Advanced Dermatologic Therapy II

Saunders *Written for the practicing dermatologist, ADVANCED DERMATOLOGIC THERAPY II summarizes treatment options for most skin disorders encountered in the typical dermatologic practice. This thoroughly up-to-date, advanced reference offers a broad scope of current therapeutic possibilities from thousands of journal entries noted. This unique prescriptionary allows the reader to quickly scan and rapidly integrate advanced dermatologic therapeutics into his or her practice. It also includes special therapeutic vignettes from the authors' practice for keen insight into therapeutic decision making. The authors have researched an extraordinary range of therapies from cutting-edge articles to give you the widest range of therapeutic possibilities - somewhere to turn when all else fails Presents data succinctly, alphabetized under diagnosis, on well over 250 conditions from abscesses to xeroderma pigmentosum Clinical focus is assured by the inclusion of special therapeutic case studies from the authors' own practice More diseases, and more treatments for them, mean an extra 250 pages As practising dermatologists, the authors have added time saving features - for instance, all treatments are listed at the start of each topic and are highlighted in the text to allow you to quickly assess your options Always a pleasure to read, the new edition is also a pleasure to look at, complete with a full colour design and many full colour images*

Scottish Medical and Surgical Journal

Top 50 Dermatology Case Studies for Primary Care

Springer *This landmark text is dedicated to the conversation had between a primary care physician and a dermatologist that is a true reflection of the way medicine works when these physicians collaborate on the same case. The book uses actual case studies from the authors' offices and provides an accurate and real portrayal of the types of skin conditions primary care physicians encounter. Answering questions such as when to treat, how to treat, when to refer, when to biopsy, and when to reassure, this book informs and educates primary care physicians with a dermatologist's perspective. Top 50 Dermatology Case Studies for Primary Care gives the reader an entirely new vantage point from which to view dermatologic cases, and together with one of New York City's top dermatologists, the authors look at the same case, the same patient, and compare what each did or would have done. Written for family medicine and internal medicine physicians, residents and providers, Top 50 Dermatology Case Studies for Primary Care proves to be an invaluable resource in their day-to-day practices.*

The Treatment of Prisoners under International Law

OUP Oxford *This is the third edition of the pioneering work that has become the standard text in the field. The first edition was one of the earliest to establish that the newly-developing international law of human rights could be set down as any other branch of international law. It also incorporates the complementary fields of international humanitarian law and international criminal law, while addressing the problems associated with their interaction with human rights law. The book is more than a descriptive analysis of the field. It acknowledges areas of unclarity or where developments may be embryonic. Solutions are offered. Recent developments have confirmed the value of solutions proposed in this edition and the previous one. Central to most of the chapters is the human rights norm of most salience in the treatment of prisoners, namely, the prohibition of torture and cruel, inhuman or degrading treatment or punishment. The early chapters focus on the period of first detention, when detainees are most at risk of having information or confessions, however unreliable, extracted by unlawful means. Voices contemplating the legitimacy of such treatment to combat terrorism have been heard in the wake of the atrocities of 11 September 2001. The book finds that the evidence clearly suggests that the absolute prohibition of such treatment remains firm. Other chapters deal with problems of poor prison conditions and of certain extraordinary penalties, notably corporal and capital punishment. A chapter explores ethical codes for members of professions capable of inflicting or preventing the prohibited behaviour (police and medical and legal professionals). Chapters are also devoted to the extreme practice of enforced disappearance and the contribution of the new convention on this phenomenon, as well as to extra-legal executions.*

Parasites of the Colder Climates

CRC Press *The parasitic load in cold northern climates is widely under-appreciated. Many texts on parasitology concentrate on tropical parasitic infections, so the reader can be forgiven for thinking that parasites are not a problem in the northern part of the world. Parasites of the Colder Climates redresses the balance by focusing on parasites indigenous t*
