The Forensic Psychologist's Report Writing Guide [Taylor & Francis](#) *The Forensic Psychologist's Reporting Writing Guide is the first book to provide both student trainees and practitioners with best practice guidance for one of the core skills of their role. Written and edited by an international range of experts from the UK, North America and Australasia, it provides clear advice on a range of assessments, from psychometric tests to personality functioning, and includes real-life examples to illustrate key points. Uniquely, the book also offers guidance on the range of different client groups that forensic psychologists work with across both civil and legal contexts, including juveniles, female clients, couples and those with cognitive impairments. From core principles to writing style to key issues, each chapter also includes a checklist of advice and further reading. Comprehensive and practical, The Forensic Psychologist's Reporting Writing Guide is a user-friendly companion to this critical and often overlooked skill, and will be essential reading for both neophyte and experienced forensic psychologists alike.* **Procedure Shopping Through Hybrid Arbitration Agreements Considerations on party autonomy in institutional international arbitration** [Nomos Verlag](#) *Sind Vertragsparteien, die sich für eine Schiedsinstitution entscheiden, bei der Wahl der Verfahrensordnung frei? Das Werk behandelt diese Frage zur Parteiautonomie in institutionellen internationalen Schiedsverfahren am Beispiel hybrider Schiedsklauseln. Solche Klauseln benennen eine Schiedsinstitution, sehen aber die Schiedsordnung einer anderen Institution vor. Die Autorin untersucht die sich aus einer solchen Vereinbarung ergebenden Fragen aus schieds-, vertrags-, urheber- und lauterkeitsrechtlicher Sicht sowie einer transnationalen Perspektive unter Berücksichtigung verschiedener Rechtsordnungen. Zudem vergleicht sie Regeln und Organe wichtiger Schiedsinstitutionen Europas, Asiens und Amerikas. Das Werk dient als Handreiche für Praxis und Wissenschaft beim Umgang mit den Besonderheiten der institutionellen Schiedsgerichtsbarkeit.* **Clinician's Guide to Treating Companion Animal Issues Addressing Human-Animal Interaction** [Academic Press](#) *Clinician's Guide to Treating Animal Companion Issues: Addressing Human-Animal Interaction is the first of its kind—a groundbreaking resource for mental health professionals who want the knowledge, skills and awareness to successfully work with pet-owning clients. The book trains clinicians across multiple disciplines to feel more comfortable and confident addressing companion-related issues—both when those issues are the primary reason for seeking therapy or a critical component in better understanding client needs. The book uses current human-animal interactions theories as a foundation to explore pet-related issues utilizing behavioral, cognitive behavioral, family systems, humanistic and contemporary psychodynamic therapeutic orientations. Users will find sections on the many issues that arise during the lifespan of pet owners (e.g., children, young adults, elderly), as well as issues pertinent to specific populations (e.g., men, homeless, ethnically diverse). Additional topics include the violence link, pet death and bereavement, and behavioral issues. As the first book to approach human-animal interactions (HAI) from a multi-theoretical perspective, it helps clinicians appropriately acknowledge and incorporate relevant HAI issues within therapy to achieve goals. Provides practical information for immediate use in practice Focuses on common issues relating to companion animals Addresses bereavement, attachment, behavior, and more Includes interactive readings, case studies and therapeutic exercises Contains multiple theoretical orientations (behavioral, cognitive behavioral, family systems, humanistic and psychodynamic approaches) **A Clinician's Guide to Disclosures of Sexual Assault** [Oxford University Press](#) *Sexual assault is a worldwide public health concern, as it occurs to people of all genders at alarming rates and results in serious impacts to physical and mental health. Furthermore, the reactions that survivors receive from formal and informal supports can significantly influence survivors' recovery. Given the prevalence of sexual assault, practitioners need to be prepared to handle disclosures of sexual assault from clients. A Clinician's Guide to Disclosures of Sexual Assault provides guidance for service providers on how to interact with survivors of sexual assault, defined here as sexual contact or penetration without the explicit consent of the victim. The book highlights that there are specific populations (e.g., sexual minorities, men) and settings (e.g., military, higher education) that require unique considerations when discussing sexual violence. Beginning with a foundation of literature focused on sexual assault and survivor disclosure, chapters build upon current theory and offer recommendations for conducting effective assessments and psychotherapy with survivors. Finally, case examples are presented to illustrate how these approaches can be used in practice. Professionals across disciplines, such as medical or educational settings, law enforcement, and victim services, have an instrumental role in facilitating survivor recovery, and this book offers best practices for delivering services in an affirming manner.