing agriculture into the city has been promoted by many on both sides of the political fence: proponents of sustainability and prevention of climate change as well as those who worry about government and social instability. To address the urgent need for a shift in the way our food is produced, The Ultimate Guide to Urban Farming offers a practical education in everything there is to know about city agriculture: how to grow a lot of food in any kind of urban living situation, from apartment to full-scale commercial venture. Subjects covered include: • Small scale vs. large scale agriculture • The economic, social, health, and environmental impacts of urban farming • Making the most of the space available • The latest technologies and developments in agriculture, including: hydroponics, vertical gardening, and aquaponics • Case studies and design concerns for community-based farming • The best plant species for cities and seasons • Beekeeping and small animals • Commercial agriculture and the business side of farming in a city environment This comprehensive guide will introduce readers to the rewarding possibilities of growing their own food, as well as dispel the falsehood that says we need faraway factory farms to produce everything we eat.
