**Golf Business and Management A Global Introduction** [Routledge](#) Golf is big business around the world. With high profile series such as the PGA, LPGA and European tours to the re-introduction of golf to the Olympics at Rio 2016, golf occupies a prominent place in the global sport community. This is the first book to introduce the fundamentals of golf business and management from a truly international perspective, covering key topics such as media, club management, sponsorship and retail, at elite and non-elite levels. With sections exploring the development of golf on every continent, including North America, South America, Europe, the Middle East, Africa and Asia, this book presents the latest thinking on current issues in golf, ranging from sustainability and innovation to global governance. Each chapter incorporates helpful features for students including learning objectives, discussion questions, guides to further reading, recommended websites and insights from industry voices. This book is essential reading for students of any golf-related degree course or professional accreditation programme, and will also be of interest to those studying or working in sport business, sport management and sport tourism. Underpinned by up-to-date literature, golf researchers will also find the book a useful starting point. **The Mommy Psychologist The Child Psychologist Who**

**Thought She Had All the Answers to Parenting Until She Became One Herself** [Createspace Independent Pub](#) **Just like A Girlfriend's Guide to Pregnancy** is the must-have book for any pregnant woman, **The Mommy Psychologist** is the must-have book for any new mother. If you are a mother, a mother-to-be, or thinking about becoming a mother then you must read this book. Grab a cup of coffee or a glass of wine and get ready to learn the real deal on motherhood. The stuff none of the other parenting books tell you. You might be surprised to learn that after natural childbirth, your vagina will look like Mike Tyson went nine rounds on it or that breastfeeding on the toilet cures constipation. **The Mommy Psychologist** is not another prescriptive, how-to guide on parenting. The last thing we need is another parenting book lining the shelves promising parental success if we apply the correct mathematical formula to our babies. It's narrated by a Child Psychologist who thought she had all the answers to parenting until she became one herself. She exposes her faults unapologetically in an account that is both hilarious and heartbreaking. She makes sense of the emotional extremes of motherhood and shows how seemingly contradictory emotions about motherhood can co-exist. Each chapter tackles a specific parenting topic ranging from dealing with infant sleep problems to dispelling some of the common myths associated with autism. **The Mommy Psychologist** doesn't give mothers the illusion that if they apply certain steps to a problem they will get a specific result. Instead, mothers are encouraged to view parenting through the lens of self empowerment and suggestions are provided to help them use the information they have at their disposal, but mostly, to feel better about themselves. Mothers are urged to do what feels right for them in any given parenting situation. It is written with a voice that marries education with the practical experience only gained through the act of being a mother.

**Trafficking in Persons An Analysis of Afghanistan** [International Organization for Migration \(IOM\)](#) **IOM has conducted a study to assess the trends and responses to human trafficking in Afghanistan. Based on written survey forms, structured interviews, and a literature review it provides information on: specific and verified cases; credible but unverified cases; general trends; cultural contexts. The report documents examples of many forms of trafficking. Trafficking-related trends are also documented; even though they may fall outside the Trafficking Protocol, they raise serious human rights concerns and share many causes and possible counter measures with more traditional trafficking practices. Although the bulk of information is internal and among Afghans in neighbouring countries, there have been cases of cross-border trafficking. This report explores the legal, social, economic, and security environment to establish how trafficking has taken root and to point to early recommendations for addressing the problem**
