Toward a Livable Life

A 21st Century Agenda for Social Work

Oxford University Press, USA "Towards a Livable Life: A 21st Century Agenda for Social Work explores many of today's most critical issues facing America and the profession of social work. A wide range of leading social work scholars have been brought together to explore and provide innovative solutions to these societal issues. The book is organized around ten key topics. They include reducing health disparities; alleviating poverty; confronting discrimination; addressing inequality; building assets for lower income populations; preventing child maltreatment, fostering civic engagement; building healthy communities; achieving environmental justice; and engaging older adults. Tying the book together across each of these chapters is a foundational idea - that the focus of today's social work must be to enable every individual to achieve what is referred to as a livable life. A livable life is one in which individuals are able to thrive and develop in order to reach their full potential and capacity. Whether the concern is with the household, community, or society at large, striving toward conditions in which all members of these groups can reach their full potential is paramount. It is argued that achieving such a goal must be the ultimate challenge for social work in the 21st century"--

Climate Change Adaptation Framework and Youth Entrepreneurship in West Africa

Springer Nature This book's purpose is to highlight the development challenges and successes of implementing the Youth Climate Change Adaptation Development Framework in Sierra Leone, West Africa. Over the past decade, Sierra Leone has experienced a series of development challenges, including internal conflict and Ebola outbreaks in most recent times. The dire unemployment situation in Sierra Leone is compounded by the emergence of climate change that negatively impacts all aspects of daily life and wellbeing, and the education and training provided do not prepare young people adequately for the job market. Therefore, building youth resilience to adapt to the impact of climate change and other development problems is a significant development challenge faced by policymakers in Sierra Leone. The government, through funding from the African Development Bank (AfDB), has provided support for the implementation of a Youth Employment and Entrepreneurship Project (YEEP) to reinforce the employability of Sierra Leone Youth as well as enhance their entrepreneurship and employment skills through the development of a framework that integrates education and vocational institutions with job market demand and supply. This approach has resulted in strengthening the occupational levels in the youth population segments of the country. This book discusses the objectives and outcomes of this project, including curricula for Sustainable Construction, training of counselors and administrators, providing youths with supervisory skills, and developing tools to assess youth development institutions' weaknesses and enhance institutional capacity to deliver climate change adaptation for sustainable development programmes. The book can be used by policymakers from Small Island Developing States (SIDS) and LDCs in Africa and Asia. It can be used by researchers working on Climate Change, Education, Sustainable Development, emphasising Climate Change Education for Sustainable Development in both developing and developed countries. It can also be used by practitioners involved in implementing innovations in youth development, employment, entrepreneurship, sustainable livelihoods initiatives, climate change adaptation, and mitigation. These practitioners and researchers would find this book an invaluable resource to support their work in the field.

Adventure Comics and Youth Cultures in India

Taylor & Francis *This pioneering book presents a history and ethnography of adventure comic books for young people in India with a particular focus on vernacular superheroism. It chronicles popular and youth culture in the subcontinent from the mid-twentieth century to the contemporary era dominated by creative audio-video-digital outlets. The authors highlight early precedents in adventures set by the avuncular detective Chacha Chaudhary with his 'faster than a computer brain', the forays of the film veteran Amitabh Bachchan's superheroic alter ego called Supremo, the Protectors of Earth and Mankind (P.O.E.M.), along with the exploits of key comic book characters, such as Nagraj, Super Commando Dhruv, Parmanu, Doga, Shakti and Chandika. The book considers how pulp literature, western comics, television programmes, technological developments and major space ventures sparked a thirst for extraterrestrial action and how these laid the grounds for vernacular ventures in the Indian superhero comics genre. It contains descriptions, textual and contextual analyses, excerpts of interviews with comic book creators, producers, retailers and distributors, together with the views, dreams and fantasies of young readers of adventure comics. These narratives touch upon special powers, super-intelligence, phenomenal technologies, justice, vengeance, geopolitics, romance, sex and the*

amazing potentials of masked identities enabled by navigation of the internet. With its lucid style and rich illustrations, this book will be essential reading for scholars and researchers of popular and visual cultures, comics studies, literature, media and cultural studies, social anthropology and sociology, and South Asian studies.

Community Programs to Promote Youth Development

National Academies Press After-school programs, scout groups, community service activities, religious youth groups, and other community-based activities have long been thought to play a key role in the lives of adolescents. But what do we know about the role of such programs for today's adolescents? How can we ensure that programs are designed to successfully meet young people's developmental needs and help them become healthy, happy, and productive adults? Community Programs to Promote Youth Development explores these questions, focusing on essential elements of adolescent well-being and healthy development. It offers recommendations for policy, practice, and research to ensure that programs are well designed to meet young people's developmental needs. The book also discusses the features of programs that can contribute to a successful transition from adolescence to adulthood. It examines what we know about the current landscape of youth development programs for America's youth, as well as how these programs are meeting their diverse needs. Recognizing the importance of adolescence as a period of transition to adulthood, Community Programs to Promote Youth Development offers authoritative guidance to policy makers, practitioners, researchers, and other key stakeholders on the role of youth development programs to promote the healthy development and well-being of the nation's youth.