* **ACSM's Resource Manual for Guidelines for Exercise Testing and Prescription** [Lippincott Williams & Wilkins](#) *ACSM's Resource Manual for Guidelines for Exercise Testing and Prescription was created as a complement to ACSM's Guidelines for Exercise Testing and Prescription and elaborates on all major aspects of preventative rehabilitation and fitness programs and the major position stands of the ACSM. The 7th edition provides information necessary to address the knowledge, skills, and abilities set forth in the new edition of Guidelines, and explains the science behind the exercise testing and prescription. ACSM's Resource Manual is a comprehensive resource for those working in the fitness and clinical exercise fields, as well as those in academic training.* **Guidelines for Determining Flood Flow Frequency Geropsychology and Long Term Care A Practitioner's Guide** [Springer Science & Business Media](#) *It is with great pride that the Psychologists in Long Term Care (PLTC) have sponsored The Professional Educational Long-Term Care Training Manual, and now its second iteration, Geropsychology and Long Term Care: A Practitioner's Guide. Education of psychologists working in long-term care settings is consistent with PLTC's mission to assure the provision of high-quality psychological services for a neglected sector of the population, i.e., residents in nursing homes and assisted-living communities. To this end, direct training of generalist psychologists in the nuances of psychological care delivery in long-term care settings has been a major priority. It is a tribute to the accelerating nature of research in long-term care settings that a revision is now necessary. After all, the Professional Educational Training Manual's initial publication date was only in 2001. However, in the intervening years, much progress has been made in addressing assessment and intervention strategies tailored to the needs of this frail but quite diverse population. It is so gratifying to be able to say that there is now a corpus of scientific knowledge to guide long-term care service delivery in long-term care settings.* **Handbook of Blockchain Law A Guide to Understanding and Resolving the Legal Challenges of Blockchain Technology** [Kluwer Law International B.V.](#) *Blockchain has become attractive to companies and governments because it promises to solve the age-old problem of mutability in transactions - that is, it makes falsification and recalculation impossible once a transaction has been committed to the technology. However, the perceived complexity of implementing Blockchain calls for an in-depth overview of its key features and functionalities, specifically in a legal context. The systematic and comprehensive approach set forth in this indispensable book, including coverage of existing relevant law in various jurisdictions and practical guidance on how to tackle legal issues raised by the use of Blockchain, ensures a one-stop-shop reference book for anyone considering Blockchain-based solutions or rendering advice with respect to them. Within a clear structure by fields of law allowing for a systematic approach, each contributor - all of them are practitioners experienced with Blockchain projects within their respective areas of expertise - elucidates the implications of Blockchain technology and related legal issues under such headings as the following: technical explanation of Blockchain technology; contract law; regulatory issues and existing regulation in a variety of jurisdictions; data protection and privacy; capital markets; information security; patents and other intellectual property considerations; and antitrust law. Keeping the legal questions and concepts sufficiently generic so that lawyers can benefit from the handbook irrespective of their jurisdiction and legal background, the authors cover such specific characteristics of Blockchain implementation as so-called smart contracts, tokenization, distributed ledger technology, digital securities, recognition of code as law, data privacy challenges and Blockchain joint ventures. Because Blockchain is a relatively new technology still in process and raises a multitude of legal questions, this well-balanced introduction - at a depth that allows non-IT experts to understand the groundwork for legal assessments - provides a solid basis for organizations and their legal advisors in identifying and resolving Blockchain-related issues. Legal practitioners, in-house lawyers, IT professionals and advisors, consultancy firms, Blockchain associations and legal scholars will welcome this highly informative and practical book.* **Situational Project Management The Dynamics of Success and Failure** [CRC Press](#) *Most project managers would agree that every project is unique. But not all project managers would agree that the best way to manage a unique project is unique. Many still cling to the old practice of having a methodology that is applied to all projects. "One size fits all" is still in common use, and this approach has proven to lead to project failure. Flexibility, situational intelligence, and creativity are essential to deliver project success. The need to recognize and master ever-changing requirements and environmental conditions is a tough challenge for professional project managers. The same practices that led to success yesterday may cause failure today. Selecting favorable responses to a given situation is often the most critical factor of the dynamics of success and failure. This book is designed to help project professionals assess a situation, predict the appropriate approach, methodology and achieving styles, and then apply them in a situational fashion. To guide project managers in selecting the appropriate responses, Situational Project Management (SitPM) shows how to assess a given project, determine its unique characteristics, and select the appropriate methods to complete the project. With this book, projects managers can use SitPM to develop profiles of their projects on the basis of the projects' physical characteristics, the project teams' behavioral characteristics, the enterprise environment, and the market environments receiving project deliverables. These profiles help project managers to determine the appropriate project life cycle approach and leadership style. The book also explores various ways to engage stakeholders on the basis of a project's SitPM profile. The book's author, Oliver F. Lehmann, has developed a set of templates to apply SitPM in practice. It can be downloaded from www.oliverlehmann.com/SitPM/Templates.zip.