## I and Thou

*eBookIt.com* **I AND THOU** is one of the most important books of Western Theology. In it, Martin Buber, heavily influenced by the writings of Nietzsche, unites the proto-Existentialist currents of modern German thought with the Judeo-Christian tradition, powerfully updating faith for modern times. Since its first appearance in Germany in 1923, this slender volume has become one of the epoch-making works of our time. This work is the centerpiece of Buber's philosophy. It lays out a view of the world in which human beings can enter into relationships using their innermost and whole beings to form true partnerships. This is the original English translation, and it was prepared in the author's presence.

# Quantum Change

## When Epiphanies and Sudden Insights Transform Ordinary Lives

*Guilford Press* **Most of us walk through each day expecting few surprises. If we want to better ourselves or our lives, we map out a path of gradual change, perhaps in counseling or psychotherapy. Psychologists William Miller and Janet C'de Baca were longtime scholars and teachers of traditional approaches to self-improvement when they became intrigued by a different sort of change that was sometimes experienced by people they encountered--something often described as "a bolt from the blue" or "seeing the light." And when they placed a request in a local newspaper for people's stories of unexpected personal transformation, the deluge of responses was astounding. These compelling stories of epiphanies and sudden insights inspired Miller and C'de Baca to examine the experience of "quantum change" through**

the lens of scientific psychology. Where does quantum change come from? Why do some of us experience it, and what kind of people do we become as a result? The answers that this book arrives at yield remarkable insights into how human beings achieve lasting change--sometimes even in spite of ourselves.

## The Big Short: Inside the Doomsday Machine (movie tie-in)

*W. W. Norton & Company* **The #1 New York Times bestseller—Now a Major Motion Picture from Paramount Pictures** From the author of *The Blind Side* and *Moneyball*, *The Big Short* tells the story of four outsiders in the world of high-finance who predict the credit and housing bubble collapse before anyone else. The film adaptation by Adam McKay (*Anchorman I and II*, *The Other Guys*) features Academy Award® winners Christian Bale, Brad Pitt, Melissa Leo and Marisa Tomei; Academy Award® nominees Steve Carell and Ryan Gosling. When the crash of the U.S. stock market became public knowledge in the fall of 2008, it was already old news. The real crash, the silent crash, had taken place over the previous year, in bizarre feeder markets where the sun doesn't shine and the SEC doesn't dare, or bother, to tread. Who understood the risk inherent in the assumption of ever-rising real estate prices, a risk compounded daily by the creation of those arcane, artificial securities loosely based on piles of doubtful mortgages? In this fitting sequel to *Liar's Poker*, Michael Lewis answers that question in a narrative brimming with indignation and dark humor.

## Wittgenstein's Vienna

*Ivan R Dee* **This is a remarkable book about a man (perhaps the most important and original philosopher of our age), a society (the corrupt Austro-Hungarian Empire on the eve of dissolution), and a city (Vienna, with its fin-de siecle gaiety and corrosive melancholy).** The central figure in this study of a crumbling society that gave birth to the modern world is Wittgenstein, the brilliant and gifted young thinker. With others, including Freud, Viktor Adler, and Arnold Schoenberg, he forged his ideas in a classical revolt against the stuffy, doomed, and moralistic lives of the old regime. As a portrait of Wittgenstein, the book is superbly realized; it is even better as a portrait of the age, with dazzling and unusual parallels to our own confused society. Allan Janik and Stephen Toulmin have acted on a striking premise: an understanding of prewar Vienna, Wittgenstein's native city, will make it easier to comprehend both his work and our

own problems .This is an independent work containing much that is challenging, new, and useful. **New York Times Book Review.**"

## Is That a Fish in Your Ear?

### Translation and the Meaning of Everything

*Farrar, Straus and Giroux* **A New York Times Notable Book for 2011 One of The Economist's 2011 Books of the Year** People speak different languages, and always have. The Ancient Greeks took no notice of anything unless it was said in Greek; the Romans made everyone speak Latin; and in India, people learned their neighbors' languages—as did many ordinary Europeans in times past (Christopher Columbus knew Italian, Portuguese, and Castilian Spanish as well as the classical languages). But today, we all use translation to cope with the diversity of languages. Without translation there would be no world news, not much of a reading list in any subject at college, no repair manuals for cars or planes; we wouldn't even be able to put together flat-pack furniture. **Is That a Fish in Your Ear?** ranges across the whole of human

experience, from foreign films to philosophy, to show why translation is at the heart of what we do and who we are. Among many other things, David Bellos asks: What's the difference between translating unprepared natural speech and translating Madame Bovary? How do you translate a joke? What's the difference between a native tongue and a learned one? Can you translate between any pair of languages, or only between some? What really goes on when world leaders speak at the UN? Can machines ever replace human translators, and if not, why? But the biggest question Bellos asks is this: How do we ever really know that we've understood what anybody else says—in our own language or in another? Surprising, witty, and written with great joie de vivre, this book is all about how we comprehend other people and shows us how, ultimately, translation is another name for the human condition.