Manual for organizing youth consultations: Together towards a global deal for nature and people

Nordic Council of Ministers All over the world, young people are demanding action to protect our planet. In 2020 a new global deal for nature and people will be adopted, setting targets for the protection and conservation of the planet's biodiversity and ecosystems. It is of crucial importance that the voices of young people are heard when these new targets are set, as this will affect not only the present generation, but also future generations and their livelihoods. In the Nordic Region we want to make sure that the voices of the young people will be heard and therefore we have developed this toolkit for involving young people in setting new targets for the protection and sustainable use of biodiversity and ecosystems, thereby securing a new global deal for nature and people! The toolkit is made available to young people and those who want to engage young people in the development of a new global deal for nature and people. Anyone who wishes to arrange, facilitate and engage in youth consultations is invited to use the toolkit. The results can be communicated to decision-makers, the public and other relevant institutions and will be part of a bigger movement of youth around the world. The aim is to support young people, youth organisations and other interested groups in their facilitation of discussions on key issues relating to a new deal for nature and people, and to ensure the credibility of the results from the youth workshop. The Toolkit has been developed in close corporation with the Nordic Council and the Nordic Council of Ministers, in close corporation with young people

from the Nordic countries.

The Silk Roads

A New History of the World

Vintage *Far more than a history of the Silk Roads, this book is truly a revelatory new history of the world, promising to destabilize notions of where we come from and where we are headed next. From the Middle East and its political instability to China and its economic rise, the vast region stretching eastward from the Balkans across the steppe and South Asia has been thrust into the global spotlight in recent years. Frankopan teaches us that to understand what is at stake for the cities and nations built on these intricate trade routes, we must first understand their astounding pasts. Frankopan realigns our understanding of the world, pointing us eastward. It was on the Silk Roads that East and West first encountered each other through trade and conquest, leading to the spread of ideas, cultures and religions. From the rise and fall of empires to the spread of Buddhism and the advent of Christianity and Islam, right up to the great wars of the twentieth century—this book shows how the fate of the West has always been inextricably linked to the East. Also available: *The New Silk Roads*, a timely exploration of the dramatic and profound changes our world is undergoing right now—as seen from the perspective of the rising powers of the East.*

Intermediate Language Varieties

Koinai and regional standards in Europe

John Benjamins Publishing Company *The papers in this volume address the interplay of factors underlying the formation of intermediate varieties in the 'dialect-standard' landscape of present-day Europe. Research is presented on varieties of several different languages (Norwegian, Dutch, German, Italian, Spanish, Greek), on speech communities with different (geo)political and sociolinguistic histories, as well as on previously unexplored sociolinguistic situations. The contributions all share the twin characteristics of (a) robust scrutiny of structural variation and its links to both structural-systemic parameters and extralinguistic variables and (b) nuanced approaches to macro- and micro- level categories, with the requisite theoretical and methodological fine-tuning. While focusing on different languages/language groups, the papers in this volume share the common foci of bringing together structural and sociolinguistic considerations and of the concomitant necessary revisiting of methodologies. The data and analyses presented yield a firmer and more nuanced understanding of the dynamic permutations of cross-dialectal and dialect-to-standard convergence and the formation of intermediate varieties in different yet comparable contexts.*

The People's Voice

The Development and Current State of the South African Small Media Sector

HSRC Press The study provides an overview of relevant legislation and policy in South Africa, pre- and post- 1994, as well as a review of international research that reveals global trends in small media development. It sketches the distribution of the sector in South Africa, revealing the topography of service providers and key stakeholders. The report identifies the interests that are common to small independent and community media groupings and examines ways in which the sustainability of these organisations can be promoted. Providing a range of pertinent data, analysis and information, this study will be invaluable for anyone wishing to engage effectively with the small media sector. The Media Development and Diversity Agency (MDDA) was established to direct funding and support to the small media sector in the interests of deepening South Africa's young democracy. The principal objective of this study is to assist the MDDA in its important and complex work.

Climate change and tenure rights: Interlinked challenges in Cambodia

Policy brief

Food & Agriculture Org. *Asia and the Pacific, home to one quarter of the global population including Cambodia, is the region with the highest proportion of weather-related disaster displacements worldwide, experiencing more than 70 percent of storms and half of the floods globally. Such climate change related vulnerabilities pose significant threats to agriculture and food security including drier conditions, higher temperatures, flooding and sea level rise, and make adaptation a high priority. The agricultural sector is considered particularly vulnerable. Temperature rise, floods and extreme weather events are expected to have major negative impacts on agricultural production and food security. Against this background the policy and legal framework in the country is assessed on its preparedness to cope with the changes, risks and opportunities for adaptation and mitigation actions and the role of tenure in these. A set of country recommendations is provided to enhance the protection of land tenure rights in face of climate change risks and challenges identified and to safeguard tenure rights from the risks posed by the threats of climate change.*
