## Where am I Wearing?

### A Global Tour to the Countries, Factories, and People That Make Our Clothes

New content includes: a visit to a fair trade Ethiopian shoe factory that is changing lives one job at time; updates on how workers worldwide have been squeezed by rising food costs and declining orders in the wake of the global financial crisis; and the author's search for the garment worker in Honduras who inspired the first edition of the book Kelsey Timmerman speaks and universities around the country and maintains a blog at [www.whereamiwearing.com](http://www.whereamiwearing.com). ## Where Am I Eating An Adventure Through the Global Food Economy

Wiley Bridges the gap between global farmers and fishermen and American consumers America now imports twice as much food as it did a decade ago. What does this increased reliance on imported food mean for the people around the globe who produce our food? Kelsey Timmerman set out on a global quest to meet the farmers and fisherman who grow and catch our food, and also worked alongside them: loading lobster boats in Nicaragua, splitting cocoa beans with a machete in Ivory Coast, and hauling tomatoes in Ohio. Where Am I Eating? tells fascinating stories of the farmers and fishermen around the world who produce the food we eat, explaining what their lives are like and how our habits affect them. ## Made in Madagascar

## Sapphires, Ecotourism, and the Global Bazaar

[University of Toronto Press](#) **Since the 1990s, the Ankarana region of northern Madagascar has developed a reputation among globe-trotting gemstone traders and tourists as a source of some of the world's most precious natural wonders. Although some might see Ankarana's sapphire and ecotourist trades as being at odds with each other, many local people understand these trades to be fundamentally connected, most obviously in how both serve foreign demand for what Madagascar has to offer the world. Walsh explores the tensions and speculations that have come with the parallel emergence of these two trades with sensitivity and a critical eye, allowing for insights into globalization, inequality, and the appeal of the "natural." ## Incarcerated Women

## A History of Struggles, Oppression, and Resistance in American Prisons

[Lexington Books](#) **The story of the rise of prisons and development of prison systems in the United States has been studied extensively in scholarship, but the experiences of female inmates in these institutions have not received the same attention. Historically, women incarcerated in prison, jails, and reformatories accounted for a small number of inmates across the United States. Early on, they were often held in prisons alongside men and faced neglect, exploitation, and poor living conditions. Various attempts to reform them, ranging from moral instruction and education to domestic training, faced opposition at times from state officials, prison employees, and even male prison**

reformers. Due to the consistent small populations and relative neglect the women often faced, their experiences in prison have been understudied. This collection of essays seeks to recapture the perspective on women's prison experience from a range of viewpoints. This edited collection will explore the challenges women faced as inmates, their efforts to exert agency or control over their lives and bodies, how issues of race and social class influenced experiences, and how their experiences differed from that of male inmates. Contributions extend from the early nineteenth century into the twenty-first century to provide an opportunity to examine change over time with regards to female imprisonment. Furthermore, the chapters examine numerous geographic regions, allowing for readers to analyze how place and environment shapes the inmate experience.

## Tight Knit

### Global Families and the Social Life of Fast Fashion

[University of Chicago Press](#) The coveted "Made in Italy" label calls to mind visions of nimble-fingered Italian tailors lovingly sewing elegant, high-end clothing. The phrase evokes a sense of authenticity, heritage, and rustic charm. Yet, as Elizabeth L. Krause uncovers in *Tight Knit*, Chinese migrants are the ones sewing "Made in Italy" labels into low-cost items for a thriving fast-fashion industry—all the while adding new patterns to the social fabric of Italy's iconic industry. Krause offers a revelatory look into how families involved in the fashion industry are coping with globalization based on longterm research in Prato, the historic hub of textile production in the heart of metropolitan Tuscany. She brings to the fore the tensions—over value, money, beauty, family, care, and belonging—that are reaching a boiling point as the country struggles to deal with the same migration pressures that are triggering backlash all over Europe and North America. *Tight Knit* tells a fascinating story about the heterogeneity of contemporary capitalism that will interest social scientists, immigration experts, and anyone curious about how globalization is changing the most basic of human conditions—making a living and making a life.

## Midwives and Mothers

### The Medicalization of Childbirth on a Guatemalan Plantation

[University of Texas Press](#) The World Health Organization is currently promoting a policy of replacing traditional or lay midwives in countries around the world. As part of an effort to record the knowledge of local midwives before it is lost, *Midwives and Mothers* explores birth, illness, death, and survival on a Guatemalan sugar and coffee plantation, or finca, through the lives of two local midwives, Doña Maria and her daughter Doña Siriaca, and the women they have served over a forty-year period. By comparing the practices and beliefs of the mother and daughter, Sheila Cosminsky shows the dynamics of the medicalization process and the contestation between the midwives and biomedical personnel, as the latter try to impose their system as the authoritative one. She discusses how the midwives syncretize, integrate, or reject elements from Mayan, Spanish, and biomedical systems. The midwives' story becomes a lens for understanding the impact of medicalization on people's lives and the ways in which women's bodies have become contested terrain between traditional and contemporary medical practices. Cosminsky also makes recommendations for how ethno-obstetric and biomedical systems may be accommodated, articulated, or integrated. Finally, she places the changes in the birthing system in the larger context of changes in the plantation system, including the elimination of coffee growing, which has made women, traditionally the primary harvesters of coffee beans, more economically dependent on men.