* **Essentials of Testing and Assessment: A Practical Guide for Counselors, Social Workers, and Psychologists** [Cengage Learning](#) *Comprehensive and easy to read, Neukrug and Fawcett's ESSENTIALS OF TESTING AND ASSESSMENT: A PRACTICAL GUIDE FOR COUNSELORS, SOCIAL WORKERS, AND PSYCHOLOGISTS, 3rd Edition, introduces learners to the concepts and applications of assessment and testing. Case vignettes, samples of real tests, and additional activities and exercises increase understanding. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.* **The Domestic Dog** [Cambridge University Press](#) *Second edition of a classic text on canine science and behavior, incorporating two decades of new evidence and discoveries.* **Handbook on Pretrial Justice** [Routledge](#) *The Handbook on Pretrial Justice covers the front end of the criminal legal system from pretrial diversion to pretrial detention or release. Often overlooked, the decisions made at the earliest phases of the criminal legal system have huge implications for defendants and their families, the community, and the system itself, and impact the entire criminal legal system. This collection of essays and reports of original research explores the complexities of pretrial decisions and practices and includes chapters in the following broad areas: the consequences of detention, pretrial decision-making, community supervision, and risk assessment. The book also includes a section looking at pretrial justice outside of the U.S. Each chapter summarizes what is known, identifies the gaps in the research, and discusses the theoretical, empirical, and policy implications of the research findings. This is Volume 6 of the American Society of Criminology's Division on Corrections and Sentencing handbook series. The handbooks provide in-depth coverage of seminal and topical issues around sentencing and correction for scholars, students, practitioners, and policymakers.* **Finding Your Own North Star Claiming the Life You Were Meant to Live** [Harmony](#) *Introduces the author's step-by-step plan for identifying core desires and acting upon them to create successful, satisfying, and more fulfilling lives.* **Treatment Approaches for Alcohol and Drug Dependence An Introductory Guide** [John Wiley & Sons](#) *The first edition of this book was based upon the recommendations of the Quality Assurance in the Treatment of Drug Dependence Project, and provided a step-by-step-guide for therapists working with clients with alcohol or other drug dependency or misuse. Since publication in 1995**

it has become well known for its easy-to-read style and wealth of practical resource materials. However, the evidence in the field has moved forward in the last eight years, creating a need for an updated edition. Retaining the trademark easy-to-use, up-to-date style, the Second Edition offers new chapters on pharmacotherapies, case management, young people, and dual diagnosis. Other chapters have been updated to reflect the latest research findings and current practice, and the practice sheets and client handouts are made available online for downloading and customization by therapists.

The HIV Pandemic Local and global implications [OUP Oxford](#) As we approach the 25th anniversary of the first recognition of HIV/AIDS in 1981, this book reflects on the international impact of the disease. It has persistently remained a global issue, with more than 50 million people worldwide estimated to have been infected since that date. This ambitious book, written by 165 authors from 30 countries, offers a multi-country comparative study that examines how the response to the common, global threat of HIV is shaped by the history, culture, institutions and health systems of the individual countries affected. Increasingly the shift of health systems has been from prevention only as the main containment strategy, to a strategy that includes scaling up HIV treatment, and care and prevention services, including antiretroviral therapy. Thus, all parts of the health system must be involved; policy makers, healthcare professionals and users of the services have been forced to think differently about how services are financed, how resources are allocated, how systems are structured and organized, how services are delivered to patients, and how the resulting activity is monitored and evaluated in order to improve the effectiveness, efficiency, equity and acceptability of the response. This book is unique in attempting to describe and assess a range of responses across the globe by situating them within the characteristics of each country and its health system. Most chapters combine a health policy expert with an HIV specialist, allowing both a 'top down' health system approach and a 'bottom up' HIV-specific perspective. There are thematic and analytical sections, which provide an overview and some suggestions for solutions to the most serious outstanding issues, and chapters which analyse specific country and organisational responses. There is no perfect health system, but the evidence provided here allows the sharing of knowledge, and a opportunity to assess the impact and reactions, to an epidemic that must be considered a long term issue. **Diversity within Diversity Management Country-Based Perspectives** [Emerald Group Publishing](#) This book enhances our understanding as to how diversity