Increasingly, the decisions that affect our lives--where we go to school, whether we get a car loan, how much we pay for health insurance--are being made not by humans, but by mathematical models. In theory, this should lead to greater fairness: Everyone is judged according to the same rules, and bias is eliminated. But as Cathy O'Neil reveals in this urgent and necessary book, the opposite is true. The models being used today are opaque, unregulated, and uncontestable, even when they're wrong. Most troubling, they reinforce discrimination: If a poor student can't get a loan because a lending model deems him too risky (by virtue of his zip code), he's then cut off from the kind of education that could pull him out of poverty, and a vicious spiral ensues. Models are propping up the lucky and punishing the downtrodden, creating a "toxic cocktail for democracy." Welcome to the dark side of Big Data. Tracing the arc of a person's life, O'Neil exposes the black box models that shape our future, both as individuals and as a society. These "weapons of math destruction" score teachers and students, sort r sum s, grant (or deny) loans, evaluate workers, target voters, set parole, and monitor our health. O'Neil calls on modelers to take more responsibility for their algorithms and on policy makers to regulate their use. But in the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change. -- Longlist for National Book Award (Non-Fiction) -- Goodreads, semi-finalist for the 2016 Goodreads Choice Awards (Science and Technology) -- Kirkus, Best Books of 2016 -- New York Times, 100 Notable Books of 2016 (Non-Fiction) -- The Guardian, Best Books of 2016 -- WBUR's "On Point," Best Books of 2016: Staff Picks -- Boston Globe, Best Books of 2016, Non-Fiction **A Short & Happy Guide to Secured Transactions** United States Code Contracts Emanuel Publishing Corporation **CrunchTime** provides the right information, in the right format, at the right time. Mastering the Law School Exam A Practical Blueprint for Preparing and Taking Law School Exams West Academic Softbound - New, softbound print book. Arbitration Law Foundation Press The field of arbitration has been a dynamic subject of litigation in the courts. In recent years, the U.S. Supreme Court has decided dozens of cases that involve the interpretation of the Federal Arbitration Act. Moreover, as the Court has broadened the use of arbitration as the primary and/or exclusive tribunal for deciding many types of civil law disputes, the lower federal courts have been inundated with cases involving the application and interpretation of the federal statute. In addition, courts in every state have been presented with an avalanche of cases implicating the federal arbitration statute and the way in which it overlaps with or conflicts with state law doctrines. This casebook presents a comprehensive treatment of the legal issues involved in arbitration. The first four chapters address issues that arise under written agreements to arbitrate contained in private contracts. They present the law that has evolved under the Federal Arbitration Act, a statute that governs arbitration in contracts involving interstate commerce. Chapter 5 looks at arbitration in the labor management context that is governed by the Labor Management Relations Act. Chapter 6 addresses international commercial arbitration. Together the book is designed to give students a thorough understanding of arbitration law, and to provide a solid foundation for legal practice, whether in alternative dispute resolution tribunals or in the civil justice system. This latest new edition presents an up to date treatment of this quickly evolving field. It includes all of the recent Supreme Court about arbitration, including *Kindred Nursing Centers v. Clark*, *DirectTV v. Imgurgia*, *Epic Systems v. Lewis*, *Lamps Plus v. Varela*, *Henry Shein v. Archer*, and *New Prime v. Oliveira*. In addition, it contains a detailed section on the subject of Separability, Delegation Clauses and Unconscionability, an area of law that has become a source of considerable litigation in the wake of the Supreme Court's decision in *Rent-A-Center v. Jackson* in 2010. It also includes sections on Arbitration Involving Nonparties to Arbitration Agreements, because that too has also become an area of increasing importance in recent years. Additionally, it contains extensive materials on Arbitration and Class Actions, and On-line Arbitration, both in the domestic and international arbitration context. We hope that this new edition of Arbitration Law will provide law students with a thorough understanding of all the doctrinal and analytic tools needed to successfully practice law today. The cases revisit many issues that students encountered in their first year courses in contracts and civil procedure, but from a different perspective. We also hope that by revisiting those subjects from a different perspective, students will

gain a deeper understanding of the interaction between substantive law and the procedures available for addressing legal claims.