## Sustainable Fashion

### Past, Present and Future

[Bloomsbury Publishing](#) *Sustainable Fashion* provides a unique and accessible overview of fashion ethics and sustainability issues of the past, present and future. This book is the first to situate today's eco-fashion movement in its multifaceted historical context, investigating the relationship between fashion and the environment as far back as the early nineteenth century. Employing an expanded definition of sustainability that also considers ethical issues, Farley

Gordon and Hill explore each stage of the fashion production cycle, from the cultivation of raw fibers to the shipment of the finished garment. Structured thematically, each of the six chapters is dedicated to the discussion of one major issue, from recycling and repurposing to labor practices and the treatment of animals. Including interviews with eco-fashion designers, *Sustainable Fashion* will appeal to students and scholars of fashion, as well as students of design, history and cultural studies.

## Looking behind the Label

## Global Industries and the Conscientious Consumer

[Indiana University Press](#) **What does it mean when consumers "shop with a conscience" and choose products labeled as fair or sustainable? Does this translate into meaningful changes in global production processes? To what extent are voluntary standards implemented and enforced, and can they really govern global industries? Looking behind the Label presents an informative introduction to global production and ethical consumption, tracing the links between consumers' choices and the practices of multinational producers and retailers. Case studies of several types of products—wood and paper, food, apparel and footwear, and electronics—are used to reveal what lies behind voluntary rules and to critique predominant assumptions about ethical consumption as a form of political expression.**

## The Oxford Handbook of Consumption

[Oxford University Press](#) **The Oxford Handbook of Consumption consolidates the most innovative recent work conducted by social scientists in the field of consumption studies and identifies some of the most fruitful lines of inquiry for future research. It begins by embedding marketing in its global history, enmeshed in various political, economic, and social sites. From this embedded perspective, the book branches out to examine the rise of consumer culture theory among consumer researchers and parallel innovative developments in sociology and anthropology, with scholarship analyzing the roles that identity, social networks, organizational dynamics, institutions, market devices, materiality, and cultural meanings play across a wide variety of applications, including, but not limited to, brands and branding, the sharing economy, tastes and preferences, credit and credit scoring, consumer surveillance, race and ethnicity, status, family life, well-being, environmental sustainability, social movements, and social inequality. The volume is unique in the attention it gives to consumer research on inequality and the focus it has on consumer credit scores and consumer behaviors that shape life chances. The volume includes essays by many of the key researchers in the field, some of whom have only recently, if at all, crossed the disciplinary lines that this volume has enabled. The contributors have tried to address several key questions: What motivates consumption and what does it mean to be a consumer? What social, technical, and cultural systems integrate and give character to contemporary consumption? What actors, institutions, and understandings organize and govern consumption? And what are the social uses and effects of consumption?**

## Animals

### A Novel

**Catapult** A riveting dystopian novel that examines how humans mistreat animals, and each other: “A powerful piece of writing, and a disturbing call to conscience” (J.M. Coetzee). It is more than 100 years in the future and the horrors of factory farming, combined with the widespread abuse of antibiotics, have led to mass extinctions. The majority of all mammals, birds, and fish that humans have eaten for millennia no longer exist. Those not fully capable are deemed undeserving of an equal share of scarce medical resources and are ultimately classified as less than human. As paranoia about our food supplies spreads, a forceful new logic takes hold; in the blink of a millennial eye the disenfranchised have become our food. Don LePan’s “well-plotted” and “formally audacious” novel shows us a world at once eerily foreign and disturbingly familiar (Booklist). It follows the dramatic events that unfold within a family after they take in an abandoned mongrel boy. In the sharp-edged poignancy of the ethical questions it poses, in the striking narrative techniques it employs, and above all, in the remarkable power of the story it tells, *Animals* proves itself a transformative work of fiction.

## 50 Jobs in 50 States

### One Man's Journey of Discovery Across America

**Berrett-Koehler Publishers** Like lots of college grads, Daniel Seddiqui was having a hard time finding a job. But despite more than forty rejections, he knew opportunities had to exist. So he set out on an extraordinary quest: fifty jobs in fifty states in fifty weeks. And not just any jobs—he chose professions that reflected the culture and economy of each state. Working as everything from a cheesemaker in Wisconsin, a border patrol agent in Arizona, and a meatpacker in Kansas to a lobsterman in Maine, a surfing instructor in Hawaii, and a football coach in Alabama, Daniel chronicles how he adapted to the wildly differing people, cultures, and environments. From one week to the next he had no idea exactly what his duties would be, where he'd be sleeping, what he'd be eating, or how he'd be received. He became a roving news item, appearing on CNN, Fox News, World News Tonight, MSNBC, and the Today show—which was good preparation for his stint as a television weatherman. Tackling challenge after challenge—overcoming anxiety about working four miles underground in a West Virginia coal mine, learning to walk on six-foot stilts (in a full Egyptian king costume) at a Florida amusement park, racing the clock as a pit-crew member at an Indiana racetrack—Daniel completed his journey a changed man. In this book he shares stories about the people he met, reveals the lessons he learned, and explains the five principles that kept him going.