and equality are managed in different national contexts. Focusing on workplace equality, diversity, and inclusion, this book brings together a unique blend of scholarly research and professional practice, evidenced through an array of individuals both outside and inside organizations. **Handbook of Research on Cyberbullying and Online Harassment in the Workplace** [IGI Global](#) Given users' heavy reliance of modern communication technologies such as mobile and tablet devices, laptops, computers, and social media networks, workplace cyberbullying and online harassment have become escalating problems around the world. Organizations of all sizes and sectors (public and private) may encounter workplace cyberbullying within and outside the boundaries of physical offices. Workplace cyberbullying affects the entire company, as victims suffer from psychological trauma and mental health issues that can lead to anxiety and depression, which, in turn, can cause absenteeism, job turnover, and retaliation. Thus, businesses must develop effective strategies to prevent and resolve such issues from becoming too large to manage. The Handbook of Research on Cyberbullying and Online Harassment in the Workplace provides in-depth research that explores the theoretical and practical measures of managing bullying behaviors within an organization as well as the intervention strategies that should be employed. The book takes a look at bullying behavior across a variety of industries, including government and educational institutions, and examines social and legislative issues, policies and legal cases, the impact of online harassment and disruption of business processes and organizational culture, and prevention techniques. Featuring coverage on a broad range of topics such as sexual abuse and trolling, this book is ideally designed for business managers and executives, human resource managers, practitioners, policymakers, academicians, researchers, and students. **Cognitive Behavior Therapy, Second Edition Basics and Beyond** [Guilford Press](#) The leading text for students and practicing therapists who want to learn the fundamentals of cognitive behavior therapy (CBT), this book is eminently practical and authoritative. In a highly accessible, step-by-step style, master clinician Judith S. Beck demonstrates how to engage patients, develop a sound case conceptualization, plan treatment, and structure sessions effectively. Core cognitive, behavioral, and experiential techniques are explicated and strategies are presented for troubleshooting difficulties and preventing relapse. An extended case example and many vignettes and transcripts illustrate CBT in action. Reproducible clinical tools can be downloaded and printed in a convenient 8 1/2" x 11" size. See also Dr. Beck's Cognitive Therapy for Challenging Problems: What to Do When the Basics Don't Work, which addresses ways to solve frequently encountered problems with patients who are not making progress. New to This Edition*Reflects over 15 years of research advances and the author's ongoing experience as a clinician, teacher, and supervisor.*Chapters on the evaluation session and behavioral activation.*Increased emphasis on the therapeutic relationship, building on patients' strengths, and homework.*Now even more practical: features reproducibles and a sample case write-up. **The Palgrave Handbook of Incarceration in Popular Culture** [Springer Nature](#) The Handbook of Incarceration in Popular Culture will be an essential reference point, providing international coverage and thematic richness. The chapters examine the real and imagined spaces of the prison and, perhaps more importantly, dwell in the uncertain space between them. The modern fixation with 'seeing inside' prison from the outside has prompted a proliferation of media visions of incarceration, from high-minded and worthy to voyeuristic and unrealistic. In this handbook, the editors bring together a huge breadth of disparate issues including women in prison, the view from 'inside', prisons as a source of entertainment, the real worlds of prison, and issues of race and gender. The handbook will inform students and lecturers of media, film, popular culture, gender, and cultural studies, as well as scholars of criminology and justice. **Academic & Scientific Poster Presentation A Modern Comprehensive Guide** [Springer](#) This book offers the first comprehensive guide to poster presentation at academic, scientific and professional conferences. Each chapter explores different factors that impact upon how posters function, and how they fit within today's conference practices, as well as provides guidance on how to address compilation and presentation issues with the poster medium. Drawing from fields of education, psychology, advertising and other areas, the book offers examples of how theories may be applied to practice in terms of both traditional paper and electronic poster formats. Importantly, the book offers a critical examination of how academic and scientific posters are able to achieve their potential for knowledge dissemination, networking and knowledge transfer. The many new and challenging findings provide an evidence-based approach to help both novice and experienced presenters compile effective poster presentations, and to see how poster presentations can best be used to share knowledge, facilitate networking, and promote dialogue. Additionally, educators, employers, and conference organizers may use this book to re-evaluate how conferences meet the needs of today's globally connected peer groups, and the benefit they provide at individual and group levels. **What Went Right Reframe Your Thinking for a Happier Now** [Simon and Schuster](#) Learn to change the self-critical stories in your mind and rewire your brain