## The Theory Of Celestial Influence

*Lulu.com* Before Paulo Coelho and Eckhart Tolle came Rodney Collin. A huge 462 page book full of essential knowledge. **How To Become Supernatural Man, The Universe and Cosmic Mystery** is an exploration of the universe and man's place in it. Rodney Collin examines 20th-century scientific discoveries and traditional esoteric teachings and concludes that the driving force behind everything is neither procreation nor survival, but expansion of awareness. Collin sets out to reconcile the considerable contradictions of the rational and imaginative minds and of the ways we see the external world versus our inner selves. For readers familiar with Gurdjieff's cosmology will here find further examinations of the systems outlined in by Ouspensky in *Search of the Miraculous*.

## Life and Fate

*Everyman's Library CLASSICS* Based around the pivotal WWII battle of Stalingrad (1942-3), where the German advance into Russia was eventually halted by the Red Army, and around an extended family, the Shaposhnikovs, and their many friends and acquaintances, *Life and Fate* recounts the experience of characters caught up in an immense struggle between opposing armies and ideologies. Nazism and Communism are appallingly similar, 'two poles of one magnet', as a German camp commander tells a shocked old Bolshevik prisoner. At the height of the battle Russian soldiers and citizens alike are at last able to speak out as they choose, and without reprisal - an unexpected and short-lived moment of freedom. Grossman himself was on the front line as a war correspondent at Stalingrad - hence his gripping battle scenes, though these are more than matched by the drama of the individual conscience struggling

against massive pressure to submit to the State. He knew all about this from experience too. His central character, Viktor Shtrum, eventually succumbs, but each delay and act of resistance is a moral victory. Though he writes unsparingly of war, terror and totalitarianism, Grossman also tells of the acts of 'senseless kindness' that redeem humanity, and his message remains one of hope. He dedicates his book, the labour of ten years, and which he did not live to see published, to his mother, who, like Viktor Shtrum's, was killed in the holocaust at Berdichev in Ukraine in September 1941.

## of Mind

*W. W. Norton & Company* **“A stunning book.”—Oliver Sacks** **Memory binds our mental life together. We are who we are in large part because of what we learn and remember. But how does the brain create memories? Nobel Prize winner Eric R. Kandel intertwines the intellectual history of the powerful new science of the mind—a combination of cognitive psychology, neuroscience, and molecular biology—with his own personal quest to understand memory. A deft mixture of memoir and history, modern biology and behavior, In Search of Memory brings readers from Kandel's childhood in Nazi-occupied Vienna to the forefront of one of the great scientific endeavors of the twentieth century: the search for the biological basis of memory.**

## Renovation of the Heart

## Putting On the Character of Christ

*Tyndale House* **As Christians, we know that we are new creations in Jesus. So we try to act differently, hoping this will make us more like Him. But changing our outward behavior doesn't change our hearts. Only by God's grace can we be transformed internally. Renovation of the Heart lays a biblical foundation for understanding what best-selling author Dallas Willard calls the transformation of the spirit—a divine process that brings every element in our being, working from inside out, into harmony with the will of God. This fresh approach to spiritual growth explains the biblical reasons why Christians need to undergo change in six aspects of life: thought, feeling, will, body, social context, and soul. Willard also outlines a general pattern of transformation in each area, not as a sterile formula but as a practical process that you can follow without the guilt or perfectionism so many Christians wrestle with. Don't settle for complacency. Accept the challenge Renovation of the Heart offers to become an intentional apprentice of Jesus Christ, changing daily as you walk with Him.**

## Human Minds and Animal Stories

# How Narratives Make Us Care About Other Species

*Routledge* **The power of stories to raise our concern for animals has been postulated throughout history by countless scholars, activists, and writers, including such greats as Thomas Hardy and Leo Tolstoy. This is the first book to investigate that power and explain the psychological and cultural mechanisms behind it. It does so by presenting the results of an experimental project that involved thousands of participants, texts representing various genres and national literatures, and the cooperation of an internationally-acclaimed bestselling author. Combining psychological research with insights from animal studies, ecocriticism and other fields in the environmental humanities, the book not only provides evidence that animal stories can make us care for other species, but also shows that their effects are more complex and fascinating than we have ever thought. In this way, the book makes a groundbreaking contribution to the study of relations between literature and the nonhuman world as well as to the study of how literature changes our minds and society. "As witnessed by novels like *Black Beauty* and *Uncle Tom's Cabin*, a good story can move public opinion on contentious social issues. In *Human Minds and Animal Stories* a team of specialists in psychology, biology, and literature tells how they discovered the power of narratives to shift our views about the treatment of other species. Beautifully written and based on dozens of experiments with thousands of subjects, this book will appeal to**

animal advocates, researchers, and general readers looking for a compelling real-life detective story." - Hal Herzog, author of *Some We Love, Some We Hate, Some We Eat : Why It's So Hard To Think Straight About Animals*

## The Abandonment of the West

## The History of an Idea in American Foreign Policy

*Basic Books* This definitive portrait of American diplomacy reveals how the concept of the West drove twentieth-century foreign policy, how it fell from favor, and why it is worth saving. Throughout the twentieth century, many Americans saw themselves as part of Western civilization, and Western ideals of liberty and self-government guided American diplomacy. But today, other ideas fill this role: on one side, a technocratic "liberal international order," and on the other, the illiberal nationalism of "America First." In *The Abandonment of the West*, historian Michael Kimmage shows

how the West became the dominant idea in US foreign policy in the first half of the twentieth century -- and how that consensus has unraveled. We must revive the West, he argues, to counter authoritarian challenges from Russia and China. This is an urgent portrait of modern America's complicated origins, its emergence as a superpower, and the crossroads at which it now stands.