## Capitalism and Desire

### The Psychic Cost of Free Markets

Columbia University Press **Despite creating vast inequalities and propping up reactionary world regimes, capitalism has many passionate defenders—but not because of what it withholds from some and gives to others. Capitalism dominates, Todd McGowan argues, because it mimics the structure of our desire while hiding the trauma that the system inflicts upon it. People from all backgrounds enjoy what capitalism provides, but at the same time are told more and better is yet to come. Capitalism traps us through an incomplete satisfaction that compels us after the new, the better, and the more. Capitalism's parasitic relationship to our desires gives it the illusion of corresponding to our natural impulses, which is how capitalism's defenders characterize it. By understanding this psychic strategy, McGowan hopes to divest us of our addiction to capitalist enrichment and help us rediscover enjoyment as we actually experienced it. By locating it in the present, McGowan frees us from our attachment to a better future and the belief that capitalism is an essential outgrowth of human nature. From this perspective, our economic, social, and political worlds open up to real political change. Eloquent and enlivened by examples from film, television, consumer culture, and everyday life, Capitalism and Desire brings a new, psychoanalytically grounded approach to political and social theory.**

## Tobacco Town Futures

### Global Encounters in Rural Kentucky

Waveland Press **Situated between the foothills of Appalachia to the east and bluegrass country to the west, Nicholas County has been home to small tobacco farms in rural Kentucky for the past 200 years. But now, in the midst of tremendous economic changes generated by the movement of both textile jobs and tobacco production to other countries, residents of Nicholas County face an uncertain future. Based on twenty-five years of research, Kingsolvers longitudinal ethnography of Nicholas County, her home community, synthesizes geographical, historical, economic, and political processes that have shaped lifeways and worldviews. She documents the perspectives of farmers, factory workers, politicians, those pursuing new niches in the labor market, and middle school students in search of alternative futures. Countering stereotypes, Kingsolver emphasizes the skills and agency of rural residents and demonstrates how people in widely dispersed and seemingly isolated communities in the world are connected through capitalist logic and practice, thereby illuminating globalizations far-reaching effects.**

## The Holy See, Social Justice, and International Trade Law

### Assessing the Social Mission of the Catholic Church in the Gatt-Wto System

AuthorHouse **The Holy See, Social Justice, and International Trade Law: Assessing the Social Mission of the Catholic Church in the GATT-WTO System highlights the uniqueness of the Catholic Church as the foremost institution in the world that can confront issues in world trade that affect the common good. The distinguished author Rev. Dr. Alphonsus Ihuoma provides a superbly broad and deep examination that is both scholarly and practical of the mission of the Catholic Church in the world as one that centers on the temporal and eternal needs of humanity. His discussion**

treats thoughtfully the mediatory role of the church in world affairs and argues persuasively that the church has been engaged in this role since its very beginning, even before nations embraced organized politics two thousand years ago. This remarkable book is a great tool for any reader seeking to know more about the unique position of the church in world affairs, especially in the GATT-WTO system. The book rightly lauds the church's achievements in history. But it equally and rightly argues that the church must do more to address present challenges in the world trading system. Readers will be enlightened by the treatment of the failures of the GATT-WTO system in pursuing the objectives for which it was established, the church's efforts to pursue vital related objectives, and the need for her to do more.

### An Adventure Through the Global Food Economy with Discussion Questions and a Guide to Going "Glocal"

John Wiley & Sons A deeply human-centered perspective on the origins of America's food *Where Am I Eating?* bridges the gap between global food producers and the American consumer, providing an insightful look at how our eating habits affect farmers and fishermen around the world. Follow the author on his global quest to meet the workers that nurture, harvest, and hunt our food, as he works alongside them—loading lobster diving boats in Nicaragua, harvesting bananas in Costa Rica, lugging cocoa beans in Ivory Coast with a modern-day slave, picking coffee beans in Colombia and hauling tomatoes in Indiana. This new edition includes a study guide, a deeper explanation of the "glocal" concept, and advice for students looking to become engaged as both local and global citizens. Arguing neither for nor against globalization, this book simply explores the lives of those who feed us. Imports account for eighty-six percent of America's seafood, fifty percent of its fresh fruit, and eighteen percent of its fresh vegetables. *Where Am I Eating?* examines the effects of this reliance on those who supply the global food economy. Learn more about the global producers that feed our nation, and learn from their worldviews intensely connected to people and planet Discover how food preferences and trends affect the lives of farmers and fishermen Catch a boots-on-the-ground glimpse of the daily lives of food producers on four continents Meet a modern-day slave and explore the blurred line between exploitation and opportunity Observe how the poorest producers fare in the global food economy This book takes a human-centered approach to food, investigating the lives of the people at the other end of the global food economy, observing the hope and opportunity—or lack thereof—that results from our reliance on imports. *Where Am I Eating?* is a touching, insightful, informative look at the origins of our food.