so that you gain the self-confidence to build more fulfilling relationships, careers, and social life. Since childhood, our experiences and interactions have shaped the running narrative of who we are and how we view ourselves. When those interactions are painful, many of us have a tendency to internalize the negativity, translating mean or selfish messages given to us by family, friends, or teachers during our youth into truths about who we are—our flaws, failures, and shortcomings. Through practical and easy-to-understand principles and techniques, What Went Right teaches you to recognize and intervene on self-defeating thought processes and uncover your core beliefs about who you really are. Through these exercises, you will learn how your thoughts drive feelings that influence your behaviors. By changing your thinking, you can unlock self-affirming feelings and actions needed to create your new life story and become the person you want to be. **Professionalism for the Built Environment** [Routledge](#) In the aftermath of the Grenfell Tower tragedy, this new book provides thought provoking commentary on the nature of the relationship between society, the prevailing economic system and professionalism in the built environment. It addresses the changing responsibilities of professionals and in particular their obligation to act in the wider public interest. It is both an introduction to and an examination of professionalism and professional bodies in the sector, including a view of the future of professionalism and the organisations serving it. Simon Foxell outlines the history of professionalism in the sector, comparing and contrasting the development of the three major historic professions working in the construction industry: civil engineering, architecture and surveying. He examines how their systems have developed over time, up to the current period dominated by large professional services firms, and looks at some options for the future, whilst asking difficult questions about ethics, training, education, public trust and expectation from within and outside the industry. The book concludes with a six-point plan to help, if not ensure, that the professions remain an effective and essential part of both society and the economy; a part that allows the system to operate smoothly and easily, but also fairly and to the benefit of all. **Essential reading for built environment professionals and students doing the professional studies elements of their training or in the process of applying for chartered status or registration. The issues and lessons are applicable across all building professions.** **Feeding Infants and Children from Birth to 24 Months Summarizing Existing Guidance** [National Academies Press](#) Recommendations for feeding infants and young children have changed substantially over time owing to scientific advances, cultural influences, societal trends, and other factors. At the same time, stronger approaches to reviewing and synthesizing scientific evidence have evolved, such that there are now established protocols for developing evidence-based health recommendations. However, not all authoritative bodies have used such approaches for developing infant feeding guidance, and for many feeding questions there is little or no sound evidence available to guide best practices, despite the fact that research on infant and young child feeding has expanded in recent decades. Summarizing the current landscape of feeding recommendations for infants and young children can reveal the level of consistency of existing guidance, shed light on the types of evidence that underpin each recommendation, and provide insight into the feasibility of harmonizing guidelines. Feeding Infants and Children from Birth to 24 Months collects, compares, and summarizes existing recommendations on what and how to feed infants and young children from birth to 24 months of age. This report makes recommendations to stakeholders on strategies for communicating and disseminating feeding recommendations. **MITRE Systems Engineering Guide The American Psychiatric Association Practice Guideline for the Treatment of Patients with Schizophrenia, Third Edition** [American Psychiatric Pub](#) "The goal of this practice guideline is to improve the quality of care and treatment outcomes for patients with schizophrenia. The guideline aims to help clinicians optimize care for their patients by providing evidence-based statements that are intended to enhance knowledge and increase the appropriate use of evidence-based pharmacological and nonpharmacological treatments for schizophrenia. In addition, it includes statements related to assessment and treatment planning, which are an integral part of patient-centered care"-- **Making Dinner How American Home Cooks Produce and Make Meaning Out of the Evening Meal** [Bloomsbury Publishing](#) With a vast selection of foods and thousands of recipes to choose from, how do home cooks in America decide what to cook - and what does their cooking mean to them? Answering this question, Making Dinner is an empirical study of home cooking in the United States. Drawing on a combination of research methods, which includes in-depth interviews with over 50 cooks and cooking journals documenting over 300 home-cooked dinners, Roblyn Rawlins and David Livert explore how American home cooks think and feel about themselves, food, and cooking. Their findings reveal distinct types of cook-the family-first cook, the traditional cook, and the keen cook -and demonstrate how personal identities, family relationships, ideologies of gender and parenthood, and structural constraints all influence what ends up on the plate. Rawlins and Livert reveal research that fills the data gap on practices of home cooking in everyday life. This is an important contribution to fields such as food studies, health and nutrition, sociology, social psychology, anthropology, gender studies, and American studies. **World Guide to Library, Archive, and Information Science Associations Second, completely revised and expanded Edition** [Walter de Gruyter](#) Das Handbuch informiert über Verbände, die in den Bereichen Bibliothekswesen, Dokumentation, Informationswissenschaft und Archivwesen wirken. Die zweite, vollständig überarbeitete und stark erweiterte Ausgabe umfasst 633 ausführliche und aktuelle Einträge aus über 130 Ländern. Mehr als 170 neue Einträge dokumentieren die neuesten Trends und Entwicklungen in diesem Bereich. Im ersten Teil werden die internationalen tätigen Verbände in alphabetischer Reihenfolge aufgeführt, der zweite Teil listet die nationalen Verbände nach Ländern und darin alphabetisch sortiert auf. Der Band wird durch ein Namen- und ein Sachregister sowie ein Register der offiziellen Organe erschlossen. Die Einträge enthalten folgende Angaben: Name, ggf. mit Abkürzung und englischer Übersetzung Adresse mit Telefon, Telex, Fax, E-Mail und URL Funktionsträger, leitende Mitarbeiter - Sprachen, Gründungsjahr Hauptsächliche Tätigkeitsgebiete und Ziele Struktur, Finanzen Übersicht über die Mitglieder (Anzahl, Struktur, Arten der Mitgliedschaft) Mitgliederversammlungen, Tagungen, Publikationen Aktivitäten (z.B. in Gesetzgebungsverfahren oder im Bildungsbereich) **The American Psychiatric Association Practice Guidelines for the Psychiatric Evaluation of Adults, Third Edition** [American Psychiatric Pub](#) Since the publication of the Institute of Medicine (IOM) report Clinical Practice Guidelines We Can Trust in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy, developed in a transparent fashion, and based on a systematic review of the available research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process for practice guideline development. Under this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process,

recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care. **The New Regulatory Framework for Consumer Dispute Resolution** Oxford University Press Consumer out-of-court redress in the European Union is experiencing a significant transformation; indeed the current changes are the most important that have occurred in the history of the EU. This is due to the recent implementation of the Alternative Dispute Resolution (ADR) Directive 2013/11/EU and the Online Dispute Resolution (ODR) Regulation (EU) 2013/524. The Directive ensures the availability of quality ADR schemes and sets information obligations on businesses, and the Regulation enables the resolution of consumer disputes through a pan European ODR platform. The New Regulatory Framework for Consumer Dispute Resolution examines the impact of the new EU law in the field of consumer redress. Part I of the volume examines the new European legal framework and the main methods of consumer redress, including mediation, arbitration, and ombudsman schemes. Part II analyses the implementation of the ADR Directive in nine Member States with very different legal cultures in consumer redress, namely: Belgium, Ireland, Italy, Germany, France, Portugal, Spain, the Netherlands and the UK, as well as the distinct approach taken in the US. Part III evaluates new trends in consumer ADR (CDR) by identifying best practices and looking at future trends in the field. In particular, it offers a vision of the future of CDR which is more than a mere dispute resolution tool, it poses a model on dispute system design for CDR, it examines the challenges of cross-border disputes, it proposes a strategy to promote mediation, and it identifies good practices of CDR and collective redress. The book concludes by calling for the mandatory participation of traders in CDR. **Recasting the Insolvency Regulation Improvements and Missed Opportunities** Springer Nature This book comprises contributions relating to the Insolvency Regulation Recast, which recently entered into force. The authors analyse the changes introduced and give their views on the improvements that are thereby achieved. In other words, they assess to what extent the amendments have mitigated the disadvantages of the previous Insolvency Regulation. Three of the chapters concentrate on the issues pertaining to jurisdiction, such as the problem of forum shopping by re-locating the debtor's centre of main interests. Furthermore, the extent to which the parties have the freedom to contract within the framework of the Insolvency Regulation Recast is discussed. Also, the relevance and consequences of recent developments in corporate law for the current cross-border insolvency framework, as well as the jurisdictional issues concerning approval requirements are amongst the matters addressed. Aside from the jurisdictional matters, the question of the law applicable to so-called 'avoidance actions' is analysed and cross-border cooperation between national authorities in the field of insolvency is touched upon. To conclude, this book covers a range of specific and intriguing topics brought up by the Insolvency Regulations Recast. This third volume in the Short Studies in Private International Law Series is primarily aimed at legal academics dealing with cross-border insolvency, but it will also prove useful to insolvency judges and practitioners, as well as those specialised in financial and fiscal law. Finally, advanced students as well as those with a general interest in insolvency law will also find it of added value. /div Vesna Lazić is Senior Researcher at the T.M.C. Asser Institute and Associate Professor of Private Law at Utrecht University in The Netherlands. Steven Stuij is an expert in private international law and PhD Candidate at the Erasmus School of Law, Rotterdam. /div **Cognitive Therapy for Suicidal Patients Scientific and Clinical Applications** Amer Psychological Assn "Cognitive Therapy for Suicidal Patients: Scientific and Clinical Applications crystallizes more than 3 decades of basic, clinical, and therapeutic research, providing a comprehensive review of the psychological factors associated with suicidal behavior. The authors describe their cognitive model of suicide, the instruments they developed to classify and assess suicidal behavior, and effective cognitive intervention techniques for suicidal individuals. The book includes a step-by-step protocol for cognitive therapy that is vividly illustrated in an extended case study. Individual chapters are dedicated to applying the protocol with special populations and overcoming challenges when working with suicidal patients."--pub. desc. **The Political Economy of HIV/AIDS in Developing Countries TRIPS, Public Health Systems and Free Access** Edward Elgar Publishing The issue of universal and free access to treatment is now a fundamental goal of the international community. Based on original data and field studies from Brazil, Thailand, India and Sub-Saharan Africa under the aegis of ANRS (the French national agency for research on Aids and viral hepatitis, this timely and significant book both assesses the progress made in achieving this objective and presents a rigorous diagnosis of the obstacles that remain. Placing particular emphasis on the constraints imposed by TRIPS as well as the poor state of most public health systems in Southern countries, the contributing authors provide a comprehensive analysis of the huge barriers that have yet to be overcome in order to attain free access to care and offer innovative suggestions of how they might be confronted. In doing this, the book renews our understanding of the political economy of HIV/AIDS in these vast regions, where the disease continues to spread with devastating social and economic consequences. This volume will be a valuable addition to the current literature on HIV/AIDS in developing countries and will find widespread appeal amongst students and academics studying economics, sociology and public health. It will also be of interest to international organizations and professional associations involved in the fight against pandemics. **A Decade of HAART The Development and Global Impact of Highly Active Antiretroviral Therapy** Oxford University Press Highly active antiretroviral therapy (HAART) is a therapeutic intervention that was developed in order to fight the HIV pandemic. This text reviews the achievements to date, and presents an exploration of the challenges that may arise in the future. **Refactoring Improving the Design of Existing Code** Addison-Wesley Professional Users can dramatically improve the design, performance, and manageability of object-oriented code without altering its interfaces or behavior. "Refactoring" shows users exactly how to spot the best opportunities for refactoring and exactly how to do it, step by step. **Swanson's Family Medicine Review A Problem-oriented Approach** Elsevier Health Sciences Thoroughly revised and updated, the most complete family medicine board review guide continues to be the resource of choice for anyone preparing to take the American Board of Family Medicine (ABFM) examination. This edition includes dozens of new cases. **Handbook on the Neuropsychology of Aging and Dementia** Springer This comprehensive update offers practical advice for professionals working in neuropsychology with older adults. Focusing on fundamentals, common issues, special considerations, and late-life cognitive disorders, respected names in this critical specialty address a wide range of presenting problems and assessment, diagnostic, and treatment concerns. Throughout, coverage pays keen attention to detail, bringing real-world nuance to large-scale concepts and breaking down complex processes into digestible steps. And like its predecessor, the new Handbook features recommendations for test batteries and ends each chapter by extracting its "clinical pearls." A sampling of the topics covered: • Assessment of depression and anxiety in older adults. • The assessment of change: serial assessments in dementia evaluations. • Elder abuse identification in older adults. • Clinical assessment of postoperative cognitive decline. • Cognitive training and rehabilitation in aging and dementia. • Differentiating mild cognitive impairment and cognitive changes of normal aging. • Evaluating cognition in patients with chronic obstructive pulmonary disease. This Second Edition of the Handbook on the Neuropsychology of Aging and Dementia offers a wealth of expert knowledge and hands-on guidance for neuropsychologists, gerontologists, social workers, and other clinicians interested in aging. This can be a valuable reference for those studying for board certification in neuropsychology as well as a resource for veteran practitioners brushing up on key concepts in neuropsychology of age related disorders. **Acute and Emergency Care in Athletic Training** Human Kinetics Publishers Acute and Emergency Care in Athletic Training is an invaluable text for students in athletic training programs. It provides them with the necessary information to examine, treat, and manage common acute injuries and illnesses. **Pediatric Primary Care - E-Book** Elsevier Health Sciences Covering the full spectrum of health conditions seen in the primary care of children, Pediatric Primary Care, 5th Edition emphasizes both prevention and management from the unique perspective of the Nurse Practitioner. Written by an expert editor/contributor team, it provides in-depth, evidence-based guidance for assessing and managing health problems in children from infancy through adolescence. Other key topics include developmental theory, the health status of children today, issues of daily living, and cultural considerations. Four-part organization includes an introductory unit, plus units on child development, the health management of children, and diseases and disorders common to childhood. UNIQUE! Functional health patterns framework in Unit Three provides a lens for discussing health promotion through the various components of healthy living. UNIQUE! ICD framework in Unit Four addresses the classification used to code diseases in both hospital and outpatient settings. UNIQUE! Practice management chapter provides need-to-know information on managing a private healthcare practice, including issues of productivity, compliance with applicable laws, quality-of-care indicators, and successful business practices. UNIQUE! Environmental health chapter offers evidence-based content on the effects of environmental toxicants, such as tobacco smoke, heavy metals, and air pollutants. An 8-page color insert presents over 40 photos that visually demonstrate key assessment findings for ear, skin, and other conditions. NEW! Pediatric Pain Management chapter addresses the increased recognition of pain as the "fifth vital sign" with expanded coverage of acute and chronic pain management in children. Extensively revised and updated genetics chapter presents a new paradigm for addressing genetic considerations in clinical practice, including an introduction to epigenetics. Increased emphasis on health disparities explores the growing health disparities among children in the U.S and worldwide and provides strategies to help patients and parents gain accessibility to health care resources. NEW! Content on implementing a "medical home" explores the trend toward family-centered coordinated health care and fosters appropriate treatment for children with chronic disease. NEW! Updated coverage takes a more global approach, exploring the health status of children outside the U.S. Expanded imaging content offers valuable guidance on using various imaging modalities, including how to prepare the child for diagnostics. **Tax and the Digital Economy Challenges and Proposals for Reform** Kluwer Law International B.V. The increasingly digitalized global economy is undermining the usefulness of many traditional tax concepts. In addition to issues of double taxation and double non-taxation, important questions arise concerning the allocation of taxing rights in respect of income from cross-border digital transactions. This is the first book to analyse what changes are possible, necessary and feasible in order to forestall the unravelling of the existing international tax framework. Focusing in turn on the legal framework, specific proposals for adapting tax concepts for the digital economy, types of transactions and administrative issues such as those around data protection and digital currencies, the expert contributors discuss such challenges to taxation as the following: the pervasiveness of intangible assets; new value creation models; the ascendance of the sharing economy and digital services; virtual currencies; the importance of user participation for digital platforms; cloud computing; the impact of Big Data on tax enforcement; virtual business presence; and the influence of robotization. Throughout, the authors describe and analyse proposals made by the Organisation for Economic Co-operation and Development (OECD), the European Union (EU) and individual countries and their likely impact going forward. They also attend to the limits imposed on reform possibilities by public international law, EU law and constitutional law. It is generally acknowledged that there is a need to monitor how the digital transformation may be impacting value creation. This book is a key milestone toward developing a durable, long-term solution to the tax challenges posed by the digitalization of the economy. With its thorough scrutiny of proposals for digital services tax and virtual permanent establishments, insightful analysis of digital services and detailed description of the impact of big data on tax administration and taxpayer protection, it will quickly prove indispensable for tax practitioners and the international tax community more generally. **Deciding Children's Futures An Expert Guide to Assessments for Safeguarding and Promoting Children's Welfare in Family Court** Routledge Deciding Children's Futures addresses the thorny task of how to assess parents and children who belong to struggling families where there are issues of neglect or significant harm, and when separating parents are contesting arrangements for the care of their children. This is a practitioner's guide: it discusses how to create relationships that are capable of breaching natural parental defences to assessment; the importance of keeping an open mind, how to ask questions that fathom people's experiences, and how to develop understanding of their histories, narratives, worries, hopes and fears. Joyce Scaife's approach draws on practice knowledge, theory and research findings with a view to integrating the accounts of parents and children with safeguarding imperatives and government guidance, thereby enabling professionals to make informed decisions designed to impact positively on children's futures. This accessible and comprehensive book will be of great interest to 'expert' witnesses, practising social workers, children's guardians, solicitors, barristers, magistrates and mental health professionals. Joyce Scaife is a clinical psychologist with over 15 years of experience in carrying out assessments for the family court. She is former Director of Clinical Practice for the Doctor of Clinical Psychology training course at the University of Sheffield.
